# Proceedings of the City Council

AND OF THE

COMMITTEE OF ARRANGEMENTS.

City of New Bedford.

IN BOARD OF ALDERMEN,  
AUGUST 15th, 1876.

*Ordered,* That the proceedings had upon the occasion of the Municipal Celebration of our CENTENNIAL ANNIVERSARY be published, and that His Honor the Mayor, and the Chairman of the Committee on the FOURTH OF JULY CELEBRATION, be a committee to carry this order into effect.

Adopted in concurrence.

The committee of the City Government, charged by the council's order of August 15th with the duty of arranging for publication the proceedings upon the occasion of the Municipal Celebration of our Centennial Anniversary, present herein the result of their labors.

A brief introduction precedes the address of the Hon. William W. Crapo ; and in an appendix to his interesting and highly valuable Historical Discourse, such documents are given connected with the early history and with the growth and progress of our city, as seemed calculated to gratify the desire for further information upon these subjects so vividly awakened by that admirable contribution to our local annals. In the discharge of our duties we have been materially assisted by our fellow-citizen James B. Congdon, whose large collections and intimate acquaintance with our local history have contributed in no small degree to the value and interest of our centennial volume.

ABRAHAM H. HOWLAND, JR.  
WILLIAM T. SOULE.

# The Centennial in New Bedford.

---

## INTRODUCTORY.

The arrangements for the celebration of the Centennial Anniversary of our National Independence were commenced by the passage of an order, of which the following is a copy.

### CENTENNIAL IN NEW BEDFORD.

City of New Bedford.

IN COMMON COUNCIL,

April 6th, 1876.

*Ordered*, That a committee of six from this branch, with such as the Aldermen may join, be appointed a committee on Fourth of July celebration.

Adopted in concurrence.

Committee—Aldermen Soule, Hawes, and Baylies, and Councilmen Taylor, Howland, Denison, Beard, Pitman, and Wilbur.

An appropriation of four thousand dollars was made by the Council to meet the expenditures of the committee.

It did not need the recommendations of the State and United States governments to lead the committee to give careful attention to that part of their duties that consisted in providing for an address suitable to the occasion. After some progress had been made in the negotiations for an orator, the circular of which the following is a copy was received from the Secretary's Department of the Commonwealth of Massachusetts.

## Commonwealth of Massachusetts.

SECRETARY'S DEPARTMENT,

BOSTON, June 13th, 1876.

TO THE CITY CLERK:

SIR,—I have the honor to transmit herewith an order of the Legislature of Massachusetts, which has this day been received in this department, and a copy of the Resolution of Congress therein referred to.

Very respectfully your obedient servant,

HENRY B. PEIRCE, Secretary.

## Commonwealth of Massachusetts.

HOUSE OF REPRESENTATIVES, April 27, 1876.

*Ordered*, That the Secretary of the Commonwealth transmit to the Clerks of the several cities and towns in the Commonwealth, a copy of the Joint Resolution of Congress on the celebration of the Centennial in the several counties or towns, transmitted to the Senate by his Excellency the Governor, April 24th, 1876.

Adopted. Sent up for concurrence.

GEO. A. MARDEN, Clerk.

SENATE, April 28, 1876.

Concurred.

S. N. GIFFORD, Clerk.

## [PUBLIC RESOLUTION No. 1.]

JOINT RESOLUTION on the celebration of the Centennial in the several counties or towns.

*Be it resolved by the Senate and House of Representatives of the United States of America, in Congress assembled*, That it be, and is hereby recommended by the Senate and House of Representatives to the people of the several States that they assemble in their several counties or towns on the approaching Centennial Anniversary of our National Independence, and that they cause to have delivered on such day an historical sketch of said county or town from its formation, and that a copy of said sketch may be filed, in print or manuscript, in the Clerk's office of said county, and an additional copy, in print or manuscript, be filed in the office of the Librarian of Congress, to the intent that a complete record may thus be obtained of the progress of our institutions during the First Centennial of their existence.

Approved March 13, 1876.

With entire unanimity the committee fixed upon the Hon. William W. Crapo, of this city, member of Congress from the first representative district, to perform this honorable and important service. Not only the eminent abilities of Mr. Crapo led the

committee to look to him as a fitting person to carry out their idea as to the character of the address, and the views of the General Government as expressed in the resolution of Congress: the success of his effort in the same line of literary labor in the celebration of our Municipal Bicentennial in 1864, pointed to him as one possessing rare qualifications for the work, and the committee were highly gratified when he consented to undertake it.

The orator being secured, the committee gave their attention to the other arrangements proper for the occasion. The result of their labors is shown by the programme which they put forth, of which the following is a copy of the principal features.

## One Hundredth Anniversary of our National Independence.

July 4th, 1876.

### PROGRAMME.

#### BELLS.

The bells of the various churches will be rung at sunrise, noon, and sunset.

#### SALUTES.

A National Salute will be fired at sunrise, noon, and sunset, by Lieut. H. H. Fisher.

#### BASE BALL.

At 8 o'clock a game of Base Ball will be played on the Common between the Taunton Base Ball Club, of Taunton, and the King Philip Club, of Rockland, for a prize of \$250.

#### PROCESSION.

At 10 o'clock a Grand Procession will be formed on City Hall Square, under the direction of Capt. Lucius H. Morrill, Chief Marshal.

#### ORATION.

An oration will be delivered at Liberty Hall by Hon. William W. Crapo.

#### REGATTA.

The Regatta will take place on the Acushnet river, starting from a line drawn from the north end of Fish Island to the George Howland wharf, the course to be northeasterly about one mile to the station buoy and return. The races will be in the following order:

First, for single scull, 1st prize, \$40; 2d prize, \$20; 3d prize, \$10.

Second, for whaleboats, 1st prize, \$60; 2d prize, \$30; 3d prize, \$15.

Third, for double-oared working boats, 1st prize, \$40; 2d prize, \$20.

The tub race will follow that of the working boats near the same locality. 1st prize, \$10; 2d prize, \$5.

#### BALLOON.

At 5½ o'clock a Grand Balloon Ascension on the Common, by Prof. James R. Allen, aeronaut, of Providence, in his celebrated balloon Monarch.

#### FIREWORKS.

At 8 o'clock, on the Common, a Grand Display of Fireworks will form a fitting termination of the festivities of the day.

WM. T. SOULE,  
JON. C. HAWES,  
JOHN B. BAYLIES,  
JOHN P. TAYLOR,  
WM. H. PITMAN,  
LEMUEL C. WILBUR,  
JON. HOWLAND, Jr.,  
WM. A. BEARD,  
HENRY C. DENISON,

Committee of Arrangements.

The arrangements made by the committee were carried into execution in a manner that gave great satisfaction to the citizens, and reflected much credit upon all who were concerned in the plan or its performance.

The procession was one of the most attractive that had ever been seen in our city. We present its details as published in the newspapers of the 5th.

#### FIRST DIVISION.

Detachment of Police.

Martland's Band, of Brockton, William J. Martland Leader, 25 men.

Capt. Lucius H. Morrill, Chief Marshal.

Col. Samuel C. Hart, Aid.

New Bedford City Guards, Capt. Daniel A. Butler, 36 men.

William Logan Rodman Post 1, G. A. R., William G. Davis S. V. C.,  
50 men.

Robert G. Shaw Post 146, G. A. R., George T. Fisher P. C., 16 men.

Schouler Guards, Capt. James R. Reynolds, 32 men.

Disabled Veterans in Carriages.

## SECOND DIVISION.

Smith's American Band, Israel Smith Leader, 24 men.

Frank H. Forbes, Marshal.

Major James F. Chipman, Commander Centennial Battalion; Edward T. Chapman, Adjutant; Charles S. Paisler, Quartermaster.

Centennial Guards, Leopold Bartel Captain, Ezra K. Bly 1st Lieutenant, William O. Cross 2d Lieutenant, 40 men.

Yankee Volunteers, S. C. Spooner Captain, Robert W. Taber Lieutenant, 26 men.

Loyal Orange Lodge No. 40, Samuel Thompson Master, 32 men.

American Protestant Association, James Lowe Marshal, 20 men.

Mayor, Orator of the Day, and Chairman of the Committee of Arrangements.

City Government.

Officers of United States Service.

Invited Guests.

## THIRD DIVISION.

Union Cornet Band, Gustavus Rau Leader, 20 men.

Thomas J. Gifford, Marshal.

Engineers of the Fire Department.

Pioneer Hook and Ladder Company, Philip M. Tripp Foreman, 21 men.

Azores Band, G. A. Gustin Leader, 20 men.

Zachariah Hillman Steam Fire Engine Company, No. 5, William A. Russell Foreman, 22 men.

Hancock Engine Company, No. 9, Reuben Washburn Foreman, 23 men.

Truckmen's Association, Holder R. Tripp Captain, Peter Crapo and Francis Brownell Lieutenants, William J. Tripp

Standard Bearer, 60 men.

Procession of Trades.

There was perfect order throughout; the music was abundant and delightful; the military companies never appeared to better advantage; the firemen in their neat and appropriate costumes, orderly and prompt in their movements, told of the boldness and efficiency of that branch of our municipal service; and the truckmen and the procession of the trades were striking and interesting features of our centennial celebration. In short, all who took part in the parade seemed to have done all in their power to give efficiency, attractiveness and impressiveness to the exhibition.

There were two of the numerous divisions of the grand procession which from their peculiar character and the perfection of everything that belonged to them, constituted features of the dis-

play in a high degree appropriate and striking. Nothing could be more appropriate to the occasion than the presence in the line of a body of Centennial Guards, and a company of New Bedford Firemen with a splendid and perfect steam fire engine. The guards were there, the firemen were there, and the engine was there; and the people of New Bedford will not soon forget the strong and delightful impression made by their presence and completeness: the guards forming a vivid and faithful picture of the revolutionary period, and of the men by whom its battles were fought; the engine, with its environment of young, hardy, resolute and well trained firemen, and its three-pair team of noble horses, seemingly as proud of their work and position as if they were attached to the war-chariot of a Grecian general, by its artistic beauty and by its rare combination of the skill of the artisan and the genius of the engineer, presenting a striking and significant monument of the progress in the one hundred years of our national life, not only in our methods of dealing with the fire king, but in the whole domain of science and the mechanic arts.

The boat races were exciting and satisfactory. They were witnessed by a vast multitude. These exhibitions are always attractive. A Cornell crew could not have handled a New Bedford whaleboat with the skill and success of our New Bedford oarsmen.

The display of fireworks upon the common, to use the words of the committee, "formed a fitting termination to the festivities of the day."

An accident prevented the ascension of the balloon. A successful ascension a few days after made amends for the disappointment.

### EXERCISES AT LIBERTY HALL.

The exercises at Liberty Hall took place after the dismissal of the procession. They were opened by a prayer by Rev. Oliver A. Roberts. This was followed by a hymn written for the occasion, and sung by a quartet composed of Messrs. Wood, Littlefield, Tinkham, and Morton. Hon. William W. Crapo then delivered his address, after which, as the closing exercise, the choir sang "The Flag that's waved a Hundred Years."

The original hymn follows.

## HYMN FOR THE CENTENNIAL.

BY JAMES B. CONGDON.

Eternal Source of life and light!

Let all the people praise thy name :  
To thee, enthroned in glory bright,  
We raise our song with loud acclaim.

God of the Nations, Sovereign King!

Thy children at thy footstool kneel :  
Accept the sacrifice we bring ;  
Thy glory in our hearts reveal.

Firm in thy might our fathers stood,

Faithful to liberty and thee ;  
Undaunted, on the field of blood,  
They struggled, triumphed, and were free.

In peril's darker, sterner hour,

When treason grasped the nation's life,  
It stood, protected by thy power,  
Victorious in the deadly strife.

A NATION BORN! A NATION FREE!

Its century of being filled  
With wonders all proclaiming thee,  
That thou hast wrought, that thou hast willed :

Of these we sing, with rapture crowned

Our hearts their grateful homage bring,—  
Send to the skies, with joyful sound,  
The praise of heaven's Eternal King!

The address of Mr. Crapo, which we now present to our fellow-citizens and the country, comes up to the high standard for such discourses he has himself established, and to the ideal of the people and the government in the conception and recommendation of the arrangement by which the towns, cities, and counties of the Union were to be provided, through the instrumentality of the Centennial Celebration of the Declaration of Independence, with full and reliable "historical sketches" of their respective communities. Such was the judgment of those who heard it delivered; such, we feel assured, will be the verdict of all who shall read it, and particularly of those in official position by whose efforts this

feature of the celebration originated and had impressed upon it the sanction of governmental authority.

The citizens of New Bedford are to be congratulated upon this valuable accession to the memorials of our local history, so reliable and comprehensive in its facts, so lucid in its statements, so faithful to the deeds and characteristics of our people, and so attractive and sustained in the purity of its diction, and the graphic beauty of its descriptions.

A few notes, illustrative of the statements of the text, have been added. In the appendix will be found certain documents connected with our municipal annals and local history, which it seemed proper to publish in connection with the address.

Our people will find in the "historical sketch" now presented to them a faithful and life-like picture of the first hundred years of our business, social and municipal life. It is a record to which we may confidently appeal as an evidence of the high character of those who have been the makers of New Bedford's history.

ADDRESS

OF THE

HON. WILLIAM W. CRAPO.

c

City of New Bedford.

IN BOARD OF ALDERMEN,

AUGUST 15th, 1876.

*Ordered*, That a vote of thanks be, and the same is hereby tendered the Hon. William W. Crapo, for his very able and excellent address delivered at Liberty Hall July 4th, 1876, upon the occasion of the celebration of our Centennial Anniversary.

Adopted in concurrence.

## ADDRESS.

---

A resolution of the Congress of the United States has recommended that the people of the several states assemble in their counties and towns upon this the one hundredth anniversary of our national independence, and that an historical sketch of each county and town be given, which shall be preserved in manuscript or print, and filed in the office of the Librarian of Congress, "to the intent that a complete record may thus be obtained of the progress of our institutions during the first centennial of their existence."

This recommendation has received the sanction, by official proclamation, of the President, and the Governors of the States, and has met with ready and general adoption by the people.

The importance of this simultaneous effort for the preservation of local history in the record of facts now within reach and which might be forgotten, and in the collection of statistics now seemingly of trivial consequence, but essential to the future historian, can hardly be over-estimated. The Fourth of July oration of the olden time, with its appeals of patriotic fervor, often with stilted

rhetoric and boastful descriptions of the past and extravagant prophecies for the future, but still breathing a love of country and a devotion to the National Union, are to give place at this time to the simple recital of the events and achievements of the several communities. The task of today can best be fulfilled by a plain narrative, which, while familiar in its details and containing nothing of novelty to us, may aid, by its contribution to the general fund, to exhibit the marvellous growth and progress of our common country during its first century.

A brief and condensed account of the birth and growth of New Bedford, our own beloved and beautiful city, is then the task to which you have called me. This duty is made comparatively easy by the careful and conscientious work of those who have preceded me. Seventy years ago ABRAHAM SHEARMAN, Jr., a scholarly and kind-hearted member of the Society of Friends, sought to perpetuate some of the local events of his own time in a contribution to the Massachusetts Historical Collections.\* And we have in a permanent and attractive form the results of the elaborate research of our local historian, DANIEL RICKETSON, who describes with the enthusiasm of a genuine lover, the scenery, events, and men of his native town. And to our esteemed fellow-citizen JAMES B. CONGDON we owe a debt of gratitude, for he has done more than all others for the collection and preservation of those perishable materials to which the future historian and the curious student in family genealogy and biography will turn

\* A more important paper than that contributed by Mr. Shearman to the Massachusetts Historical Collections was prepared by him, the manuscript of which is in the hands of the compiler. It will be found in the appendix.

with grateful appreciation. Neither should I omit to mention in this list of those who have put in lasting form the record of the past the name of WILLIAM A. WALL, whose artistic genius has illuminated some of the prominent pages of our history. His pictures\* of the "Landing of Gosnold," the "Origin of the Whale Fishery," and the "View of the Four Corners in 1800," accurate in detail and truthful in the portraits of the leading actors of those times, are of such value in illustrating the earlier periods of our history that they should be placed in the ownership of the city.

Before considering the prominent events of the century now closing, I will briefly refer to the earlier history of the settlement of this territory. The original purchase was made of the Indians, Wesamequen† (otherwise known as Massasoit) and his son Wamsutta. The deed bore date at New Plymouth, November 29th, 1652. The tract conveyed embraced all of the shore commencing three miles eastward from the Acushnet river, and ending at a flat rock on the westward side of the harbor of Acoaksett, and extending "from the sea upward to go so high that the English may not be annoyed by the hunting of the Indians in any sort of their cattle." The consideration paid was "thirty yards of cloth, eight moose-skins, fifteen axes, fifteen hoes, fifteen pair of breeches, eight blankets, two kettles, one cloak, £2 in wampan, eight pair stockings, eight pair of shoes, one iron pot, and ten

\*The first named of these pictures is in the possession of Mr. WILLIAM P. S. CADWELL, the second of Mrs. SARAH RODMAN MORGAN. The "Four Corners" picture has been engraved. The original is owned by Hon. JOSEPH GRINNELL.

†The deed from Wesamequen to Bradford will be found in the appendix.

shillings in another comoditie.”\* We have no tradition which tells us in what form the last item of ten shillings payable “in another comoditie” was made.

In June, 1664,† by an order of the Plymouth Court, the mother town of Dartmouth received its simple chartered organization, which gave to the inhabitants the “liberty to make such orders as may conduce to their common good in town concernments.”

The first settlers upon this territory were Ralph Russell and his son John Russell, and Anthony Slocum, who built an iron forge at Russell's Mills, and John Cooke, whose home was at the head of the Acushnet river.

The Russell's Mills settlers were not original proprietors in the deed of 1652, but John Russell purchased the thirty-fourth part or share of Capt. Miles Standish, as appears by deed dated March 9th, 1664. John Cooke was an original proprietor. These two persons were the leading men of the town. John Russell was the first representative to the Old Colony Court, in 1665. The three years following John Cooke was the representative. Then followed John Russell for four years; and during the first twenty years of our municipal existence these men succeeded each other at Plymouth. In 1667 the court at Plymouth authorized John Cooke to make contracts of

\*The proprietors of the territory of Dartmouth became, under an order of the Plymouth Court, a quasi corporation, which continued in existence for about one hundred and seventy years. Under this authority their lands were conveyed. Their records, which are very voluminous, have been copied by direction of the County Commissioners under an act of the General Court, and the copy, with a copious index, is deposited in the office of the Register of Deeds, at the Court House in this city. The original records, with Benjamin Crane's field-books, are at the Free Public Library. Abner B. Gifford, of Westport, was the last clerk.

† See appendix for the Court Orders granting municipal rights and fixing territorial limits.

marriage in the town of Dartmouth, to administer oaths, to issue warrants in his Majesty's name, to bind over persons to answer to the court at Plymouth, and "to give forth subpoenias to warn witnesses." He was also for many years a Baptist minister in Dartmouth.\*

Two hundred years ago, in 1676, this locality was devastated by a cruel Indian war, full of barbarity and atrocity, carried on by King Philip, the younger brother of Wamsutta. The Plymouth Court took into serious consideration "the tremendous dispensations of God toward the people of Dartmouth, in suffering the barbarous heathen to spoil and destroy most of their habitations," and it was ordered that in the rebuilding and resettling they live compact together, so that they may be better able both to defend themselves from the assault of an enemy, and to attend the public worship of God.

At this time (1676) most of the dwellings in the town had been destroyed, and many of the people killed. Those who remained retired into Russell's house at Apponagansett, which was converted into a garrison.† There were other garrisons within the limits of the old town, one of which was on Palmer's Island, and another on the east bank of the Acushnet, near the Isle of Marsh.

The Acushnet Great Swamp and the Apponagansett Great Swamp were the convenient lurking places for the Indians, into which the settlers could not safely follow them.

Upon the death of King Philip, our fathers were en-

\* Backus's Church History, p. 135.

† Baylies Memoir, vol. 2, p. 47.

abled to rebuild their homes and again devote their energies to subduing the wilderness.\*

John Russell, ~~who with his father~~, Ralph Russell, and Anthony Slocum operated the iron forge at Russell's Mills, and whose death occurred in 1694, did not reside within the limits of the present city. His son Joseph was born in 1650, and during the war lived at the Apponagansett garrison, where his twin sons Joseph and John were born Nov. 22d, 1679. He moved from the Apponagansett river to the Acushnet prior to 1711, and resided at what is now the corner of County and South streets. Joseph Russell, born at the garrison, afterwards resided at what is now the corner of County and Bush streets, where in my boyhood stood the "little school-house" in whose yard was the well used by this early settler. The title of the lands of the Russells was confirmed by her Majesty's (Queen Anne's) Justices of the Court of Quarter Sessions for the County of Bristol, May 25, 1711. The survey had been made by Benjamin Crane, who, under the "eight hundred acre division," established the original boundaries.

The son of the last named Joseph Russell, also named Joseph, was born on the 8th October, 1719, and died on the 16th October, 1804, aged 85 years.† We may fairly consider this last named Joseph Russell as the founder of our city. He owned the tract of land bounded on the

\*Aid was contributed from various sources for the relief of Dartmouth when thus desolated; and it is an interesting fact that a liberal contribution came from Ireland. We were but paying an old debt when we sent assistance to the destitute people of that country.

† An interesting account of the Russell family, by William T. Russell, a grandson of the founder of our city, is published in the appendix.

*This is a mistake. John Russell came from Bedfordshire, England, and was in no way connected.*

south by land of his brother Caleb, the division line being midway between the present Bedford and Russell streets, and on the north by land of Manasseh Kempton, whose division line was between the present Elm and William streets, and bounded easterly by the river. His homestead was on the County road, as it was called, between the present Court House and the residence of Mrs. CHAS. W. MORGAN. He is described as "a man of great industry, prudence, and enterprise, and of strict integrity of character, a large farmer and extensive landowner." He was also engaged in mercantile business, owning several vessels trading at southern ports and the West Indies. He was the first to engage in the whale fishery, and to establish a sperm oil factory in New Bedford.

The history of the New England whale fishery is so interwoven with the history of New Bedford during the last century that they cannot be separated; and no record of the growth and business of our town and city can be complete without it. Our wealth, our population and our progress have been the fruits of this industry; and our position and fame among the cities of the world is due to its successful prosecution.

The first whaling by New England men was doubtless done by the inhabitants of Cape Cod. In the records of Nantucket, in 1690, it is written, "One Ichabod Paddock came from Cape Cod to instruct the people in the art of killing whales." In Edward Randolph's narrative, written for the Lords of Trade in October, 1676, in describing the resources of the Colony of New Plymouth, he says, "And here is made a good quantity of whale oil,

*was not an owner in the  
Essex Mills —*

which fish they take upon the coasts.”\* The business was then carried on in boats from the shore. As early as 1715 we find the people of Nantucket pursuing the whales upon the ocean in small sloops and schooners, making voyages of a few weeks’ duration and bringing the blubber home and trying out the oil on shore.

In 1751 there were two or three vessels from Apponagansett river engaged in this fishery. These vessels were owned by John Wady and Daniel Wood. There were, at this date, one or two vessels in this business from the Acushnet river, owned by Joseph and Caleb Russell. Up to this time whales were principally taken between George’s Bank and the capes of Virginia; and the voyages continued from four to six weeks. Soon after the whalemen extended their cruising grounds to the eastward of the Newfoundland coast, and the voyages were lengthened to three months.

At first, more vessels were fitted from Apponagansett river than from the Acushnet; but soon the superior advantages of our harbor became apparent, and the Apponagansett vessels were fitted here.†

Consider for a moment the aspect of our town when these two or three little sloops were fitting for their whaling voyages. The present site of the city was a forest. There was a “try-house” near the shore, (at the foot of Centre street,) and a rough cart-way led through the woods to the few farm houses on the County road.

The Rev. Paul Coffin, who ten years later (July 21st,

\* See appendix for an account of some instances of “Primitive Whaling.”

† Abraham Shearman, Jr., has given some valuable memoranda in relation to the early whaling, which are to be found in the appendix.

1761) visited the place, thus describes it in his journal: "This day rode to Dartmouth, a spacious town; twenty miles will carry you through it. Rocks and oaks are over the whole town. Whortle bushes and rocks in this and the two former towns are the sad comfort of the weary traveller. At sunset arrived at Rev. West's."

In 1760 there commenced an immigration to this locality which indicated that its future was to be commercial rather than agricultural.\* In this year Joseph Russell sold an acre of land, the first sale made from his "800 acre" homestead estate, to John Loudon. The spot selected was a few rods south of Union street on South Water street, and on it a house was erected. Mr. Loudon came from Pembroke. He was a calker by trade, and his purpose in coming here was to engage in ship-building. He was followed by Benjamin Taber, who purchased a lot of land on the north of the present Union street, and built a shop for the purpose of carrying on boat-building and block-making, which trades he had learned at Nantucket. The same year John Allen, who was a house carpenter, bought a lot on the east side of South Water street, extending to the river. Upon this he built a house, which was afterwards sold to Barzillai Myrick, a ship carpenter.

The next year (1762) Gideon Mosher,† a mechanic, bought a lot on the north side of Union and east side of

\* See Abraham Shearman Jr.'s memoranda for some account of New Bedford's early history.

† Mosher took no deed of his purchase. The land was deeded by Joseph Russell directly to Benjamin Taber.

North Water, and erected a house thereon. The same year Elnathan Sampson, of Wareham, a blacksmith, purchased the lot next north of Loudon's. His lot was bounded on the "north and east on land left for ways or streets." These are now known as Union and Water streets. His north line was eight rods in length, and his east line four rods, and the purchase money was £6 13s. 4d. The early settlement was at the Four Corners, as it was known and called for a hundred years. This was the centre of the young town.

I have been somewhat minute in this description of the infant settlement, in order that the industrial character of the pioneers might be noticed. The men who came here in 1760 to build up a town were mechanics. Taber, Allen, Myrick, Mosher, and Sampson, were industrious and enterprising mechanics, and their descendants, inheriting their industry and enterprise, have been and are among our worthiest citizens. We may well believe that the earnestness of purpose and the devotion to their trades with which these young mechanics of one hundred years ago sought to improve their condition, affected in no small degree the character of our local institutions. And we look back with satisfaction to the intelligent and industrious character of the skilled and honest artisans under whose wise influence the early settlement of our town was made.

But there was one thing wanting to promote the business of the village. Capital was needed. Joseph Russell had means, which he used in whaling and freighting, and which furnished moderate employment to the villagers.

But his wealth was not large, and his operations were necessarily very limited.

The required capital, so necessary for the activity and growth of the village, came in 1765, when Joseph Rotch, an enterprising merchant of great experience and knowledge in mercantile affairs, selected our harbor as one eligible and advantageous for the prosecution of the whale fishery. This event was of the utmost importance, and this acquisition of capital, accompanied with the ripe experience, clear-headed sagacity and skilled methods of this accomplished merchant, gave an impetus to our infant industry which insured its permanence and success.

Mr. Rotch purchased from Joseph Russell, in 1765, ten acres of land in one tract, besides a number of smaller lots in different parts of the town.\* The "ten-acre purchase" was from the north side of the Russell farm, and next to the estate of Manasseh Kempton. It commenced on the shore where is now Hazzard's wharf, and its north line, between William street and Elm street, extended nearly to Pleasant street and Cheapside; its south line was bounded by the present estate of Willard Sears. Its river front extended from Central wharf to the north line of Hazzard's wharf.

Up to this time the village had no distinctive name; †

\* A copy of the deed from Joseph Russell to Joseph Rotch will be found in the appendix.

† That part of Dartmouth which became New Bedford was known as the Acushena country. The village which was afterwards known as Cushnet (the name is spelt in half a dozen different ways in the old records) formed one of the three territorial divisions of Dartmouth, and was thus recognized for all the purposes of municipal arrangements and taxation. The other two were Ponagansett (Dartmouth) and Coaksett (Westport.)

1661. "Cushenag" was taxed "for the publicke charges of the countrey, as they were ordered by the Court for this yeare, respecting the officers' wages and charge

it was simply a part of Dartmouth. But now its increasing importance rendered necessary a name by which the locality should be known. At the suggestion of Mr. Rotch, and as a compliment to Mr. Russell, although somewhat indirect, the village was called "Bedford." About this time there were other accessions to our business population. John Howland had moved into the village from Apponagansett, and Isaac Howland (the senior of that name) had come from Newport, bringing with him considerable capital and business enterprise. The latter gentleman resided in the most elegant and expensive house in the town. It was built of brick, — the first of that material erected here; it was situated on Union street, and was torn down when Cheapside was opened.

The little village of Bedford prospered. Its industries were successful, its population rapidly increased, and its merchants added largely to their wealth. The whaling voyages had been extended, and new grounds had been discovered. During the ten years from 1765 to 1775 our whaling fleet had increased from two or three vessels to fifty, which were much larger and of more value. The vessels sent out to the Falkland Islands in 1774 were fitted and owned here. It was this example of New England daring and enterprise which inspired Burke in the House of Commons to utter that eloquent tribute to our victorious industry which so often has touched the pride and awakened the enthusiasm of the sons of New Bedford

*of the magistrate's table, £1 10 00."* This was the territory in the neighborhood of the Acushnet river. "The farnes against Road Island" were also taxed. These "farnes" were upon that part of the territory afterwards called Dartmouth which bordered upon the province of Rhode Island.—[Old Colony Records, 1661.]

and Nantucket. "No ocean," says Burke, "but what is vexed with their fisheries; no climate that is not witness to their toils. Neither the perseverance of Holland, nor the activity of France, nor the dexterous and firm sagacity of English enterprise, ever carried this perilous mode of hardy enterprise to the extent to which it has been pushed by this recent people,—a people who are still, as it were, in the gristle, and not yet hardened into the bone of manhood."

The war of the revolution not only checked this growth, but destroyed almost entirely our business. It was useless to send vessels to sea with the danger of almost certain capture; and if capture were avoided and a cargo obtained, with no market, since the consumers in Europe could not be reached. No town suffered more from the common hazards of the war, nor by direct depredations of the enemy. Joseph Rotch returned to Nantucket, and remained there until the war closed. Joseph Russell lost most of his property, except his real estate; and the same was true of the other merchants. The great majority of the business men of the village were Quakers, and could not conscientiously engage in the privateering adventures which otherwise, as a seafaring community, they would naturally have undertaken. But the advantages of our harbor were recognized during the war, and it was found to be a convenient port from which to fit out privateers, and a safe refuge for their prizes. There were many, too, of our sailors and citizens, who were quite willing to engage in this hazardous business, prompted both by its rewards and a desire to cripple the commerce of the en-

emy which had destroyed their peaceful employments. Before the open declaration of hostilities between the two countries, as early as May, 1774, exasperated by the capture in Buzzard's Bay of three vessels belonging to Sandwich, by the British cruiser Falcon, a schooner had been fitted out of this harbor, which recaptured two of the vessels and took as prisoners fifteen British officers and marines.

Our harbor became a rendezvous for privateers, and many prizes were brought here, and valuable cargoes landed, either to be stored in our warehouses or forwarded into the interior.

It was to punish the people of the town for their offences in fitting out and harboring privateers, and to destroy the shipping and valuable stores which were collected here, that Major-General Grey, under orders from Sir Henry Clinton, made the raid of Sept. 5th and 6th, 1778, which destroyed a large portion of the property of the village, and inflicted a blow which crippled it for years. This event, which is the most prominent one in our local revolutionary history, would demand an extended notice and an elaborate description, were it not that the pen of the historian has already given it a permanent record. I will therefore at this time only indicate the principal features of the attack.

On the afternoon of the 5th day of September, 1778, there landed from the frigate Carysfort and the transports that accompanied her, between four and five thousand British troops. Fearing to come up the river on account of the fort which guarded the harbor, the landing was

made by boats in Clark's Cove. Marching up the County road to the village, they burned houses and wharves, shipping, naval stores and provisions. The total loss of property was estimated at £96,980; no small sum for those days, in such an infant settlement. While the work of destruction was going on about the wharves and warehouses, the main body of the troops marched up the County road towards the Head of the River. Near the present corner of North street they fired upon and killed Abraham Russell, Thomas Cook, and Diah Trafford. This was the first blood shed in the revolution in this neighborhood. There had been stationed here a company of light artillery sent from Boston, under the command of Capt. James Cushing, but a short time previous to the landing of the British it had been ordered to Howland's Ferry. During the day of the landing James Metcalf, the 1st lieutenant, and William Gordon, the 2d lieutenant, had returned with a part of the company and one field piece. They were obliged to retreat as the British advanced, and during the night Lieut. Metcalf was mortally wounded at Acushnet. The enemy marched around the head of the river to Sconticut, and after destroying the magazine and burning the barracks at the fort they reembarked, the fleet coming from Clark's Cove to the river to receive them.

An attempt was made to rally the militia of the neighboring country for the defence of the village, and 140 to 150 men were collected. These men rendered efficient service in protecting the property on the Fairhaven shore. Major Israel Fearing was the hero of the occasion, and

displayed great courage; and the resolute way in which he handled the few raw militiamen won for him the warmest praise.

But at last the war was ended. When the news came to this little village that the ship *Bedford*,\* Capt. Wm. Mooers master, had arrived in the Downs, on the 23d day of February, 1783, the very day of the signing of the preliminary treaty of peace, and had straightway proceeded to London with her cargo of 587 barrels of oil, displaying there for the first time the United States flag, with its stars and stripes, then the people of the village believed that peace with its blessings had come, and they were ready to begin again the work of rebuilding the town. This ship *Bedford* was built by Ichabod Thomas on North river, Pembroke, and delivered to Joseph Rotch, at Bedford, January 13th, 1772, as appears by the receipt which is still extant. She was named by the owner for his adopted town, and sailed from this harbor before the war.

It was a remarkable coincidence that the war, which had been precipitated in the destruction of the tea in Boston harbor, thrown overboard from the *Dartmouth*, a ship owned by Francis Rotch, of this same village, and built in 1767 at the foot of Middle street, should have associated with its close the advent in English waters of the ship *Bedford*, as the first vessel floating the American flag in any British port. The names of the mother town

\* See appendix for an account of the arrival of the *Bedford* in the Thames, and of the excitement occasioned by the event. A letter from William Rotch, Jr., to Hezekiah Barnard, written in 1842, having relation to that event, will also be found in connection with it.

and of the village are thus made memorable in our revolutionary history.

Our municipal existence as a separate town occurred in 1787,\* when both New Bedford and Westport were by acts of incorporation severed from the old township of Dartmouth.

To show how carefully our fathers protected, even in their legislation, the feelings of the minority in matters of domicil and local government, let me quote a sentence from the act: "Provided, nevertheless, that any of the inhabitants now dwelling on the above-described lands, who are or may be still desirous of belonging to the town of Dartmouth, shall at any time within two years from the passing of this act, by returning their names into the Secretary's office, and signifying their desire of belonging to said Dartmouth, have that privilege; and shall, with their polls and estates, belong to, and be a part of the said town of Dartmouth."

New Bedford was required to pay all its arrears of taxes to Dartmouth, and its proportionate part of the unpaid beef tax, so called, together with its proportion of all other debts. It was provided that the town's stock of powder and other town's property should be estimated and divided; and that New Bedford should pay to Dartmouth for the workhouse standing within the line of New Bedford.

The population of New Bedford, according to the next

\*See appendix for the act of the General Court incorporating the town of New Bedford, and for the acts by which Fairhaven was set off from New Bedford, the dividing line between Dartmouth and New Bedford was altered, and a part of Dartmouth and a part of Acushnet annexed to New Bedford.

census, taken in 1790, was 3313. Dartmouth had 2499, and Westport 2466.

The leading business men of this period were William Rotch, Sr., the wealthiest man of the town, estimated to be worth over \$100,000, his son William Rotch, Jr., and his son-in-law Samuel Rodman. Then followed the various members of the Russell and Howland families, Thos. Hazzard, Jr., and the Hathaways, who were all "well to do." There were others without the prestige of wealth, but yet of great influence in the town; such as Caleb Congdon and Abraham Smith, and, not to be omitted, the Davis family, famous for its Quaker preachers. The wealthy people were models of industry and economy; actuated by a sense of duty, they thought it necessary to show an example of prudence, diligence, and unostentation to others, and their influence in this regard was of the greatest benefit to the community. Their style of living was plain and rational.

In 1795 there was a Congregational meeting-house at the Head of the River, and another in the Bedford village. Dr. West officiated at each on alternate Sundays.

At this time there was one doctor, Ebenezer Perry, the son of a physician, and called a "safe doctor," who charged sixpence a visit. There was only one lawyer in the village, Thomas Hammond, rarely found in his office, and concerning whom tradition says that shooting and fishing were his favorite pursuits. There was one schoolmaster, Cornelius Wing, and one schoolmistress, Temperance Jennings. Mr. Wing was preceded by William Sawyer Wall, of English birth, a person much beloved,

and who exerted a great influence in the community. He was first and foremost in the educational and scientific efforts of that day, and his name appears as the first President of the Dialectic Society, the earliest literary association of the town, and which did much for its culture, refinement, and scholarship.\*

At the close of the war of the revolution our people sought to regain their prosperity and commercial importance. Although crippled in resources they were not disheartened, but sought with their old vigor to reestablish their fortunes by their former pursuits upon the seas. They looked to the broad oceans, common and free to all men as the air itself, to yield them rich harvests as they had in the past.

But there were other difficulties besides the replacement of the vessels which had been burned by the British or had rotted in disuse. The British government, as if to distress us even after peace, imposed a heavy alien duty upon oil, which rendered it impossible to realize a profit from the prosecution of the business. Her policy was to force this industry to her own harbors. For a time it seemed successful, and many Nantucket and New Bedford whalemens made their voyages from English and French ports. But the persuasiveness and address of William Rotch, Sr., secured to us, first from France and then

\* William Sawyer Wall was a Friend, and came to this country from England in early life. He was the father of our fellow-citizen WILLIAM ALLEN WALL, the artist. A few weeks ago, when Stanley Pumphrey, of Worcester, England, a minister of the Society of Friends, was in this city, he was shown a certificate from the Worcester Monthly Meeting issued to William Sawyer Wall, dated in 1802, and sent to him in New Bedford, signed by *Stanley Pumphrey* as clerk. Our visitor is grandson of the signer.

from Great Britain, the privilege of sending our oil to those countries free of duty, thereby enabling him—as one of his biographers has said—to carry on the business with the highest profit and to benefit his neighbors.

The success which attended the efforts of our citizens may be judged by the statement of vessel tonnage owned and sailing from this harbor in January, 1804. The total number of registered vessels was 59, amounting to 13,621 tons; and of enrolled vessels there were 5525 tons; making an aggregate of 19,146 tons. The freighting business was quite important at that time. There were 30 ships and brigs, averaging 200 tons burthen, owned and fitted here, employed in general freighting, making their voyages to Europe, South America, and the West Indies.\*

But the work of developing this industry of the whale fishery during the early years of the nineteenth century was slow and difficult. The embargo came and ruined many of our merchants; and prior to that, in 1807, in consequence of the Berlin and Milan Decrees and the Orders in Council, there were thirty ships laid up in New Bedford on account of the hazards attending them at sea.

There was no marked improvement in this business until after the close of the war of 1812. The politics of the inhabitants of New Bedford from the close of the revolution to the war of 1812 was Federalist, and they had given bitter, decided and partisan expression to their

\*In the appendix will be found a list of New Bedford shipping in 1803, prepared by Abraham Shearman, Jr.

opinions in opposition to this latter war.\* This may perhaps have been influenced by the severe reverses experienced in business. Many of our ships in the Pacific were captured; and while a few were recaptured by Porter and Downes, most of them were destroyed or used as transports by the British.†

After the termination of this war, the whale fishery, especially as prosecuted at New Bedford, advanced with great rapidity and wonderful success.

But before proceeding to the local development of this industry, I desire to sketch briefly, in chronological order, the seas and oceans which had been opened in the pursuit of whales. As early as 1770, Nantucket had sought the "right" whale off Disco, in Greenland, going as high as 81° north latitude. In 1774, New Bedford had sent vessels to the Falkland Islands. In 1784, we find our New England whalers taking seals and whales around Patagonia and in the Southern ocean. In 1789, they are about Madagascar and the Cape of Good Hope. In 1791, the whaleships entered the Pacific ocean. We are told that the vessels were small, poorly fitted, and insufficiently prepared for the long and often boisterous passages around Cape Horn. But in one thing they excelled,—in the character of the men who engaged in these perilous voyages. History cannot point to an enterprise prosecuted with more vigor and courage, with more hardihood and

\* A transcript of the proceedings of a town meeting held in New Bedford July 21, 1814, which will be found in the appendix, gives an interesting illustration of this.

† The names of the men who composed the military companies of New Bedford, which formed a part of the detachment ordered to the defence of the town in 1814, will be found in the appendix.

intelligence, than that displayed by the pioneers in the Pacific whale fishery. I cannot forbear mentioning the name of one whom you all remember; for his genial, courteous manners, his kind and obliging heart, his clear comprehension and prompt decision endeared him to us who knew him in his old age, and assured us that the commendation bestowed upon him seventy years ago for "his prudence, courage, and fortitude," were richly deserved. The whale fishery has produced many noble men, but none more praiseworthy than that hero and veteran of the sea, EDMUND GARDNER.\*

It is asserted that the ship Rebecca,† of New Bedford, owned by Joseph Russell & Sons and Cornelius Howland, named for Joseph Russell's oldest daughter, the grandmother of our esteemed fellow-citizen Daniel Ricketson, was the first American whaleship that doubled Cape Horn. She sailed from this port Sept. 28, 1791, under command of Joseph Kersey, and returned with a full cargo of sperm oil obtained on the coast of Chili, on the 23d February, 1793.

In 1800, our whalers were cruising on the coast of Peru and around the Galapagos Islands. In 1818, they were on the "Off-shore ground." In 1820, they had captured whales on the coast of Japan. In 1836, our vessels were taking oil on Kodiak, the northwest coast of America; and in 1848, the bark Superior, of Sag Harbor, Capt.

\* Capt. Gardner has left in manuscript an autobiography, abounding in interesting incidents, and containing many vivid and thrilling descriptions. It is worthy of publication.

† William T. Russell, a grandson of Joseph Russell, has given an interesting account of the Rebecca, which will be found in the appendix.

Roys, passed through Behring Strait, and opened up to us the vast wealth of the Arctic grounds.

There are many incidents connected with the earlier voyages which deserve a permanent record, and the narrative would prove an entertaining one. I will recall one or two of the "good voyages," as they were called, of forty years ago. In October, 1838, the ship William Hamilton, of New Bedford, owned by I. Howland, Jr., & Co., commanded by William Swain, brought home a cargo of 4060 barrels of sperm oil; her entire catch during the voyage, including the shipment from the Western Islands on her passage out, being 4181 barrels of sperm oil.

Capt. Daniel Wood, remembered by many in this audience, a fine specimen of our whaling masters, whose clear judgment and impartial decisions fitted him, after active service upon the ocean, to act as Port Warden in settlements between owners and underwriters, brought to New Bedford, in the year 1833, in the old ship Braganza, nearly 4000 barrels of sperm oil. And George B. Worth, another of those generous, large-hearted old sailors, brought in the Magnolia to her owners 3451 barrels. But in those days of large "catch" there were low prices.

In the prosecution of the whale fishery New Bedford has surpassed all other places that have engaged in the business, and her increase in wealth from this cause was rapid and large. From the year 1820 until the year 1857 her prosperity and her accumulation of wealth were continuous almost without exception.

The limits of this address will not permit the detail of figures showing this wonderful increase of material prosperity. A few must serve to illustrate our progress.

On the 1st day of August, 1835, our tonnage was . . . . . 73,982

On the 1st day of August, 1845, our tonnage was . . . . . 116,569

At this last-named date New Bedford was the fourth tonnage district in the United States, — New York, Boston and New Orleans alone exceeding it. There was more than double the amount of registered tonnage owned in New Bedford that there was in Philadelphia.

During the year 1844 there were brought into New Bedford :

Sperm oil, . . . . . 54,509 barrels.

Whale oil, . . . . . 102,992 barrels.

157,501 barrels.

Whalebone, . . . . . 978,592 pounds.

Which at the prices of that time, — low as compared with the present, — yielded a total value for the whaling of the year of \$3,063,324.15.\*

About this time our people thought that the population, business and commercial importance of the town entitled it to receive the municipal organization of a city; and New Bedford received its city charter in 1847.† The town government had existed sixty years. The population had increased from 3000 to 15,000. Fairhaven,‡

\* See the appendix for an account of "New Bedford in 1845."

† The last town meeting, excepting those rendered necessary to complete the change in the form of municipal government, was held in January, 1846. It was one of the most exciting and interesting ever held in the town. Under a belief that a brief account of this last municipal meeting under the old form of government would interest the people, a transcript of the town records is given in the appendix.

‡ In the appendix will be found the act of the General Court setting off Fairhaven from New Bedford, also the other legislative proceedings by which changes have been made in the territorial limits of New Bedford.

which had been organized as a separate town in 1812 from the territory of New Bedford, had at this date a population exceeding 4000, which swelled the aggregate of population residing upon the original territorial limits to over 19,000.

The whaling industry of New Bedford reached its high-point, in capital, in vessels and tonnage, in 1857. Its fleet, of 329 ships and whaling outfits, was worth more than twelve millions of dollars, and required ten thousand seamen.

The largest importations of oil and bone were in 1851 and 1853. The quantities of each, with the prices realized from their sale, were as follows :

|       |                                                                  |                 |
|-------|------------------------------------------------------------------|-----------------|
| 1851. | 99,591 bbls. sperm oil, at \$1.27 $\frac{1}{4}$ per gallon, . .  | \$3,991,980.75  |
|       | 328,483 bbls. whale oil, at .45 $\frac{1}{4}$ per gallon, . .    | 4,682,114.56    |
|       | 3,966,500 lbs. whalebone, at .34 $\frac{1}{2}$ , . . . . .       | 1,368,442.50    |
|       |                                                                  | <hr/>           |

I have mentioned the prominent merchants who were identified with the prosecution of the whale fishery in its earlier years. There are other names which should not be omitted, since the men who took the places of the pioneers achieved much of the success. John Avery Parker, George Howland, Isaac Howland, Jr., Humphrey Hathaway, John and James Howland, and William C. Nye, were men of great business sagacity, financial skill, painstaking industry, and unquestioned integrity. The large fortunes left behind by many of them show how

fully these qualities had been exercised and how abundantly rewarded. From 1824 to 1830, there were new counting rooms opened, representing what was then called the "middling interest," and occupied by Abraham Barker, David R. Greene, Joseph Bourne, Alfred Gibbs, and others. These men boldly claimed a share of the whaling business, and aided materially in making its progress continuous and rapid. The active whaling merchants of the present day, possessing the venturesome business enterprise of their predecessors, need not be named.

Two events, although comparatively recent, must be mentioned in order to render complete the history of our fishery: the depredations by the rebel cruisers during the war of the rebellion, and the loss of our Arctic fleet in 1871.

Early in our civil war the torch of the rebel cruisers carried dismay into our whaling fleets. In the summer of 1862 the confederate steamer *Alabama*, under command of Admiral Semmes, in the vicinity of the Azores, burned many of our vessels, and during the war the *Florida* and *Sumter* added to the destruction. But the great loss occurred in June, 1865, when the *Shenandoah*, having recruited at Melbourne for an Arctic cruise, entered into Behring Strait. Here the unsuspecting whalers, pursuing their vocation amid the ice and fogs of that frozen region, were suddenly met by a danger which they could neither resist nor avoid. This armed steamer, the *Shenandoah*, Capt. Waddell, was in their midst, and the work of destruction was rapid

and thorough. Twenty-five ships, most of them of large size, were captured and burned, besides four others captured but bonded by the privateer for the purpose of furnishing transportation, to some friendly port, for the eight hundred sailor prisoners, who with sad hearts, fifteen thousand miles from home, had seen their burning ships, with the products of their toil and danger and their prospective hopes of success, sinking beneath the waves.

Among the incidents of this rebel raid should be mentioned the praiseworthy action of Capt. EBENEZER F. NYE, of the *Abigail*, after the loss of his ship, in saving as far as possible the fleet from destruction. The *Milo* had been captured and bonded, and had received on board a large number of prisoners. During the following night Capt. Nye organized an expedition of two boats, and at early dawn left the *Milo*. While the *Shenandoah* was pursuing her piratical work, these brave men, following along the fields of ice, pulled north in their open boats 180 miles, and there found a number of defenceless whalers, giving them the information which saved them from capture. It was a gallant act, prompted by the humanity and executed with the cool determination of the hardy sailor.

Fifty whaling vessels were captured by the rebel cruisers, of which forty-six, with outfits and cargoes, were burned. Of this number twenty-eight sailed from and were owned in New Bedford. The loss of ships and outfits belonging here exceeded one million of dollars, and of oil and bone on board four hundred thousand dollars.\*

\* A list of the captured vessels is given in the appendix.

But the most memorable of all the disasters which have attended this perilous business was that of September, 1871, when in a single day thirty-three ships were abandoned in the Arctic ocean, hopelessly crushed or environed in the ice. This large fleet of the most costly ships in the service, caught between the jaws of the ice floes, drifted with the westerly gales until the immense fields of ice reached the shore, when they were crushed like egg shells. It was a sad and terrible calamity, not merely in its loss of property, but more in the hardship and suffering of twelve hundred shipwrecked men. Hemmed in by the ice which lines the shores of a barren country, where neither food nor fuel could be obtained, these men well knew that if driven upon the beach, ten or eleven dreary winter months must elapse before assistance could reach them, and that in the long interval death would come to most of them by starvation or cold. In their peril an expedition of three boats was fitted out under command of Capt. Frazier, of the *Florida*, to go south over the ice, and if possible find vessels in the open sea. The written appeal for relief which these shipwrecked captains sent to whoever it might reach, was full of touching, pathetic eloquence. It was the simple appeal of brave men in distress to brave men who could realize the fearful peril.

A toilsome and anxious journey of seventy miles between packs of ice brought the little expedition to the open sea south of Icy Cape, and there the sight of ships gladdened their hearts. It needed no appeal for succor, no promise of reward, for the warm hearts of brother-

sailors were ready to save their comrades, although at the heavy loss of an abandonment of their own voyages and the earnings of a year. Capt. Frazier returned to the wrecks off Point Belcher with the joyous tidings of relief, and these twelve hundred men, taking with them in boats such provisions as they could carry, made their way over and through the ice fields to the rescuing vessels without the loss of one of their number.

Of the thirty-three vessels crushed or abandoned, twenty-two belonged in New Bedford, and were valued, with outfits, without the oil and bone on board, at \$1,-090,000.

The sketch which I have given of the whale fishery as conducted at New Bedford, is but a mere outline of its history. There are those present who have seen its rise, progress, and decline, and been participants in its labors and perils. It reached its culminating point in 1856 or 1857. Since then it has declined, and now our fleet numbers only about one third of the vessels it once did. There have been disasters in connection with this pursuit. The captures by the English in the war of 1812, the captures by rebel cruisers, and the loss of the Arctic fleet were heavy blows. Natural causes, which need not be mentioned, have led to its depression, almost to its downfall. But the historical fact which interests us is that New Bedford has been built up by the whale fishery. A large share of the wealth of today comes from this source. It has made our community what it is.

The record is one of which any city may be proud. This large accumulation of wealth has been obtained by

the well directed enterprise and persevering industry of the people of New Bedford, and belongs to the people of New Bedford. The capital of nonresidents has not aided us. It has been drawn from the broad fields of the ocean with much toil and manifold dangers; with perils from the ice and fogs and storms of frozen regions, and exposure and disease under the hot burning sun of the equator. It has been a creation of wealth by the skill of the merchant and the hardy daring of the sailor, and not a mere exchange of wealth. Without surveys of the seas and bays which it made its cruising grounds, for our brave seamen went in advance of exploration, without bounties, without aid from government, but contributing largely to it in its consumption of dutiable articles, and overcoming European competition, the people of New Bedford obtained the control of the whale fishery, and made their city the great whale oil market of the world. Few parallels can be found in this or any country of such successful enterprise.

But long before the decline of the whale fishery it became apparent to our citizens that this industry could not furnish a sufficient field for our capital and enterprise, and that New Bedford must look to other employment for growth and progress. Commercial New England was yielding to manufacturing New England, and New Bedford, not relinquishing her control of the whale fishery, sought to add the machinery of the manufacturer. The first really efficient move in this direction after the Cordage Factory, was the establishment of the Wamsutta Mills. This occurred in 1848, with a capital of \$160,000,

and 15,000 spindles ; increased from time to time until it has reached a capital of \$2,500,000, with 153,000 spindles, an annual product of twenty millions of yards of cloth, and a disbursement of \$650,000 for labor.

This manufacturing enterprise has proved a success, as its growth and large dividends attest. The honor and credit attaching to it are largely due to our venerable fellow-citizen, Hon. Joseph Grinnell, who through its whole existence has been its president and its guiding spirit. It is his prudent management and business sagacity, and also that of Thomas Bennett, for many years the agent, in directing the manufacture of the highest standard of cloth, and their unrelenting and undeviating requirement of perfect work and honest labels, that have given to the product of these mills a world-wide reputation.

Other manufacturing enterprises have followed, the Potomska Mill, Gosnold Mills, the Copper Works, the Morse Twist Drill Works, and many more under the auspices of individual capital and management.

But there are other interests connected with our city. As a community, we have been devoted to business, and hence I have dwelt largely upon our industrial pursuits. The great problem of life, however, is not in the accumulation of wealth, the fitting of ships, or the building of factories. In the intellectual and moral development of a people we find the highest evidences of greatness. New Bedford points to her public school system, to her Free Public Library \* — the first ever organized under munici-

\*The appendix contains some details in relation to our public schools and the Free Public Library which could not be given in the address.

pal sanction on this continent, — to her many organizations of philanthropy and reform, and to her numerous churches well sustained, laboring in a liberal spirit of cooperation for the moral and religious welfare of the people. The march of a hundred years in these higher duties shows an advance more wonderful than that which has attended our material growth.

I have spoken of the men who have been our leaders in business. There are others whose names ought not to be forgotten. John Brewer, Thomas A. Greene, and John F. Emerson, faithful teachers in mental instruction ; John Mason Williams, the pure-minded jurist ; Thomas Mandell, whose life was one of practical benevolence ; Timothy G. Coffin, Thomas D. Eliot, and John H. Clifford, eminent in the law ; and that long list of divines, Samuel West, ORVILLE DEWEY, Ephraim Peabody, James Austin Roberts, GEORGE L. PRENTISS, John Girdwood, and MOSES HOW, who faithfully and tenderly have led this people in the ways of holiness.

Beautiful, indeed, for situation, is this city of New Bedford. Few places are there on this continent, or elsewhere, which so well unite the institutions, benefits and advantages of the city with the freshness and simplicity and comfort of rural life. Lying between green pastures, on the one hand, and the still waters of the river on the other, fronting upon this bay which is as charming as the Bay of Naples, and rising with the elevation of conscious pride from its shores, its physical condition and position are delightful beyond exception. We rejoice to observe and remember that those who have shaped its outward

fortunes have been studious to make it attractive and healthful, as the home of a cultured and enlightened people. Its well made and well kept avenues and streets, shaded by long lines of trees which our fathers have planted; its complete and cleanly drainage, which the incoming and outgoing tides make perfect and efficient; its abundant and pure water distributed and available for all the purpose of domestic, mechanical, and protecting use; its trained, alert, and electric fire department; its well diffused system for gas lighting; its schools, its churches and chapels, and bethel; its hospital, its home for orphans, its many unions of hearts and hands for good works; its comfortable and pleasant homes after the best methods of New England life, combine to make this municipality worthy of our best affections, and of our constant effort for its prosperity and peace.\*

We celebrate today the centennial birthday of our independent national existence. The republic was born amid the smoke and fire of battle, and at the cost of the blood of patriots. It achieved its place among the nations of the earth through the grim desolation and prolonged sacrifices of war, and, ordained of God, it entered upon its destiny as a government of liberty and free institutions. It has survived the perils of outward violence, and the wild storms and bloody conflict of internal strife. It has grown from three millions of people to forty-four millions; from a few scattered colonies it has become an empire reaching from ocean to ocean, and bounded on the

\*Some interesting statements in relation to the finances of New Bedford and its appropriations, valuation and amount and rate of taxation, will be found in the appendix.

one hand by perpetual snows, and on the other by perpetual verdure.

We remember with pride the sacrifices and self-denial of the men of Bedford in 1776, and the losses sustained and greivous burdens borne by them in the war of the revolution. A feeling of deep sadness mingles with the pride with which we recall the noble army which New Bedford sent to the war of the rebellion, and many of us will carry to our graves a heavy sense of loss and grief for those who never came back to us.

The son of New Bedford who one hundred years hence may review the history of his city, will with proud satisfaction dwell upon the loyalty of this people and the contributions made by them in men and money for the preservation of the Union. The Roll of Honor bears the names of 3200 men furnished by New Bedford to the army and navy, being 1110 more than her quota under all the calls made upon her. Some of those names will never disappear from our history, for they gave their lives in patriotic devotion to their country. RODMAN, HOWLAND, BROWN, ALMY, and many others,\* born and reared

\* See "Roll of Honor" in the appendix.

Gather for the sacred roll!  
For the pedestal of fame!  
Deep upon the undying scroll  
Grave each dear and honored name.  
Place the noble RODMAN's name  
High upon the stone ye rear—  
On the obelisk of fame  
Youthful HOWLAND follows near.  
BROWN, whose sable brothers wept  
When their gallant leader died;

BLAKE, who well his station kept,  
Firm his well played guns beside.  
"Yield or die!" "I never yield!"—  
Yielding not, the fearless NYE,  
On his country's battle field,  
For his country dared to die.  
WATSON, FRANCIS, OTTIWELL!  
See an honored place for you;  
ALMY, KEMPTON, here as well:  
All to God and country true.

Their country's martial garb they wore,  
Their country's loved commission bore,  
And through all time the enduring shaft shall tell,  
They for their country fought, and for their country fell.

[From the Ode spoken at the dedication of the Soldiers' and Sailors' Monument, July 4th, 1866.]

upon our soil, are enrolled among the martyrs who died that our flag might still wave a symbol of freedom and the equal rights of all mankind.\*

The memory of the heroism and the patriotic devotion of those who struggled for our independence, and of those who gallantly contended for the preservation of the national union, stirs our blood and arouses our emulation. We remember the brave men who would not be trampled on by tyranny, and the loyal men who suffered to perpetuate free institutions. We cannot forget the record, and we ought not to forget it. It inspires us with faithfulness and determination to meet the needs and requirements of the coming age; it stimulates us to labor strenuously for the highest welfare of our country, believing that America holds in trust the destinies of the world. We are descended from a noble ancestry. We are proud of their achievements, and their history incites us to effort. Our birthright, this inheritance of the principles and sentiments which have made the republic great, imposes upon us grave responsibilities.

\*There was appropriated and expended on account of the war by the municipal authorities \$177,000, in addition to \$125,495.85 expended during the four years by the city for state aid to the families of volunteers, and which latter sum was afterwards refunded by the Commonwealth. The loyal women of New Bedford met on the 18th day of April, 1861, six days after the firing on Fort Sumter, and the day before the first blood was shed in Baltimore, and organized for the work of the relief of those sorrows and sufferings which they knew must come. They donated upwards of \$20,000 in money, and \$10,000 in cloth, flannel and hospital stores. In addition, "The Society for the Comfort and Relief of our Soldiers in Hospitals" furnished many thousands of dollars in value of supplies for the sick and wounded.

In 1860 our population was 22,300. In 1865 it was 20,863. The assessed valuation of property in 1860 was \$24,198,138, while in 1865 it had decreased to \$20,525,790. These figures show the heavy losses of the war, and the sacrifices made by the men of this generation for the preservation of the Union. The story of "New Bedford in the Rebellion" demands a volume of itself. Some further details are given in the appendix.

We must preserve the results of the past. But this is not our whole duty. The work of our fathers is not completed. Our honor and safety is in still further achievements of public justice and orderly freedom, and in the advancement of the common welfare. Our mission is a continuous and steady development of conscientiousness, a moral and religious growth, keeping pace with advancing intelligence, science and liberty. We attain to it by those common virtues which our fathers exercised: honesty, frugality, integrity, and unfaltering devotion to duty. We need but follow the old plain paths, and, undazzled by the superficial glitter and pretentious show of ambitious self-seekers, march steadily forward to the attainments of a trained and vigorous virtue, to purity, strength, and solidity. Thus will we keep unsoiled our inheritance, and transmit it, beautified and glorified, to those who come after us.

We have seen the forest fall before the strong arm of the pioneer; we have seen the shores lined with masts, and the waters white with sails; we have seen the triumphs of restless, cunning labor; but not in physical power nor in populous cities, not in factories nor palaces, nor richly laden fleets, are the elements of national greatness, nor its safety, but in the courage, integrity, self-denial, and temperance of the people, and the spirit of mental enterprise and moral freedom which inspires them.

### DEED

FROM WESAMEQUEN AND WAMSUTTA TO WILLIAM BRADFORD  
AND OTHERS.

Bradford Governour.

1654. A DEED APPOINTED TO BE RECORDED.

NEW PLYMOUTH, November the 29th, 1652.

Know all men by these presents, that I, Wesamequen, and Wamsutta my son, have sold unto Mr. William Bradford, Captain Standish, Thomas Southworth, John Winslow, John Cooke and their associates, the purchasers or old-comers, all the tract or tracts of land lying three miles eastward from a river called Cushenagg, to a certain harbour called Acoaksett, to a flat rock on the westward side of the said harbour. And whereas the said harbour divideth itself into several branches, the westernmost arme to be the bound, and all the tract or tracts of land from the said westernmost arme to the said river of Cushenagg, three miles eastward of the same, with all the profits and benefits within the said tract, with all the rivers, creeks, meadows, necks and islands that lye in or before the same, and from the sea upward to go so high that the English may not be annoyed by the hunting of the Indians in any sort of their cattle. And I, Wesamequen, and Wamsutta, do promise to remove all the Indians within a year from the date hereof that do live in the said tract. And we, the said Wesamequen and Wamsutta, have fully bargained and sold unto the aforesaid Mr. William Bradford, Captain Standish, Thomas Southworth, John Winslow, John Cooke, and the rest of their associates, the purchasers or old-comers, to have and to hold for them and their heirs and assigns forever. And in consideration hereof, we the above-mentioned are to pay to the said Wesamequen and Wamsutta as followeth: *thirty yards of cloth, eight moose-skins, fifteen axes, fifteen hoes, fifteen pair of breeches, eight blankets, two kettles, one cloak, 2£ in wampan, eight pair*

\*

*stockings, eight pair of shoes, one iron pot, and ten shillings in another comoditie. And in witness hereof we have interchangeably set to our hands the day and year above written.*

In the Presence of

JONATHAN SHAW.

SAMUEL EDDY.

JOHN WINSLOW.

JOHN COOK.

WAMSUTTA. His MM mark.

[The above is a copy of the deed as found in Ricketson's History of New Bedford. It agrees with a copy in the "Proprietors' Records," book 4, p. 1.]

## II.

### ORDER OF INCORPORATION OF THE TOWN OF DARTMOUTH.

[Extract from the Plymouth Colony Records.]

1664.

June 8. Att this Court, all that tracte of land called and known by the name of Acushena, Ponagansett and Coaksett, is allowed by the Court to bee a townshipe: and the inhabitants thereof have libertie to make such orders as may conduce to theire good in towne consernments; and that the said towne bee hencforth called and knowne by the name of Dartmouth.—[Fourth Book Court Orders, page 72.]

## III.

## TERRITORIAL LIMITS OF DARTMOUTH.

Dartmouth was thus described in the original grant: "A tract or tracts of land known by the name of Accushena, alias Aquset, entering in at the western end of Nakata, and to the river Cookset, alias Ackees, and places adjacent, the bounds of which tract fully extend three miles to the eastward of the most easterly part of the river or bay Accushenah aforesaid, and so along the sea-side to the river called Cookset lying on the west side of Point Pirril, and to the westernmost side of any branch of the aforesaid river, and extending eight miles into the woods with all marshes, meadows, rivers, waters, woods, and appurtenances thereto belonging."—[Baylies' New Plymouth, part II, p. 231.]

---

## IV.

## THE RUSSELL FAMILY.

BY WILLIAM T. RUSSELL.

[There are, it is believed, one or two errors in the dates given in this account, but it has been thought best to give it as it was prepared by the writer in 1844.]

John Russell was one of the original proprietors of the town of Dartmouth, and the first of the name of whom we have any knowledge, that settled in this part of the country. About 1650 he removed from Taunton and established an iron foundry at Russell's Mills in Dartmouth, in company with Anthony Slocum. In 1654 John Russell represented the town of Dartmouth at the Old Colony Court in Plymouth.

There is a record of a confirmatory deed of land to John Russell from William Bradford, governor of the colony, in 1694.

Joseph Russell, Senr., son of the aforementioned John Russell, and great-great-grandfather of the present generation, settled within what is now the limits of the town of New Bedford, at what time is not known, but previous to 1711. His house stood near the site of the

stone house known as the Tyson house, and now owned by H. G. O. Colby. The original well which belonged to his house is now in the cellar of the Tyson house, and is still in use. Of his birth or death we have no records.

Joseph Russell, Jr., son of the aforementioned Joseph Russell, Senr., lived on County street near the little school-house opposite John C. Haskell's. This house was standing within the memory of some of the oldest inhabitants; and his well is still remaining in the school-house yard.

There is a record of a confirmatory title to Joseph Russell, Jr., of this homestead, dated 25th May, 1711, signed by Samuel Hammond, Benjamin Hammond, and Benjamin Crane, surveyor, "her Majesties [Queen Anne's] Justices of the Court of Quarter Sessions for the county of Bristol." One of the sons of Joseph Russell, Jr., was the ancestor of the Seth Russell branch of the family of Russell.

Joseph Russell, son of the aforementioned Joseph Russell, Jr., and grandfather of the present generation, was born 8th Oct., 1719, and died 16th Oct., 1804. His house stood on the County road, between the court house and Charles W. Morgan's house.

He first established the whale fishery in New Bedford. In the earliest stages of that business, sloops only of 40 or 50 tons were employed. These vessels ventured out to sea in the Summer months only, and no further than the Capes of Virginia and Cape Hatteras, and took especial care to return in port before the equinox gales in September. They were generally successful in taking sperm whales, and brought home the blubber and tried it out on shore.

As their experience increased, larger vessels were employed, and they ventured as far as the Bay of Mexico; and finally, during his life, ships ventured round Cape Horn to the Pacific ocean for sperm whales.

Joseph Russell first established a sperm oil factory in New Bedford. The building stood on the north side of the square, foot of Centre street. The act of refining spermaceti in those days was known to but few, and kept by them a profound secret. Joseph Russell employed a Mr. Chaffee for a number of years, at a salary of \$500 a year, to do his refining,—an enormous sum for those days. While at work, Chaffee was shut up by himself, that no one should steal his wonderful art.

Joseph Russell was a shrewd, enterprising man. At one time he carried on quite an extensive mercantile business. In 1770, in partnership with his son Barnabas, he owned, in addition to several whaling vessels, several vessels trading to southern ports and the West India islands.

They kept a store at the foot of Centre street, and imported their goods from London by the way of Boston, and their West India goods in their own vessels, and up to the time of the revolutionary war their

business was in a very prosperous state. The war put an end to their prosperity. Their vessels were taken, and their losses by the depreciation of the continental paper money left them, at the close of the war, but little besides their real estate.

The Russells and Kemptons were the original proprietors of the land comprising the limits of the town of New Bedford as it is at the present day. Their tract together extended from near Clark's Cove, and running north to somewhere about Smith street, and from the river, west, indefinitely to undivided lands, as appears by a confirmatory title to Joseph Russell, Jr., by "her Majesties Justices of the Court of Quarter Sessions for the County of Bristol," dated May 25th, 1711; and a similar title to Manasseh Kempton, dated 31st May, 1711. The division line between Joseph Russell, Jr., and Manasseh Kempton, was between William and Elm streets, and running west from the river to undivided lands.

Joseph and Caleb Russell, sons of Joseph Russell, Jr., inherited the above described tract of land, extending from the hill north of Clark's Cove on County road, and running north to between William and Elm streets, and from the river, westerly, to about a mile west of County road.

Their division line was between Bedford and Russell streets (a part of the division wall is still remaining,) Joseph having the north part and Caleb the south part. Caleb Russell was the grandfather of the present Reuben Russell, and father of the Joseph Russell who settled in Boston and was in business there under the firm of Jeffrey & Russell.\*

The original proprietors of land on the west side of the Acushnet river, beginning at Clark's Point and following the County road to the Head of the River, were taken in rotation as follows :

First. — Benjamin Allen, who owned the whole of Clark's Point, and as far north as the brow of the hill on County road, leading down to Clark's Cove.

Second. — Joseph Russell, Senr.

Third. — Joseph Russell, Jr. Father and son, they were both living in 1711. They were at that date proprietors of all that part of New Bedford south of William street, and from the river west.

Fourth. — Manasseh Kempton.

Fifth. — ——— Willis.

Sixth. — Stephen Peckham was a large proprietor. His tract included Rodman's, Coggeshall's, Tallman's, and Timothy G. Coffin's farms, as they are at the present day.

Seventh. — John Hathaway.

\* See "Stars and Stripes in the Thames."

Eighth. — ——— Wrightington, who owned about the Head of the River, including the present village of Acushnet, on both sides of the river. The Swifts purchased of the Wrightingtons.

Joseph Rotch, the grandfather of the present William Rotch, removed from Nantucket to New Bedford a few years previous to the revolutionary war, and purchased of Joseph Russell about twenty acres of land, which included the present Rotch's wharf, and running west to Purchase street of an unequal width. He wanted more land on the shore of the river than Joseph Russell was willing to part with, and made his *first* purchase of land on the east side of the river, with a view of settling there, but finally acceded to Joseph Russell's terms. A part of that land in Fairhaven is still in possession of the Rotch family. There is a record of the burial of Joseph Rotch, 27th Nov., 1785.

Joseph Rotch gave the name of New Bedford to the town, or first proposed it should be called Bedford; but ascertaining there was already a Bedford in Massachusetts, it was named by way of distinction, New Bedford.

December, 1844.

---

V.

PRIMITIVE WHALING.

[Under the head of "Whaling," I find in Richard A. Pease's valuable "Historical Sketches of Martha's Vineyard," the following extracts from the records of the town of Edgartown in relation to the primitive methods of whaling.]

November 11, 1652. Thomas Daggett and William Weeks are whale cutters for this year. Voted the day above written.

April 13, 1653. Ordered by the town that the whale is to be cut out freely, four men at one time, and four at another, and so every whale, beginning at the east end of the town.

April 15, 1690. Voted by the proprietors of the whale that Mr. Sarson and William Vinson are to oversee and order the cutting and sharing of all whales that shall be cast on shore within the liberty or

bounds of Edgartown: and they to have as much for their care as one cutter.

Martha's Vineyard, February 19, 1692. The proprietors of the drift whale at Edgartown, being met upon occasion of a whale marked on their beach, seized by Benjamin Smith and Mr. Joseph Norton, in their behalf, yet claimed by John Steel, harpioneer, on a whale design, as being killed by him; which occasioned a contract about said whale between said parties, about cutting and securing the said whale; the proprietors accepting of said contract, have and unanimously agree that the contract be ratified and confirmed; and that Richard Sarson, Esq., and Mr. Benjamin Smith, in behalf of the proprietors, take the same into their custody, and preserve the said whale by trying and securing the oyl, and disbursing as they find needful; and that no distribution be made of the said whale, or effects, till after fifteen days are expired after the date hereof, that so such persons who may pretend an interest or claim, in the whale, may make their challenge; and in case such challenge appear sufficient to them, then they may deliver the said whale, or oyl to such challenger; otherwise to give notice to the proprietors, who may do as the matter may require. This agreement was ordered to be entered by them, the day and year above written.

Per me, THOMAS TRAPP, Clerk.

Martha's Vineyard, 1792-3. The marks of the whales killed by John Butler and Thomas Lothrop. One whale lanced near or over the shoulder blade, near the left shoulder blade only; another killed with an iron forward in the left side, marked W.; and upon the right side, marked with a pocket knife T. L.; and the other hath an iron-hole over the right shoulder blade, with two lance-holes in the same side, one in belly. These whales were all killed about the middle of February last past; all great whales, betwixt six and seven and eight foot bone, which are all gone from us. A true account given by John Butler from us and recorded.

Per me, THOMAS TRAPP, Clerk.

[From the Old Colony Records.]

A proposition ordered to be recorded, which was sent vnto the four towns, viz., Sandwich, Yarmouth, Barnstable, and Eastham, by order of the Court held att Plymouth, October the first, 1661, as followeth, signed by Constant Southworth, Treasurer.

Loueing Frinds: Wheras the Generall Court was pleased to make some propositions to you respecting the drift fish or whales; and in-case you should refuse their proffer, they impowered mee, though vnftit, to farne out what should belonge vnto them on that account;

and seeing the time is expired, and it faales [falls] into my hands to dispose of, I doe therefore, with the advise of the court, in answare to your remonstrance, say, that if you will duely and trewly pay to the country for every whale that shall come, one hogshead of oyle att Boston, where I shall appoint, and that current and marchantable, without any charge or trouble to the countrey, — I say, for *peace and quietnes sake*, you shall haue it for this present season, leaueing you and the Election Court to seetle it soe as it may bee to satisfaction on both sides; and incase you accept not of this tender, to send it within fourteen days after date heerof; and if I heare not from you, I shall take it for graunted that you will accept of it, and shall expect the accomplishment of the same.

Yours to vse,

CONSTANT SOUTHWORTH,

Treasu.

1661.

1 October.

Prence,

Gou<sup>r</sup>.

The agents for the towne of Yarmouth appeering att this Court, according to agreement, to debate and determine a difference between them and others about whales, were desired by the Court to giue in thire result concerning that matter vnto the Court, as being that wheronto they would stand; who gaue in theire answare as followeth:

The sixt of the first month, 61-62.

Right Wor<sup>sh</sup>: Wee intreat your worshipes reddily to accept these few lines for a positiue answare, to which wee promise to stand: that the Treasurer shall haue the two barrells of oyle out of each whale, according to his proposition made vnto vs for the yeare past, soe as there may bee a full end of what troubles hath formerly past about it.

Witness our hands.

ANTHONY THACHER.

ROBERT DENIS.

THOMAS BOARDMAN.

RICHARD TAYLOR.

1661-2.

4 March.

[Prence Gouvernor.]

In reference vnto a whale brought on shore to Yarmouth from sea, the Court leaues it to the Treasurer to make abatement of what is due to the countrey therof, by law, as hee shall see cause, when hee treated with those that brought it on shore.

1672.

1 July.

Prence Gou<sup>r</sup>.

[The reader of these early whaling records will be reminded of that vivid picture of primitive whaling which Walter Scott has given us in his romance of the pirate. The distribution of the rich and

coveted yield of the stranded leviathan upon the shore of the Orkneys was not, however, regulated by the law of the land, but by the law of the strongest. "Pit yoursell forward, man," said the saving sister of the timid Triptolemus, "there's a graip to ye — faint heart never wan fair lady, a pint of the creature's ulzic wad be worth siller in the lang dark nights — wha kens but what it may eat weel enough and spare butter?" ]

## VI.

### MEMORANDA IN RELATION TO THE WHALE FISHERY AND THE COMMERCE OF NEW BEDFORD.

BY ABRAHAM SHEARMAN, JUNIOR.

The whale fishery appears to have been carried on from Cape Cod prior to its prosecution from any other part of America.

In the year 1680 [1690?] a Mr. Paddock from Cape Cod came to Nantucket to instruct the English how to whale in boats from the shore, which business continued good till 1760, when it became poor by the scarcity of whales. In the spring of 1726, there were *eighty-six* whales caught here. One Mr. Loper previous to this was engaged in the business, but not to any amount worthy of record.—[Nantucket Inquirer.]

The "Mr. Loper" above referred to was also from Cape Cod, and a copy was recently published of his agreement with the inhabitants of the island to prosecute the business from their shores. This was in the year 1672.

In the year 1770 there were employed in the whale fishery from Nantucket, *one hundred and twenty-three* sail of vessels, sloops, schooners, and brigs, making about *ten thousand tons*, and navigated by about *sixteen hundred men*. From Sept. 11th to Oct. 25th they all arrived in port, having been absent from *four to six* months, and landed *fourteen thousand and fifty-eight* barrels of oil. There are now living [March 28, 1822] ten of the captains that were in said fleet.—[Nantucket Inquirer.]

The whale fishery was at first carried on in boats from the island. Right whales only were obtained in this way.

In the year 1759, when S. Paddock first went to Nantucket, (and for a few years prior to the French war, which commenced in 1756,) voyages were made to the eastward of Grand Bank. Vessels generally made two trips to the southward, between George's Bank and the Capes of Virginia, and then went to the Bank.

Voyages were afterwards extended to the Western Islands, Cape de Verds, and Coast of Africa.

It was not till after the termination of the French war in 1763, that our vessels made voyages to the Straits of Belle Isle and River Saint Lawrence. Large whale had been seen there by a Nantucket man when on board an English vessel of war, which led to their pursuit in that quarter.

Sperm candles were first manufactured at Newport and Providence.

#### LIST OF SQUARE-RIGGED VESSELS BELONGING TO NEW BEDFORD NOVEMBER 7TH, 1803.

[This was eight years before Fairhaven was set off from New Bedford.]

## MEMORANDA IN RELATION TO THE EARLY HISTORY OF NEW BEDFORD.

BY ABRAHAM SHEARMAN, JUNIOR.

[The following are copied from a manuscript prepared by Abraham Shearman, Junior.]

NEW BEDFORD, 11 mo. 30, 1821.

To gratify that species of curiosity, which seems naturally to lead the human mind to trace the origin and early incidents of smaller communities as well as of nations, I avail myself of the recollections of an aged and intelligent citizen\* now in his 79th year, to record some particulars of the first settlement of New Bedford, in connection with some account of the whale fishery to which it owed its origin, and has been principally indebted for its prosperity.

The township of Dartmouth, in its original extent, as purchased of the good old Massasoit in 1652, and as it remained till divided in 1787, embraced an extent of 20 miles of sea-coast, without including the shores of its harbours, of which Accushnet, Aponeganset, and Acoaxet were its principal.

In the year 1751, when our informant was nine years of age, there were two or three vessels from Aponeganset river, in the whale fishery, the owners of which, John Wady and Daniel Wood, he well recollects; and he thinks there were one or two from Acushnet, the west side of the river, and perhaps one or two from the east side, the former owned by Joseph and Caleb Russell.

Whales were then principally taken on what was called the Southern ground, between George's Bank and the Capes of Virginia, and voyages were of four to six weeks' continuance; but the fishery was about this time extended to the Grand Bank of Newfoundland, or rather to the eastward of it, and the voyages lengthened to three months.

Previous to the year 1760, more vessels were fitted from Aponegan-

\* John Howland, who gave Mr. Shearman much of the information contained in his statement, and who came to Acushnet in 1765, sailed from that part of Dartmouth as early as 1760. He became a shipmaster, and was engaged in both the whaling and trading branches of commerce. He was owner of the ship *Fame* contained in Mr. Shearman's list of our merchants' marine in 1803. His journal, which I have recently examined, contains very full accounts of his early whaling voyages. The house in which he lived and died is still standing, and is the second on the west side of Water street, south of School. He was much interested in our town affairs, and highly useful in the transaction of the public business. He was the father of John Howland, Jr., and the Hon. James Howland, 2d, for many years successful merchants under the firm of Jno. & Jas. Howland. At the time of its dissolution it was, I believe, the oldest business firm among us. The Hon. George Howland, Jr., of this city, is his grandson.

set than from Accushnet river; but the latter having the advantage of a better and more convenient harbour, now began to attract the attention of men of business. Our informant was early engaged in a seafaring life from Aponeganset, and mostly in the fishery. The vessel to which he was attached fitted in the year above-mentioned, from what was afterwards called Bedford, on Accushnet river, and he thinks was the first vessel, now owned by persons in its immediate vicinity, that came there to fit out. The present site of the town was then a forest, through which a rough cartway led to the shore, and a try-house was the only building other than the farm houses on the County road.

There were then standing on the County road the houses of Joseph Russell, Caleb Russell, Ephraim Kempton, and Samuel Willis, which are still remaining [1821]; also a house that belonged to Joseph Russell, father of Joseph and Caleb, which stood a little to the south of the house now occupied by William R. Rotch,\* near a well which is still in use. The site of a house that belonged to Joseph Russell, father of the last mentioned, may still be traced on the east side of the road, near the former mansion of Caleb Russell.

In the winter of 1760, John Loudon † purchased of Joseph Russell an acre of land (the first lot that was sold from his homestead farm) a few rods south of what is now called the Four Corners ‡; on which he erected a house in the summer of 1761. His object was to carry on shipbuilding. His own trade was that of a calker.

In the spring of the same year, Benjamin Taber § purchased a lot

\*The house named by Mr. Shearman as occupied by William R. Rotch, is now the beautiful residence of Dr. Edward P. Abbe.

† John Loudon, the first purchaser of a village lot from Joseph Russell, at one time kept a tavern. His house was burned by the British. He has a granddaughter and great-grandson now residing here.

‡ The FOUR CORNERS (the intersection of Main and Water streets) was for many years the centre of business. The stone post at the northwest corner will be remembered by many who will probably read this.

§ Benjamin Taber's first shop and dwelling was a building, situated on a lot north of the residence of Samuel Rodman, Senn., now the bakery of Mr. Snell. It was moved there from the shore of the river, where it had been occupied for some purpose connected with the whaling business. He afterwards bought a lot on the north side of Main street, below Water, and another adjoining the east end and north of the first purchase. He was the builder of the first whaleboat in the village; was a prosperous mechanic, when in 1778 the raid of General Gray laid all his buildings in ashes. His son Daniel was the first male child born in what was afterwards called the village of Bedford. Taber's wharf is built out from that part of his purchase under the deed of Joseph Russell, and his descendants own a large part of it. He had five children and a step-child, all but one of whom lived at one time on the north side of Union street, on the property I have described. It is a noticeable fact that in the "Account of the Old Men of New Bedford," recently reprinted in the New Bedford Mercury from the Boston Herald, are found the names of four of Benjamin Taber's grandchildren, and the husband of his step-daughter's child. No two of the four are brothers.

of land farther north, and built a shop for the purpose of carrying on the boat-building and block-making business, at which he had served an apprenticeship at Nantucket.

The same year, 1761, John Allen, a house-carpenter, purchased a lot of land on the south side of Prospect street,\* on which he built a house afterwards sold to Barzillai Myrick, a ship-carpenter.

In 1762, Gideon Mosher, who was also a mechanic, purchased a lot of land and built a house on the north side of Prospect street; which he afterwards (1765) sold to Benjamin Taber.

John Allen's lot was four rods wide, and extended from the Four Corners to the water, the same on which Pinkham's Inn† and other buildings now stand. Gideon Mosher's lot was of the same width, on the north side of the street. It was sold by him to Benjamin Taber, who at the same time purchased four rods adjoining to it on the north, and extending, with the other, to the water.

In December of the same year, 1762, Elnathan Sampson, of Wareham, purchased a lot of land bounded south on land previously sold to John Loudon, and "north and east on land left for ways or streets." These "ways" or "streets" were what are now called the Main or Union, and Water streets. The lot (the same that is now owned by the widows Patty Hussey‡ and Ruth Ross) was eight rods in length from east to west, and four rods wide, and was purchased for £6 13 4. Less than one third of its front on Union street was leased the last year on an annual ground rent of ninety dollars. E. Sampson was a blacksmith.

Thus was the infant settlement begun by industrious and enterprising mechanics; and it appears from the phraseology of the deed above referred to that it was then expected it would in time assume the character of a town.

Capital, however, was still wanting to give activity to business; but this was soon after supplied to a very considerable extent by the acquisition of an enterprising merchant, Joseph Rotch § of Nantucket,

\*That part of Union street east of Water.

†Pinkham was from Nantucket. The building in which he kept his tavern belonged to the Nash family. It had been occupied as a tavern before for many years by Joshua Crocker. This property was on the southeast corner.

‡Patty (Martha) Hussey was the daughter of Elnathan Sampson. She kept a dry goods store in her house on the southwest corner of the "Four Corners," which was very popular. Her daughter, a resident of our city, is, I believe, the owner of this property. At one time there was no dry goods store west of Water street.

§ Joseph Rotch went to Nantucket early in the eighteenth century. He, too, was a mechanic; but he soon became a leading man and merchant of the town of Sherburn. Two of his sons are connected with the early history of New Bedford. Francis was here and in company with his father. I find "Joseph Rotch & Son" assessed in Cushman in 1773, real estate £570, personal £630.

In 1778 Joseph Rotch had returned to Nantucket. His son Francis remained here

who in 1765, after examining several different situations, fixed on this as an eligible port for the prosecution of the whale fishery. He made a purchase of ten acres of land, in one body, besides a number of smaller lots in different parts of the town, and removing hither himself his business from Nantucket to the Acushnet. To him the village was indebted for its name. The property of the soil being in the Russell family, and that being the family name of the Duke of Bedford, he gave it the name which it has since continued to bear.

---

### VIII.

### THE TEN ACRE LOT.

DEED FROM JOSEPH RUSSELL OF DARTMOUTH TO JOSEPH ROTCH  
OF SHERBURN.

Know all Men, That I Joseph Russell of Dartmouth in ye County of Bristol, in ye Province of ye Massachusetts Bay in New England, yeoman, in consideration of Two Hundred and one pound seven shillings and sixpence to me in hand paid by Joseph Rotch, of Sherburn in ye County of Nantucket and Province afores'd marchant; the receipt whereof I do hereby acknowledge and myself fully satisfied and paid; have given, granted, bargained and sold; and do by these pres-

and was connected in business with Leonard Jarvis. From the "Acushnet Tax Bill" of that year I find that "Rotch and Jarvis" were taxed,

|              |         |
|--------------|---------|
| Real estate, | £4,100  |
| Personal,    | 13,000  |
|              | <hr/>   |
|              | £17,100 |

By far the largest tax paid in Bedford was assessed to this firm.

Joseph Rotch returned to New Bedford and died here. Francis and William went abroad; the latter returning to this country in 1795 and becoming a resident of our town, which had recently been incorporated. Francis resided abroad until about 1811, when he too came to New Bedford. These brothers were both remarkable men, and there is much in the history of both to interest and instruct. Francis left no children. His brother, the elder William Rotch, who died here in 1828 in his 94th year, left many children. From these two, William Rotch, Jr., and Elizabeth Rodman, have sprung all the descendants of Joseph Rotch of Sherburn now resident among us. Seven generations of the family have lived upon the soil of New Bedford.

ents fully and absolutely give, grant, bargain, aliene, enfeof & confirm unto him ye s'd Joseph Rotch, his heirs and assigns, a certain piece or parcell of land scituate, lying and being in Dartmouth afores'd and at ye foot of my homestead farm, containing Ten acres and eleven rods by estimation be ye same more or less buted and bounded as followeth that is,

Beginning at a stone set in ye ground near the beach a south westerly or elbow bounds of William Maccomber's house lot and from thence East thirty degs. northerly to ye river; then again from ye s'd stone before mentioned and from thence west ten rods and two fifths of a rod to a stone set in ye ground ye southwest corner bound of ye s'd William Maccombers lot: and from thence North in s'd Macomber's line four rods and seven tenth parts of a rod to ye line of William Kempton's land; from thence in s'd Kempton's line fifty nine rods to a heap of stones from thence South twenty two rods to a heap of stones a little to ye southward of a little spring brook and from thence east thirty four degrees Northerly two rods to a heap of stones on ye north side of s'd brook; and from thence east eighty rods and one fifth part of a rod to a stone set into ye ground about one rod west from ye west side of ye Try house and from thence two rods and three quarters of a rod to a ledge of rocks and from thence East to ye river, running into s'd river by ye south side of a great ledge of rocks, this land bounds Easterly by ye river and ye head of William Macomber's lots Northwardly by s'd Macomber's and said Kemtons land, southwardly and westwardly by my own lands.

Also the priveledge of a drift way from ye same to ye open way that goes by my house in Common with ye other people that have bought lots at ye foot of my s'd Homestead. Together with all ye priveledges & appurtenances thereof.

To Have and to Hold to ye s'd Joseph Rotch his heirs and assigns as \* \* \* inheritance in fee simple forever. And I the s'd Joseph Russell, do hereby avouch myself to be the sole lawful owner of ye bargained premises and am lawfully seized and that they are free of all incumbrances whatsoever and I also hereby for myself my heirs, excs. & adms., covenant with ye s'd Joseph Rotch his heirs and assigns, the granted and bargained premises and appurtenances against ye lawful claims and demands of all persons what so ever to warrant & forever defend, always excepting and reserving the priveledge of a drift way across ye s'd premises for the s'd William Macomber his heirs and assigns to pass and repass in

And Judith Russell the wife of me, ye s'd Joseph Russell doth by these presents, freely and willingly yield up and surrender all her right of dower and power of thirds of, in and unto ye same unto ye s'd Joseph Rotch his heirs and assigns, to hold as affores'd.

In Witness Whereof We the s'd Joseph Russell and Judith Russell

do hereunto set our hands and seals this Twenty eight day of May in  
 ye fifth year of ye Reign of King George the Third Anno Domini one  
 thousand seven hundred sixty five.

## IX.

### THE STARS AND STRIPES IN THE THAMES.

The ships Bedford, Dartmouth, Rebecca, and Maria, have become  
 historical vessels. Their respective claims to this position are now  
 well settled.

For many years it was supposed that to the last, and not the first,  
 belonged the honor of displaying the flag of our country in British  
 waters. The old Maria was long the *flag ship*; and in the newspapers  
 and many less fugitive publications the erroneous story was so often  
 repeated that it assumed the position of a fixed fact.

It was passing strange, that in the face of evidence patent to the  
 world, not only the newspapers, but Mrs. Farrar, a granddaughter of  
 the elder William Rotch, in her *Recollections of Seventy Years*, and  
 Mrs. P. A. Hanaford, in her *Field, Gunboat, Hospital and Prison*,  
 should publish the erroneous statement. "I have often heard the old

gentleman [her grandfather] tell with pride and pleasure that the Maria was the first ship that ever unfurled the flag of the United States in the Thames." When Mrs. Farrar's "Recollections" which contained this declaration appeared, the statement was contradicted through the papers, by the publication of the fact that when the flag was displayed in the Thames in February, 1783, the Maria was lying at the wharf at Nantucket, never having been at sea.

The following extract from Barnard's *History of England*, a rare book, was published at the same time.

"The ship Bedford, Capt. Moores, belonging to the Massachusetts, arrived in the Downs on the 3d of February, passed Gravesend on the 3d, and was reported at the custom house on the 6th instant. She was not allowed regular entry until some consultation had taken place between the commissioners of the customs and the lords of council, on account of the many acts of parliament in force against the *rebels* of America. She was loaded with 487 butts of whale oil, is American built, manned wholly by American seamen, *wears the rebel colors*, and belongs to the island of Nantucket, in Massachusetts. This is the first vessel which has displayed the thirteen rebellious stripes of America in any British port. The vessel is at Horseledour, a little below the Tower, and is intended to return immediately to New England."

These two statements showed beyond question that the Maria *did not*, and that the Bedford *did* first unfurl the flag of the United States in the waters of Great Britain.

In a letter to Hezekiah Barnard, dated at New Bedford 8th mo. 3d, 1842, William Rotch, Jr., thus speaks of the Bedford and her voyage.

\* \* \* "In 1781, Admiral Digby granted thirty licenses for our [Nantucket] vessels to go after whales. I was then connected with my father and Samuel Rodman in business. Considerable oil was obtained in 1782. In the fall of that year I went to New York and procured from Admiral Digby licenses for the *Bedford*, William Mooers master, and I think the *Industry*, John Chadwick master. They loaded. The *Bedford* sailed first, and arrived in the Downs on the 23d of February, the day of the signing of the preliminary treaty of peace between the United States, France, and England,\* and went up to London and there displayed for the first time the United States flag. The *Industry* arrived afterwards, and was, I suppose, the second to display it. The widow of George Hayley, who did much business with New England, would visit the old Bedford and see the flag displayed. She was the sister of the celebrated John Wilkes."

William Rotch, Jr., might have added to his brief notice of Madam Hayley, that a more intimate connection between that remarkable sister of a still more remarkable man, than a visit to the Rotches' ship

\* Mr. Rotch was mistaken in both these dates. The Bedford arrived on the 3d, and the treaty was signed November 30, 1782.

Bedford was at one time contemplated, and was prevented only by an accident. This is not the place to give the romantic story of the marriage engagement between Francis Rotch, the owner of the Dartmouth and the brother of the owner of the Bedford, and Madam Hayley, the widow of Alderman Hayley and sister of John Wilkes, and of its disruption. The lady, however, found a Yankee husband. She married, during a brief visit to Boston, a Mr. Jeffrey, of the firm of Jeffrey & Russell of that city. Mr. Russell was of the Dartmouth family, and our old people have been frequently heard to speak of the sensation which Madame Jeffrey created on the occasion of a visit she made to the relations of her husband's partner in New Bedford.

The ship Maria is more familiar to the people of New Bedford than either of the others. She was built for a privateer at Pembroke, Massachusetts, in 1782. She was purchased by William Rotch and taken to Nantucket. Her first voyage was to London, with a cargo of oil. After that voyage she was employed in the whaling business. She was owned by Samuel Rodman, and the tradition is that she was a bridal present from his father-in-law Rotch on the occasion of the marriage of his daughter to Mr. Rodman. When the removal of the family to New Bedford took place, the Maria became a New Bedford ship, and remained in the family of Mr. Rodman between fifty and sixty years. It is said that in 1859 there was a balance upon the credit side of her account of \$250,000. Her first whaling voyage ended on the 26th of September, 1795, and she sailed on her last under our flag on the 29th of September, 1859. In 1863 she was sold at Talcahuana, and passed under the Chilean flag. Her end was uncertain. One account states that she foundered at sea in 1870, and another that she sunk in the harbor of Payta.

We would inform the author of "The History of the American Flag," who has given an honorable place to these two historical ships in his interesting volume, that it was *Mr. Hardy Hitch*, and not *Mr. Hardhitch*, who worked upon the sails of the Maria in 1792 and 1856.

"Lady" Hayley, as she was called,  
 owned extensive rope-walks in  
 Boston. Her son Barney, who married  
 the daughter of Harraganuseth, and was  
 her father's grandfather, married her  
 daughter with his own. He after-

## ACT OF INCORPORATION OF THE TOWN OF NEW BEDFORD.

AN ACT FOR INCORPORATING THE EASTERLY PART OF THE TOWN  
OF DARTMOUTH, IN THE COUNTY OF BRISTOL, INTO A  
SEPARATE TOWN, BY THE NAME OF  
NEW BEDFORD.

FEBRUARY 23d, 1787.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same :*

That the lands hereafter described, to wit, beginning at a bridge lying across a stream that runs through the beach by a place called Clark's Cove, thence running northerly as the main branch of the stream runs, till it comes to a little bridge lying across the County road, at the foot of a hill about twenty rods to the eastward of the dwelling-house where James Peckham, deceased, last dwelt; thence northerly on a strait line to Nathaniel Spooner's saw-mill; from thence northerly on the west side of Bolton's cedar swamp, till it comes to the dividing line between Dartmouth and Freetown, near the place called Aaron's causeway; thence east twenty-two degrees and one half north, in the dividing line between said towns to a rock known by the name of Peaked Rock; thence southerly by the County road that leads from Dartmouth to Boston, one hundred and eight rods to the southwest corner of Ebenezer Lewis' homestead farm; thence east about three hundred rods in the dividing line between Rochester and Dartmouth, to a large white pine tree, marked on three sides; thence south six degrees and one half east, in the dividing line between Dartmouth and Rochester to a heap of stones by the sea; thence westerly to the first mentioned bounds; with all the islands heretofore known to be a part of Acquishnot village, with the inhabitants dwelling on the lands above described, be, and they are hereby incorporated into a town by the name of New Bedford; and the said town is hereby invested with all the powers, privileges and immunities to which towns within this Commonwealth are or may be entitled, agreeable to the Constitution and laws of said Commonwealth.

*Provided, nevertheless, and be it further enacted,* That any of the inhabitants now dwelling on the above described lands, who are or may be still desirous of belonging to the town of Dartmouth, shall at any time, within two years from the passage of this act, by returning their names into the Secretary's office, and signifying their desire of belonging to said Dartmouth, have that privilege; and shall, with their polls

and estates, belong to and be a part of the said Dartmouth; they paying their proportion of all taxes, which shall have been laid on the said village of Acquishnot, or town of New Bedford, previously to their thus returning their names, as they would by law have been holden to pay, had they continued and been a part of the town of New Bedford.

*Be it enacted by the authority aforesaid,* That the inhabitants of the said town of New Bedford shall pay all the arrears of taxes which have been assessed upon them, and their proportionable part of what remains unpaid of the beef tax, so called, together with their proportion of all debts that are now due from the said town of Dartmouth, and shall support their own poor.

*Be it enacted by the authority aforesaid,* That the public lands, and the buildings standing thereon, also the town's stock of powder, and other town's property, shall be estimated and divided in the same proportion that each village paid in the last State tax, by committees to be appointed for that purpose, at their annual town meeting in March or April next; and whatever sum shall be found due to the town of Dartmouth in consequence of the work-house, standing within the line of New Bedford, as shall be reported by said committees, the inhabitants of said New Bedford shall pay to the said town of Dartmouth.

*And be it enacted by the authority aforesaid,* That Elisha May, Esq., be, and he is hereby empowered, to issue his warrant directed to some principal inhabitant, requiring him to warn and give notice to the inhabitants of the said town of New Bedford to assemble and meet at some suitable place in the said town, to choose all such town officers as towns are required to choose at their annual town meetings in the month of March or April annually.

## XI.

## INCORPORATION OF THE TOWN OF FAIRHAVEN.

## AN ACT TO ESTABLISH THE TOWN OF FAIRHAVEN.

FEBRUARY 22d, 1812.

SEC. 1. The easterly part of New Bedford, in the County of Bristol, as described within the following bounds, with the inhabitants thereon, be, and they are hereby incorporated into a separate town by the name of Fairhaven, viz.: Beginning at the mouth of Acushnet river, thence northerly by said river until it comes to the north side of a bridge at the head of said river; thence westerly by the north side of the highway to Swift's Corner (so called); thence northerly by the easterly side of the highway which leads to Rounseville's furnace until it comes to Freetown line; thence easterly by the line of said Freetown till it comes to Peaked Rock (so called,) in the northeast corner of the town of New Bedford; thence southerly by Rochester line till it comes to Buzzard's Bay; thence by said bay to the first mentioned bound. And the said town of Fairhaven is hereby vested with all the powers, privileges, rights and immunities, and subject to all the duties and requisitions to which other towns are entitled and subjected by the constitution and laws of this Commonwealth.

SEC. 2. Be it further enacted, that of all State and County taxes which shall be levied and required of said town, previous to a new valuation, the said town of Fairhaven shall pay three tenth parts thereof.

SEC. 3. Be it further enacted, that all the expenses arising for the support of the poor of said town of New Bedford, with whom it is now chargeable, together with such poor as have removed out of said town prior to this act of incorporation, but who may hereafter lawfully return to said town for support, shall be divided between the two towns in proportion to the taxes which they are liable to pay respectively, according to this act.

SEC. 4. Be it further enacted, that John Hawes, Esquire, be, and he is hereby authorized to issue his warrant, directed to some suitable inhabitant of Fairhaven, requiring him to notify and warn the inhabitants thereof, qualified to vote for town officers, to meet at such convenient time and place as shall be expressed in his said warrant, to choose such officers as towns are by law authorized to choose in the months of March or April, annually. And that the said John Hawes, Esquire, be, and he is hereby authorized and empowered to preside at said meeting during the election of a moderator, and to exercise all the powers and do all the duties which town clerks by law have and do perform in the election of moderators of town meetings.

## XII.

LINE BETWEEN NEW BEDFORD AND DARTMOUTH  
ALTERED.AN ACT ALTERING THE DIVIDING LINE BETWEEN THE TOWNS OF  
DARTMOUTH AND NEW BEDFORD.

FEBRUARY 19th, 1831.

From and after the passing of this act, the dividing line between the towns of Dartmouth and New Bedford shall be as follows, viz.: Beginning at the head of Clark's Cove, thence north nine and one half degrees west, six rods to the middle of the bridge in the road leading across said beach; thence on the same course two hundred and forty-six rods to the southeast side of the Aponaganset road, opposite to the bridge; thence north twenty-six degrees west, two hundred and seventy-six rods to the south side of the road leading from New Bedford to Smith's Mills, opposite to the westernmost bridge; thence north, twenty-two degrees west, about one hundred and ninety-four rods to a large peaked rock in the westerly part of Ebenezer Hathaway's farm; thence north, twenty-one degrees east, about two hundred and sixty rods to the bridge on the old road leading to Smith's Mills; thence north, forty-seven degrees west, about five hundred and eighty-six rods to a marked maple tree on the south side of Philip Allen's mill-dam; thence north, fifteen degrees east, about one thousand and seventy-three rods to the Freetown line: *provided, however*, that the lands set from New Bedford to Dartmouth, or from Dartmouth to New Bedford, by the establishment of the line as aforesaid, shall be holden to pay all taxes heretofore assessed upon them, the same as if this act had not been passed.

## XIII.

## PART OF DARTMOUTH ANNEXED TO NEW BEDFORD.

AN ACT TO ANNEX A PART OF THE TOWN OF DARTMOUTH TO  
THE TOWN OF NEW BEDFORD.

MARCH 20th, 1845.

SECTION 1. So much of the town of Dartmouth, in the county of Bristol, as lies easterly of a line beginning at a point near the north-west corner of Clark's Cove and running five rods east of Charles A. Walker's dwelling-house in a direct line to the west line of the lane next west of Melatiah Hathaway's dwelling-house, and thence to the stone monument near Allen's Mills, being one of the monuments between the towns of New Bedford and Dartmouth, with all the inhabitants and estates thereon, is hereby set off from the town of Dartmouth and annexed to the town of New Bedford.

SECTION 2. Said inhabitants and estates so set off shall be liable to pay all taxes that have been legally assessed on them by the town of Dartmouth, in the same manner as if this act had not been passed.

SECTION 3. Said town of New Bedford shall pay over to the said town of Dartmouth all such sums of money as shall be levied and collected from the inhabitants and estates set off as aforesaid, for their proportion of any state or county tax, until a new valuation of estates shall be made, according to the provisions of the constitution.

SECTION 4. If any persons who have heretofore gained a legal settlement in the town of Dartmouth by reason of residence on the territory set off as aforesaid, or by having been proprietors thereof, or who may derive such settlement from any such resident or proprietor, shall come to want and stand in need of relief and support, they shall be relieved and supported by the town of New Bedford, in the same manner as if they had gained a legal settlement in that town.

## XIV.

## A PART OF ACUSHNET ANNEXED TO NEW BEDFORD.

AN ACT TO ANNEX A PART OF THE TOWN OF ACUSHNET TO THE CITY OF NEW BEDFORD.

APRIL 9th, 1875.

SECT. 1. All that part of the town of Acushnet, with all the inhabitants, and estates therein, lying westerly of the following line, to wit: Beginning at the stone post numbered twenty-nine, at Davis Corner, so called, thence running north three degrees west to a stone post, five rods easterly of the house of Benjamin Peckham, and from thence northerly in a straight line to the stone post that marks the boundary line between New Bedford, Freetown and Acushnet, is hereby set off from the town of Acushnet and annexed to the city of New Bedford, and shall constitute a part of the first ward of the city of New Bedford until a new division of wards is made in said city.

SECT. 2. All taxes already assessed by the town of Acushnet to the inhabitants of said territory hereby set off and annexed shall be paid by them to said town the same as if this act had not been passed: and all paupers who have gained or derived a settlement in said town, by a settlement gained within said territory, shall be relieved and supported by the city of New Bedford in the same manner as if they had a legal settlement in said city.

SECT. 3. The inhabitants residing on the said territory hereby annexed to the city of New Bedford, shall continue to be a part of the town of Acushnet for the purpose of electing a representative to the general court until the next apportionment shall be made, and it shall be the duty of the mayor and aldermen of the city of New Bedford to make a true list of all the persons in said territory qualified to vote at said election as required by law, and to deliver the same to the selectmen of Acushnet, seven days at least before said election: and the same shall be taken and used by the said selectmen in the same manner as if it had been prepared by themselves.

SECT. 4. The city of New Bedford shall annually pay to the town of Acushnet from and after the time when this act takes effect, one twenty-eighth part of all the state and county taxes thereafter required of said town, previous to a new state valuation or new basis for the apportionment of state and county taxes.

## XV.

## GENERAL GRAY'S RAID.

[The following interesting article connected with the destruction of Bedford in 1778 by the British forces under General Gray, I find in The Independent Ledger and the American Advertiser, Boston, September 28th, 1778. The paper belongs to the Free Public Library. Attention has been called to it by the librarian.]

[From the Providence Gazette.]

The following extracts from General Gray's orders, previous to the enemy's disembarkation at Bedford, are sent you for publication.

## MAJOR-GENERAL GRAY'S ORDERS.

ON BOARD THE CARYSFORT, September 4, 1778.

When the enemy are so posted that they can be got at, the Major-General commands the troops that are ordered to attack them to march vigorously up, and receive their fire, till they come very close, and upon every proper opportunity they are to rush upon the enemy, with their bayonets, immediately after they have thrown their fire, without waiting to load again: in which method of attack, the superior courage and strength of the troops must always be crowned with glory and success. The Major-General is impressed with every assurance, that the officers and men are so thoroughly convinced of the great advantage they have over the enemy in this mode of fighting, and their great zeal for the service, that the present expedition cannot fail of success, but do them honor, and answer the expectations of the commander-in-chief, whose opinion of these troops cannot be more strongly manifested than by sending them upon this essential service.

In case of bad weather, or other accidents, that any of the transports should be separated from the fleet and fall in with a privateer, so as to make an escape impossible, which may not be unlikely, many small ones being lurking about upon the watch, the Major-General desires the commanding officer of each transport would oblige the captain of the ship to bear immediately down upon such privateer, running him directly and without delay on board, the troops being ready at the critical moment to enter and take possession of the vessel. This being properly done, will ever succeed, the enemy not being aware of such an attack, and the troops so superior in every respect to put in execution. *The commanding officers are to be answerable that no houses or barns are set on fire by the soldiers, unless by particular orders from Major-General Gray.\**

\*Sixty-five years ago, thirty-three years only after the event, a Quaker lady, whose father had several buildings burned by the British at that time, was heard to say that General Gray did not intend to destroy her father's houses. That a distillery was near, which was first sacked and then burned, affords a double reason why General Gray's order in relation to the homes of the villagers was not obeyed. From what is known of General Gray, however, we have reason to suppose that a very slight reason would have been sufficient to have called forth a "particular order." The writer of the Old Dartmouth Centennial Ode describes the raiders as

"Crazed by the demon of the still,"

and in a note he says, "The distillery was one of the first buildings destroyed, and

The publication of these orders (exclusive of the valuable purposes it will answer by preparing our troops and privateers against this mode of attack) will naturally lead us to the following alternative, viz.: That either the British troops, by burning the houses at Bedford, have not shown that sacred regard to discipline, and observance of orders, from whence alone they pretend to derive a superiority over us; or, that the late conflagration was in consequence of orders from General Gray. In either case disgrace must attend the British army. Four thousand chosen men, under the immediate command of the magnanimous General Gray, have effected, *with great precaution*, what a buccaneer might with safety accomplish at any time. Such daily proofs of judgment in their plans of operation, and the spirit and enterprise with which these plans are put in execution must (I should imagine) soon convince rebellion of the vanity of opposition.

---

## XVI.

## TOWN MEETING IN 1814.

VOTES PASSED JULY 21, 1814.

Voted, unanimously, as expressive of the sense of the inhabitants of this town, that inasmuch as we have been uniformly disapproved of the impolitic, unnecessary and ruinous war in which the United States are engaged, we have considered it our duty to abstain, and have scrupulously abstained from all interest and concern in sending out private armed vessels to harass the commerce of the enemy, and from all voluntary acts which appeared to us to have a tendency to prolong the duration, encourage the prosecution, or increase the ravages of the "unprofitable contest"; that we have seen with disapprobation several private armed vessels belonging to other ports taking shelter in our peaceful waters, and regret that we have not the authority of law wholly to exclude them from our harbour, where they serve to increase our dangers and to excite tumult, disorder, riot and confusion.

the excesses of the soldiers were, no doubt, to a great extent, owing to the contents of the vats.

Voted, unanimously, as expressive of the sense of this town, that private armed vessels, while cruising in various climates and visiting ships and vessels from every country, are extremely liable to contract and receive on board infectious diseases, and that in all such cases there is reason to suspect that such vessels and the persons, baggage, clothing and goods on board may be infected with some contagious distemper.

Voted, unanimously, as expressive of the sense of the inhabitants of this town, that the safety of the inhabitants thereof requires that any private armed vessel or vessels which shall arrive or be bound into the harbour of New Bedford, from any port or place, shall be required to perform quarantine during a term of not less than forty days; and that the Selectmen and Health Committee of the town be requested to cause all such vessels to perform quarantine at such places as they shall appoint and under such restrictions and regulations as they may judge expedient.

Voted, That the privateer called the Yankee, now in this port, be ordered by the Selectmen immediately on quarantine ground, to be designated by them, for forty days.

Voted, That the town will indemnify the Selectmen from all harm which may accrue to them in the execution of their duties in enforcing the quarantine laws, as well in regard to the Yankee privateer as all other vessels.

Voted, That the following persons be a committee of safety, whose business will be to advise and direct in measures that may best secure the peace and safety of the town in case of invasion by an enemy.

Roger Haskell, Samuel Perry, William Hathaway, Francis Rotch, Rowland R. Crocker, James Washburn, Lemuel Williams, Jr., John A. Parker, Lewis Ludlam, Cornelius Grinnell.

---

## XVII.

### NEW BEDFORD IN THE WAR OF 1812-15.

The necessary limitations of the address would not allow of details in relation to the second war with Great Britain. A few items are here given. In another part of the appendix will be found

an account of a "Town Meeting in 1814," which clearly illustrates the feelings of the people in relation to the war and its privateering auxiliaries.

It was a sad war for our little community; for the commerce of the country was swept from the ocean, and it was upon the ocean alone that the inhabitants of New Bedford depended for support.

The losses were heavy and the suffering was great; and there are some who will read this who still retain a vivid recollection of the deprivations which followed the closing of the ocean highways and cruising grounds to the enterprise and skilful daring of our merchants and sailors. There will be found by the local historian who shall one day look minutely into the events of the three years conflict, many incidents connected with it of which New Bedford and its vicinity was the scene, that will reward his researches and be found interesting to the descendants of the actors then upon the stage.

There was, in the summer of 1814, a large detachment of the militia of this part of the state ordered to New Bedford for its defence. There were at that time probably a thousand men under arms in the town, including our own military companies.

We publish the names of the members of the two New Bedford military companies then on active duty. This we have been enabled to do by an examination of the rosters of the several companies composing the command of Lieut.-Col. Benjamin Lincoln, which were detached for service at New Bedford. The record is very complete. This valuable contribution to our local annals is in the possession of the Free Public Library, to which institution it was presented by Mrs. Caroline Lincoln Whitridge, the daughter of the Lieutenant-Colonel in command, afterwards Major-General Benjamin Lincoln.

We find but little of incident in this military record. Several courts-martial were held, for desertion and other grave offences. One poor boy-fifer, who said he did not mean to run away, was sentenced to close confinement during his term of service, and to *have his whiskey stopped*. Lucky sentence for the boy. One officer deserted at the first alarm, and a private fled beyond the reach of a squad sent for him.

OFFICERS OF THE REGIMENT.—Benjamin Lincoln, Lieut.-Col. Commanding; Edward Pope, Major; John Coggeshall, Major of Artillery; Elisha Tobey, Adjt.; William Kempton, Quartermaster; Samuel Perry, Surgeon; Elijah Wilbur, Qr. Mastr. Sgt.; Levi Peirce, Major; Ebenezer Hunt, Major; Daniel Lane, Adjt. Artly. All of these were of New Bedford, excepting Tobey, Peirce, Hart, and Lane.

In Captain Reuben Swift's company, formed at the "Head of the River," there were the following men from New Bedford.

William Swift, 1st Sgt.; Allen Bowen, 3d do.; and Nathaniel Spooner, Lemuel Armsby, Elijah Parker, Jr., Oliver Wolcott, Peter

Taber, Cornelius Pope, Samuel Hammond, William Tobey, 3d, Samuel J. Tobey, James Wood, John Freeman, Stephen Wing, 2d, James Davis, Jr., Joshua Spooner, Stillman Washburn, G. Weston, Micah Spooner, Jr., John Williams, Abraham Reynolds, Asa Crapo, Benjamin S. Hathaway, Philip Reynolds, Privates.

This company was stationed at Clark's Cove, in New Bedford, for the purpose of forming a regular guard around Clark's Point from the Cove to the Smoking Rocks.

The only New Bedford men in Captain William Nye's company from Fairhaven, were the captain, Loum Snow, and James Taber.

#### INFANTRY COMPANY.

Roll of Capt. Nathaniel Nelson's company of detached troops stationed at New Bedford, ordered out by Lieut.-Col. Benjamin Lincoln, June, 1814.

*Officers.*—Nathaniel Nelson, Captain; Job Gray, Jr. (Fairhaven, sick and did no duty,) Lieut; George Clark, Ensign \* \* \* \*; Benjamin Warren, 1st Sgt.; Gamaliel Hart, 2d Sgt.; Nathaniel Perry, 3d Sgt.; Thomas Riddell, 4th Sgt.; Charles Hathaway, Drill Sgt.; David Howland, Corporal; James Proud, do.; *Robert Tuckerman*, do.; Charles Covell do.; Alanson Caswell, Drummer; Charles Pratt, Fifer; Abner Soule, Captain's Waiter.

*Privates.*—David Allen, Joseph Wilcox, Josiah L. Bliss, William Tuckerman, Edward Gardner, Willet Seabury, Joseph Merrett, Nathaniel Bassett, Charles Gilbert, Benjamin Hammond, Nye Holmes, *Jonathan Howland, Jr.*, Elisha Briggs, William W. Kempton, James Babcock, Samuel Proud, Josiah Winslow, Ivory C. Albert, Uriah Head, Perry Jenkins, Russell Wood, Thomas Kempton, William Lane, William Cudworth, Heman Cushman, Oliver Price, Jr., Avery Parker, 2d, John Sisson, *Thomas Durfee*, Stephen Howland, Elisha Clark, Moses Washburn, Thomas Burrell, Charles Wood, Stanton Burch, Richard Hill, Stephen West, Jr., John Wadkins, Jonathan Haffords, Benjamin Brownell, David Wilber, Felix Filuel, Ezra Hathaway, \* \* \* \* Warren Mosher, Noel Taber, *John Akin*, Benjamin B. Covell, William Bliss, Jr., Michael Randall, Elijah Knap, Tillinghast Tompkins, Elihu Mosher, 2d, James Haffords (armorer,) Merrill Hathaway, Israel Smith, Henry Frederick, Hampton Peirce, Gardner Chase, Benjamin Douglas. Total, 70; including officers.

The preceding company was stationed in New Bedford, ready for service at a moment's warning; did fatigue duty, &c.

All the members of this company were of New Bedford excepting Lieut. Gray, who was from Fairhaven, Charles Wood, who was from Dartmouth, and the last six named on the list, who were from Free town. I believe that four\* only of the company are living. Charles

\*Robert Tuckerman, Jonathan Howland, Jr., Thomas Durfee, and John Akin.

Gilbert was killed by a stupid sentinel, stationed at the gun-house on Spring street, near Sixth. He was going the rounds in the night inspecting the posts, and not answering promptly the *first* demand for the countersign, he was shot and instantly killed. [August, 1876.]

#### ARTILLERY COMPANY.

Return Pay-Roll of Capt. Samuel Stall's company of artillery, of the 2d Brig. 5th Division of Massachusetts Militia, stationed in New Bedford, and detached by order of Lieut.-Col. Benjamin Lincoln :

*Officers.*—Samuel Stall, Capt. ; Frederick Mayhew, 1st Lieut. ; Haydon Coggeshall, 2d Lieut. ; Thomas Earl, Sergt. ; George S. Dunham, do ; Thomas Martin, do. ; Jesse Haskell, do. ; David Kempton, Corp. ; Thomas Ellis, do. ; Peleg Clarke, do. ; Watson Ellis, do. ; George Caswell, Drummer ; Russell Booth, Fifer ; John Wrightington, Matross.

*Privates.*—Charles Coggeshall, Nathan Perry, *Lloyd Howland*, *John Heath*, Nash De Cost, Martin Hathaway, Sylvanus Sowle, Ira Caswell, Isaac Kempton, Wing Howland, Josiah Smith, Thomas Maxfield, Abraham Peirce, Warren Maxfield, James Cannon, Henry Coffin, Bryant Macomber, Henry Place, Jonathan Gifford, Avery Parker, Smith Stetson, Griffin Barney, Jr., John Reynolds, Barnabas Smith, Ezekiel Tripp, James Howland, 3d, Allen Shearman, Edmund Jackson, Joseph L. Jenney, John P. West, Richard West, Isaac Smith.

New Bedford, August, 1814.

But two of this company survive, — Lloyd Howland, a resident of New Bedford, and John Heath, who lives, it is believed, in Brooklyn, N. Y. [August, 1876.]

#### XVIII.

### THE SHIP REBECCA.

BY WILLIAM T. RUSSELL.

[Prepared December, 1844.]

The ship Rebecca was the first ship built in New Bedford. She was launched in the spring of 1785. George Claghorn was the master carpenter, who afterwards built the frigate Constitution, the pride of our navy.

The Rebecca was owned by Joseph Russell and his sons Barnabas and Gilbert Russell. The timber of which she was built was chiefly cut in the southwesterly part of the town, now covered with houses and gardens. She measured 175 67-95 tons, which at that time was considered so immensely large that she was the wonder and the admiration of all the country round. People from Taunton, Bridgewater, and all the neighboring towns, came to New Bedford to see the big ship. There was a woman figure-head carved for her, and when it was about being put upon her a number of the Friends' Society remonstrated against so vain and useless an ornament, and she went to sea without it.

The owners of the Rebecca had some difficulty in finding a man of sufficient experience to trust with the command of so big a ship. Now we have a schooner of larger tonnage running to New York, as a packet; (schooner Richmond is 180 tons.)

James Haydon was finally selected for her captain, and Cornelius Grinnell chief mate. She sailed on her first voyage to Philadelphia, from thence to Liverpool. The second voyage Cornelius Grinnell was captain, and continued to command her for six years.

The Rebecca was the first American whaleship that doubled Cape Horn. She was commanded by Captain Kearsley, and made a successful voyage, obtaining a cargo of sperm oil on the coast of Chili, and returning in about twelve months.

The Rebecca finally made a disastrous end. She sailed from Liverpool for New York in the autumn of 1798, commanded by Captain Gardner, (the father of the present Captains Gardner,) and has never been heard of from that time to this.

NOTE.—Capt. Cornelius Howland and Caleb Greene, the schoolmaster, were owners in the Rebecca when she made her Pacific voyage. Some of the schooners of the present day are nearly four times the size of the Rebecca. She was not the first ship built in Bedford. The building of the Dartmouth has an earlier date, and our late fellow-citizen Thomas Kempton said that a ship called the Bedford was built on the west side of the Acushnet as early as 1770. This could not have been the historic Bedford.

Frederick C. Sanford, of Nantucket, in his valuable and interesting article in the Nantucket Inquirer, 1852, on the Pioneers of the Whale Fishery, says that "in 1791 our ships entered the Pacific." This is the year that the Rebecca doubled Cape Horn. Accounts differ as to which took the lead in the adventure, Nantucket or New Bedford. In a letter dated August 27th, 1876, Mr. Sanford says that "in consequence of the great success in the Pacific of ships from London and Mr. Rotch's ships from Dunkirk, *six* ships were in 1790 fitted for whaling in that ocean from Nantucket. The Beaver sailed first, August, 1791." The first start from this country for doubling Cape Horn was no doubt from Nantucket. The Rebecca was not fitted for the Pacific. Information obtained on the voyage induced the captain to try his luck there. Which of the two ships first rounded the Cape does not appear,—is not of much importance.

The following extracts form a part of the conclusion of Mr. Sanford's interesting article. His description of the vessels and the men employed in this bold enterprise, will apply to the New Bedford as well as to the Nantucket pioneers engaged in it.

No one will question the truth of the portrait he has drawn of the hardy, bold, and enterprising men of Nantucket, who were the world-renowned leaders in this extraordinary branch of the world's industrial pursuits. The story of the whalers borders upon the romance of history, and deserves an abler historian than any who have yet attempted to relate it. Who so well qualified as the writer of the article from which we have quoted?

"In 1791 *our* ships entered the Pacific in pursuit of their prey. They doubled Cape Horn in a class of vessels that would be considered unsafe at this day to perform a summer voyage across the Atlantic, small in size, not exceeding 250 tons in burthen, heavy, dull sailers, without copper on their bottoms, poorly and scantily fitted indeed, but manned with men of an iron nerve, and an energy that knew no turning, and here again they were successful."

"I am fully aware that New Bedford surpasses all other places engaged in the whale fishery, in wealth and prosperity; success has followed exertion in a ratio of one hundred fold, and there are very few places in our country which have arisen to such a height of prosperity in so short a period. It seems almost the work of an enchanter."

"Other places have eclipsed Nantucket of late, but the well-earned fame of our sires knows no diminution, but brightens their laurels as time lessens their numbers. Nantucket may with an honest pride look back to a long list of worthies, men filled with interminable perseverance and an energy that defied and overcame all obstacles, a list that will bear no unworthy comparison with Samuel Adams and his revolutionary companions, as deserving of her pride as the jewels of Cornelia."

---

## XIX.

### INTERESTING TOWN MEETING, JANUARY 4TH, 1847.

#### THE LAST TOWN MEETING; THE WATER STREET CONTROVERSY.

Vote to accept Water street on condition that bonds are given to save town harmless.

and Maxfield Street extension accepted to Hillman street on condition, Jany. 21, 1846.

Town-meeting in relation to northerly extention, Jany. 4th, 1847.

On memorial of Samuel Rodman he seeks release from the bond for \$2000 for damages to George Howland.

James B. Congdon moderator of meeting.

Edward Merrill moves that S. Rodman be released from the payment.

Sampson Perkins moves that the whole subject be indefinitely postponed.

Thomas D. Eliot moves reference to committee.  
meeting adjourned to afternoon.

T. D. Eliot's motion withdrawn.  
motion of postponement negatived.

Edward Merrill's motion carried Y. 159, N. 134. S. Rodman to be released and bond cancelled.

Another meeting called.

Art. 1. accep. of Water to Maxfield St.

discontinuance of Water from North Street to its northern terminus.

meeting in relation to, Jan. 11th, 1847, James B. Congdon moderator.

moderator declares no action can be had in relation to the layout of the streets north to Maxfield.

Thomas Barstow moves the indefinite postponement of the proposition to discontinue the street.

Communication from George Howland.

Note. The following is a copy of the note from George Howland.

"To the citizens of New Bedford in town meeting assembled. I stand ready, whenever the town will discontinue North Water street, from the north side of North street to the north side of contemplated Hillman street or continuance North Water street to contemplated Maxfield street, to refund to the town the \$2000 paid me for damages for land taken in the extension of said Water street, northerly.

Signed GEORGE HOWLAND.

Another communication from G. Howland.

Note.—The following is the second note from George Howland.

"George Howland will not encumber the passage now used from North street to Samuel Rodman's wharf for 5 years—and at any time during his life he will suffer the town to lay out Water street to Maxfield street without cost so far as he is concerned: provided the land owners between North street and Maxfield street would give the land over which the street shall pass and permit the street to be continued to Maxfield street without expense to the town so far as the proprietors of the land are concerned.

Signed. GEORGE HOWLAND

by MATTHEW HOWLAND.

remarks made by Sampson Perkins and Timothy G. Coffin

in opposition to postponement:

by Rodney French,

Benjamin Rodman, and

E. M. Robinson

in favor of postponement.

Meeting adjourned to afternoon.

E. M. Robinson continues in favor of postponement.

Sampson Perkins, George Randall and A. Barker in opposition.

David R. Greene & Rodney French in support of the motion.

Meeting adjourned to Jan. 12 at 9 o'clock.

Adjournment.

Motion for indefinite postponement withdrawn.

Renewed by David R. Greene.

R. French resumed in favor of postponement, followed by E. M. Robinson & D. R. Greene on same side. & by Sampson Perkins & Ab<sup>m</sup> Barker in opposition.

Question decided in the negative Y. 169 N. 183.

Sampson Perkins moves that Water street from North street to its northern terminus be discontinued.

Pending the motion the meeting adjourned.

Adjourned meeting at 2½ o'clock P. M.

The moderator then stated the question to be on Mr. Perkins motion to discontinue that part of Water street named in the warrant, and then proceeded further to state, that he had felt it his duty, with the permission of the meeting to say a few words in relation to the course which the debate had taken. He pointed out the peculiar character of the subjects which had been and then were before the town, and accounted for and justified the extensive range which had been taken and allowed, to that fact, and the peculiar manner in which the subject had been brought forward for the action of the inhabitants. He then reminded the meeting, that nothing could justify attacks upon private character—that the fair name and fame of the citizens of the town were of more value than money, and, in conclusion pointed out the true course of discussion upon the question then before the meeting.

Motion of E. M. Robinson to discontinue North Water street with proviso.

His remarks.

He states "if all further action upon the subject should be suspended, the sum of *two thousand* dollars would be immediately paid into the treasury of the town."

Whole subject indefinitely postponed.

Benj. Rodman hands his mother Elizabeth Rodman's check to moderator for \$2000.

The record reads — "Benjamin Rodman, Esq. then rose and having obtained liberty of the meeting, stated to the inhabitants that his aged mother, unwilling that any imputation of unfairness or of having violated any engagement should rest upon the character of her son, had put into his hands, without the knowledge of his brother Samuel a check for two thousand dollars to be placed into the treasury of the town."

Moderator gives check to treasurer.

Motion of E. M. Robinson of thanks to the moderator.

The record is "That the thanks of the town be given to James Bunker Congdon Esquire, for the *impartiality*, *fairness* and *ability*,

with which he has discharged the duties of moderator of this meeting," which was passed unanimously.

A. Barker speaks on question of vote of thanks to moderator.

The record reads — "he disclaimed any feelings of ill-will towards either of the two gentlemen whose names had been so closely connected with the discussion, and hoped that nothing he had said would be construed into any reflection upon their characters."

Art. 4 of the warrant for the meeting considered. [to review the whole proceedings in relation to Water street.]

On motion of R. French, indefinitely postponed.

Closing part of the record — "While this motion was pending, David R. Greene stated to the meeting that he had in his possession a check signed by Samuel Rodman for *two thousand* dollars which had been placed in the hands of the Treasurer of the town; that Mr. Rodman, although he continued to entertain the clearest conviction that no more than Justice had been done him by the act of the town in releasing him from the obligation of his bond, was unwilling that any of his fellow-citizens should think that injustice had been done them by that act, and therefore he was willing to put back into the treasury of the town the amount which had been paid as damage to George Howland."

The meeting was then briefly addressed by Sampson Perkins, Rodney French, and George Randall, who severally expressed the hope that nothing that had been said would be construed into disrespect or ill will towards the two persons whose names had been so much used in the debate—and also by Isaac D. Hall, who expressed his pleasure at being able to say that both of those gentlemen had come out of the trial without a blemish upon their characters.

The moderator then put the motion for adjournment which was carried unanimously.

NOTE.—This was a most extraordinary meeting, more exciting and interesting than any town meeting ever held here. It was for this reason that the proceedings were entered so fully.

## XX.

## NEW BEDFORD IN 1845.

[The following sketch of New Bedford *thirty-one* years ago, forms a part of an article by a New Bedford contributor, published in the National Magazine for September, 1845.]

It is difficult for any one, and particularly difficult for a stranger, to form anything like a true estimate of the magnitude and character of the business operations of New Bedford. Lowell and Fall River place at once before the eyes of the visitor the whole extent of their industrial instrumentalities — buildings, stock, machinery, men, women, and children all appear and present an imposing array of ingenious and productive movement; and as the eye takes in the long ranges of towering factories, and the ear is almost stunned with the loud and never-ceasing clamour and roar of the wheels and the furnaces, and the long lines of busy and willing *hands*, all seem drawn up in orderly array to their respective tasks, the mind is furnished with all the elements for the formation of a correct judgment as to the magnitude of the enterprises in which the inhabitants of those towns are engaged.

Our farmers, too, can easily put into the possession of the looker-on the means of a true appreciation of their agricultural operations. Ayrshires and plough-shares, crops, cribs, and cattle, porkers, pens, and poultry, smoked hams, and Durhams, long-horned, and short-horned, and no-horned, barns, bins, bulls, and bannocks, fine-top and red-top grasses, and lasses, bumpkins, and pumpkins, all are to be viewed and reviewed at once; so that the visitor to the prize-farm is not left a moment in doubt as to the agencies of production, the result produced, or as to the right of the proprietor and manager to the silver pitcher at the next state agricultural exhibition, or county cattle show.

But New Bedford has no such opportunities for display. Its inhabitants have no means for concentrating and grouping the agencies and results of their enterprise and industry, so as to cause them to make a revelation, full and complete, of their claims to the notice and admiration of the world. Scattered over the ocean, each of the floating magazines of skill, perseverance, and labour, puts forth during the course of its years-long adventure an aggregate of well-directed and vigorous effort that cannot be paralleled within the same limited extent of operations in any other branch of human industry.

But who can see, who can appreciate this? Alone, on the great deep, afar off, beyond the ken of affectionate regard or intelligent curiosity, these little bands of hard-working, much-enduring, wealth-producing men, in their sea-encircled domain, pursue their toil with an activity that never tires, a resoluteness that crushes in its grasp

difficulty and opposition, as the mailed hand of the warrior the feeble opposition of childhood, united with the exercise of a degree of prudence, decision, and skill, which many a cabinet council might vainly emulate. Year after year they pursue their adventurous toil, and, returning, add the fruits of their hardy, intelligent and errant industry to the world's aggregate wealth, without any just appreciation, on the part of the landsman, of the enormous amount of vigorous and self-denying effort which has been put forth in its accumulation.

Since there cannot be, in reality, spread out before the eye of the observer such an array of the business instrumentalities of the town as will give him an idea of their magnitude, let us, for a moment, call in the aid of the imagination, and sketch a picture which may assist in giving something like an adequate impression of their potential character.

Take the wand of Prospero —

“And by your art, set the wild waters in a roar,”

That from their various and remote cruising grounds, the New Bedford whalemén, “ordered by the safe provisions of your art,” may suddenly concentrate in the offing, and in a single line enter the waters of the bay near which the town is situate. Cast your eye upon that long line of noble ships. The leading vessel has already rounded the light, and entered the harbour, while the last of the fleet has just shot into the waters of the bay. Onward they come, their white canvas shining like a milky-way upon the waters. And now the pioneer ship having reached the northern extremity of the inner harbour, the signal is given, and the two hundred and fifty ships which compose that imposing and majestic array, come up to the wind, let go their anchors, and are soon to be seen, with every sail furled, quietly reposing upon the waters of the secluded haven. From the channel of the river, afar out, four or five miles beyond the point which makes the southern extremity of the town, almost as far as the eye can reach, extends the line, nearly ten miles long, of vessels which compose the whaling fleet of New Bedford. To the mind capable of grasping in all its vastness and comprehensiveness the far off scene, of which this splendid array is but the representative, few sights upon which the eye can rest would be more significant or sublime. Another signal is given! and from the sides of the ships are seen quickly to descend more than *one thousand* of those buoyant and graceful craft whose speed, when urged through the waters by the sturdy whalers, outstrips that of the fleet monsters who vainly strive to escape from the dart of the hunters of the ocean, are ranged in unbroken line in front of the fleet. Nearly six miles in length is this whaling flotilla, as each boat with head to the north is made ready to move forward in the pageant

which is to exhibit the extent and the potency of New Bedford enterprise.

In that interminable line of boats, floating like an immense sea-serpent upon the still waters of the Accushnett, are seated at the oar more than *seven thousand men*. There, ready to display that aptitude, fearlessness and vigour which is called forth and demanded by their occupation, are to be seen the *operatives* of the New Bedford fisheries. More than seven thousand men, not women and children, but strong, hardy, vigorous men! with powers of endurance and capacities for labor not exceeded by any other on the face of the globe, are contained in those little light and beautiful "skimmers of the seas," whose motions, like the prancing of the generous steed, seem to chide the delay which restrains them from darting forward over the waters. Four times as many men are there, as composed the American army when at Bunker Hill the British hirelings were taught a lesson which allowed them no longer to sneer at the prowess of American peasantry; and more than composed the army, which on that memorable day, was sent to drive those peasantry from their half formed intrenchments. More individuals are there, than made up the sum total of the inhabitants of New Bedford twenty-five years ago; and although it now numbers not far from sixteen thousand inhabitants, it would take the adult male population of two such towns to furnish such a band of ocean operatives. See, the line has started. Onward they move,

"With pennon streaming and with lance in rest,"

The oars of the light-hearted crews keeping time to the music of their merry songs. Divided into as many detachments as there are ships to which they are respectively attached, they range along before us, and with flags and signals displayed, and exhibiting the instruments of their craft, the weapons of their hardy warfare, one after another, in numbers almost numberless, glide away from our point of observation, and are lost in the distance.

The wand of the enchanter is broken; the vision has fled! We could not follow that imposing array, even if we should imagine that from the *top* of one of the whalers we heard the inspiring cry, "There she blows," arousing into generous rivalry and untiring activity all the energies of the sailor-boy's breast. The pageant has vanished; and having dismissed the assembled ships to their respective cruising grounds, there let us leave them with the expression of the earnest hope

"That bright success may on their valour wait,  
And rich reward attend upon their toil."

Having, by this imaginary concentration of its forces, attempted to give a general view of the character and extent of the industrial operations of New Bedford, we shall proceed to give a brief description

of the town; a few facts in relation to its history and progress, and some statistics exhibiting the results of the home business in which its inhabitants are engaged.

The town is pleasantly and eligibly situated on the west side of a small estuary, called the Accushnett River, which makes up in a northerly direction into the land near the western extremity of Buzzard's Bay, on the south shore of Massachusetts. It was formerly a part of the town of Dartmouth, which town once included the towns of Westport, Dartmouth; New Bedford, and Fairhaven. It is a half shire town of the county of Bristol.

It was incorporated in the year 1787. In the year 1812, that portion of the town situated on the east side of the Accushnett was set off as a separate township, retaining the name of Fairhaven, by which it always has been distinguished from the opposite settlement of Bedford.

Nothing can exceed the beauty of the situation of New Bedford. It is built upon ground which rises rapidly from the river, and the view from the opposite town of Fairhaven, and from the harbour, as it is approached from the south, is not exceeded by any town in the Union. It is laid out with much regularity, the streets nearly all forty feet wide, crossing each other at right angles. Most of the sidewalks are flagged and many of the streets are paved. The buildings are mostly of wood, although several of the finest houses and stores are built of a more durable and safe material.

Few strangers who visit New Bedford fail to be struck with the exceeding neatness and beauty of the dwellings in the more elevated portions of the town. Much of this attractiveness is owing to the circumstance, that they are nearly all surrounded by extensive and well cultivated gardens, and that the streets on which they are built are bordered with a beautiful growth and great variety of ornamental trees. County street, which runs the whole extent of the thickly settled part of the town, about two miles, upon the summit of the rising ground on which it is built, is allowed to be almost without a rival in this country for its various and attractive beauties.

Visitors are not only strongly impressed with the beauty of its situation, and the tastefulness and richness of many of its public buildings and private residences, but by the aspect of *freshness* which it everywhere presents. The large number of newly-erected buildings, particularly dwelling-houses, is an evidence of rapid growth, and of the accumulation of means by which that growth is promoted and sustained; and that nearly all these recent erections, are the neat, but humble dwellings of the trader, the mechanic, and the labourer, is not among the least gratifying evidences of real and permanent increase and prosperity. The desire for a home of one's own, possesses a charm; and the knowledge that the stranger landlord cannot intermeddle with our joys, has, to an extent rarely known, among a thickly

settled population, an abiding and active influence upon the people of New Bedford. From this cause is it, that one of the first and most interesting sights which meets the eye of the visitor, is the great number of neat, modest, and convenient dwellings which are spreading themselves over the beautiful hill upon which the town is situate.

In this disposition, so pleasing to contemplate, which has been made of the means which our honest industry and a laudable enterprise have placed at our disposal, I believe no one will undertake to say that a fair proportion has not been devoted to the gratification of a taste for the beautiful in village architecture and its accessories, the comfortable walk, the over-shadowing tree, the green inclosure, and the blooming flower garden. We cannot be said to be deficient in that love of the beautiful in nature, and art, so strikingly apparent in most of our New England towns, and which renders them the admiration of the traveller from other lands. The neat and comfortable dwellings of our mechanics, the extensive homes of some of our more wealthy inhabitants, the snug inclosure of the poor man, and the more enlarged and highly ornamental grounds of his richer neighbour, all manifest the presence of a nobler feeling than that which prompts to exertion from the mere love of gain.

Our public edifices are creditable in style and liberality. Of our churches, it may, with much propriety, be remarked that we may not fear to have them examined, or *numbered*. In a kind of architecture, in relation to which it is said, that the New Englanders are transgressors to a proverb, we have been so far successful, that all our places of public worship are respectable; and to one of them, has been accorded the high praise of standing without a rival in this part of the country. Our Town Hall has called forth the admiration of visitors of taste, and the buildings devoted to the schools, both in number and appearance, give an unequivocal indication that upon the important subject of education the people of New Bedford have been true to the principles of their Pilgrim ancestry.

While the citizens of New Bedford have exhibited their taste, and of some, perhaps, it may be said, their opulence, in their private dwellings, they have not failed to devote a proper regard to the public convenience, comfort, and safety, and the true prosperity and happiness of the inhabitants. It would be difficult to find a community of the same population, where so liberal an outlay in every branch of public expenditure has uniformly been made. No department has been neglected; and when the effort was unsuccessfully made to obtain a vote for a city charter, it was urged as a reason against the change, that no public concernment had been neglected, and consequently no change was called for.

The public buildings, the arrangements for the support and comfort of the poor and the sick, the means of public education, the condition

of the streets and highways, and the state of the fire department, manifest unequivocal evidence of a liberal expenditure, and a careful and discreet supervision.

The population of the town is estimated at about sixteen thousand. It has nearly doubled within the last ten years, every year having shown an increase. During this period, including the appropriations of the present year, there has been expended for public purposes about five hundred and twenty thousand dollars, not including above sixty thousand dollars which has been assessed as county taxes — an average of fifty-two thousand dollars a year, with an average of twelve thousand inhabitants. Few communities in this country can exhibit a parallel to this. A view of some of the items of this expenditure may be interesting. There have been expended upon the

|                              |           |
|------------------------------|-----------|
| Public schools,              | \$162,000 |
| Public streets and highways, | 103,000   |
| Fire department,             | 37,000    |
| Paupers,                     | 23,000    |
| Public buildings, about      | 100,000   |

A comparison of the sum which has been expended upon the public schools, with that which during the same period of time it has cost to support the paupers, gives a favourable aspect to this statistical evidence of the condition and character of the inhabitants. It is proper, however, to observe, that this is about one half the whole amount which it has cost to maintain the paupers within the limits of the town. All such as have no residence in the state are supported, in part, by the state government, and for the support of the paupers from other towns, payment is made by the towns to which they respectively belong.

The following are the appropriations made at the Annual Town Meeting, in April last :

|                                                       |                    |
|-------------------------------------------------------|--------------------|
| For paupers,                                          | \$2,800            |
| For streets, repaving, paving, curbing, and flagging, | 12,400             |
| For lighting the streets,                             | 2,200              |
| For public schools,                                   | 21,500             |
| For night-watch,                                      | 3,000              |
| For payments on debt,                                 | 5,235.43           |
| For fire department,                                  | 7,000              |
| For new alms-house,                                   | 12,000             |
| For incidental and miscellaneous,                     | 4,800              |
| Making an aggregate of                                | <u>\$70,735.43</u> |

To meet this expenditure, and to pay the state tax of \$1,510.50, and the county tax of \$6,674.96, there has been assessed a tax of seventy-five thousand dollars, *just the amount of the state tax voted by the last General Court.*

|                                                                 |              |
|-----------------------------------------------------------------|--------------|
| Real estate,                                                    | \$6,132,300  |
| Personal estate,                                                | 9,637,000    |
| <hr/>                                                           |              |
| The property of the town has been valued by the assessors, at   | \$15,769,300 |
| <br>                                                            |              |
| The number of taxables, is                                      | 4,141        |
| The number of polls, is (males twenty years of age and upwards) | 3,784        |
| The number of persons who pay a poll tax only, is               | 2,160        |

One hundred and seventy-five of the taxables are people of colour. Several of them are large tax-payers. There are above one thousand coloured persons residing in the town.

|                                     |              |
|-------------------------------------|--------------|
| The valuation in the year 1836, was | \$11,360,350 |
| For 1844, it was                    | 14,767,000   |

After making this financial exhibit, it will not be thought necessary to go much into detail as to the condition of the several departments. Liberality of expenditure and a vigilant supervision are evident in every branch of the public affairs of New Bedford. The public schools are, as we have seen, liberally provided for; their condition furnishes unequivocal evidence that the munificent appropriations of the inhabitants are, and have been, expended under the direction of intelligent and devoted committee men.

From the last report of the School Committee, we see that twenty-eight public schools are sustained by the town, and that forty-seven teachers are constantly employed. Of this large number of teachers only four are males.

A new brick school-house, for the accommodation of the public high-school, and one or more schools of a lower grade, has just been completed. It has been built at an expense of about twelve thousand dollars, and is a beautiful and convenient structure. The number of public school-houses is seventeen.

Perhaps, no better evidence of the effective character of the fire department can be given than the fact, that although nearly all the buildings are of wood, the town has never been visited by an extensive conflagration. This department consists of a board of firewardens, twenty in number, from which three engineers are selected, a hook and ladder company, a company for the protection of property, and ten engine companies. For every engine, ten in number, a convenient house has been provided. The whole number of men belonging to the department is five hundred and twenty-five. Ten dollars a year is allowed to the firemen.

The selectmen, in their last annual report, hold the following language in relation to the department:

“The engines and apparatus attached to them, and all the other fire apparatus of the town, are in good order, as are the buildings appropriated to their use, and the reservoirs, distributed over every part of the village, can, it is believed, afford an ample supply of water for any

emergency. These gratifying facts, connected with the still more important one, that we have a body of firemen who have not been, and cannot be, surpassed for all those qualities which give vigour and efficiency to the operations of a fire department, and which give calmness and assurance to the inhabitants when alarmed by the cry of fire, are sources of well-founded gratulation, and make valid the claim of our department to an elevated position among similar establishments of our country, and in the estimation of those for whose safety and protection it has been founded and sustained."

For the economical and comfortable support of the poor, no place has ever been found, so perfect as that which places them, under proper supervision, upon a farm. This mode was adopted many years ago by New Bedford. A farm of about a hundred acres was purchased, the cost of which, with the buildings, which were then erected, was about seven thousand dollars. We have seen the annual outlay. The farm has been increasing in value, and is now computed to be worth ten thousand dollars. A new alms-house is now in process of erection, which will cost about fifteen thousand dollars. A pleasanter and more commanding situation than that occupied by the present building, has been selected, and it will, when completed, not only be a safe and comfortable dwelling for the poor, but an ornament to the town, by whose enlightened liberality it will have been erected.

In their care for the living, the inhabitants have not been unmindful of what is due to the dead. A public place of burial, called Oak Grove Cemetery, has been provided, containing eight acres of ground. A part of the cemetery is laid out in lots, the exclusive occupancy of which may be obtained from the authorities for a small consideration. The remainder is devoted to indiscriminate burial. It is a beautiful spot. Nature has been lavish of her gifts, and good taste marks the arrangements which have been made by the officers of the town to adapt the grounds to its sacred purpose. "The funds which have been derived from the lots taken by individuals," say the selectmen in the report before quoted, "have enabled the authorities to add to the convenience and beauty of the spot which has been selected as a place for the public interment of the dead, and every citizen, whatever may be his designs or wishes, with regard to himself or his friends, cannot but be gratified that the Common Burying Ground has, by the plan which has been adopted, been saved from that aspect of loathsomeness and abandonment, too often exhibited in such locations."

The Rural Cemetery, a private ground, is well laid out; and although not possessing the natural advantages of the other, the chaste and beautiful monuments, the neat inclosures, and the green shrubbery, give it a pleasing appearance, and speak of the possession, on the part of those who have availed of it as a place of sepulture, of those refined and exalted sentiments, which lead to the selection and embel-

lishments of nature's loveliest spots, as a final resting-place for the departed.

In this town the curbing and flagging the side-walks, as well as all the other operations upon the streets, are performed at the public expense. To this it is owing that the sum expended upon the highways has been so large. Between fifty and sixty thousand dollars have been expended upon the side-walks alone. Nearly every one of the streets will, at the close of the present year, have one of its side-walks flagged. Some of the more public thoroughfares are paved and have both the side-walks flagged.

The Town Hall is a magnificent structure. It is built of granite, and is one hundred feet long and sixty-one feet wide, and three stories in height. The lower story, or basement, is occupied as a public market. ✕ This room is spacious and convenient, and its stalls in good order, and all furnished with marble benches for the meats; and for the most part supplied with an abundance of those articles usually found in the public market.

The second story is a hall for public meetings, eighty by sixty feet.

In the third story are rooms for the accommodation of the officers of the town. Connected with the office of the Town Clerk, is a large fire-proof apartment, in which the records and papers of the town are deposited.

In the hall is suspended a full length portrait of Washington, painted by William A. Wall, a native artist, from Stuart's celebrated picture, and presented to the town by a small number of the citizens. It has been pronounced, by competent judges, to be well and faithfully executed; and while it reflects credit upon the artist, and upon the public spirit of the individuals who caused it to be executed, it is highly ornamental to the beautiful hall.

The edifice, which with the land beneath and around it, cost the town the sum of sixty thousand dollars, has been called by many, the handsomest building in New England devoted to civic purposes.

Having glanced at the principal subjects connected with the town of a public or municipal character, let us for a moment look at what there is worthy of attention in the pursuits of its inhabitants, and the results which have attended the exertions of individuals and corporate bodies.

We have already spoken of that pursuit which forms the principal business of the town. A few details are wanting to give a complete idea of its extent, character, and results.

The number of vessels belonging to the town, engaged in the whaling business, is *two hundred and fifty-one*. They are all ships but five. Collectively they measure *eighty-two thousand one hundred and sixty-two tons*.

These ships are navigated and their operations carried on by crews

*No longer so.*

numbering, on an average, not far from thirty men each. This makes the number on board the fleet above seven thousand, as has already been stated.

These vessels, averaging them, have cost the owners more than thirty thousand dollars each. This of course includes the cost of the outfit. At this low estimate, then, the value of the New Bedford whaling fleet is *seven million five hundred and thirty thousand dollars*.

Add to this the value of the wharves, and oil, and candle factories, and the coopering, blacksmithing, boat building, warehouses, and other mechanical establishments directly connected with, and dependent upon, the whaling operations, and we shall find that the amount of capital engaged in the business of *catching* oil from this town alone, will vary but little from *nine millions of dollars*.

During the year 1844, there was brought into the port by the New Bedford fleet —

|                        |                        |
|------------------------|------------------------|
| Sperm oil,             | 54,509                 |
| Whale oil,             | 102,992                |
| Making an aggregate of | <hr/> 157,501 barrels, |

Or four million nine hundred and sixty-one thousand two hundred and eighty-one and a half gallons. During the same time, nine hundred and seventy-eight thousand five hundred and ninety-two pounds of whalebone were imported. The value of the importation is ascertained as follows :

|                                                              |                      |
|--------------------------------------------------------------|----------------------|
| 1,717,033½ galls. sperm oil, at 90 cents,                    | \$1,545,330.15       |
| 3,244,248 “ whale oil, “ 75 cents,                           | 1,175,486.80         |
| 978,592 pounds whalebone, “ 35 cents,                        | <hr/> 342,507.20     |
| Total value of the product of the fishing for the year 1844, | <hr/> \$3,063,324.15 |

More than three millions of dollars. About one third of this amount is paid to the crews of the ships.

Up to the 25th day of July, of the present year, the importations have been

|            |                  |
|------------|------------------|
| Sperm oil, | 35,461           |
| Whale oil, | <hr/> 68,101     |
|            | 103,562 barrels, |

And about seven hundred thousand pounds of whalebone. At the same prices the value of the receipts this year up to the above named date is \$2,001,235.27½, more than two millions of dollars.

In the year 1843 the results of the fishery were as follows :

Whole number of barrels of oil,

|            |                  |
|------------|------------------|
| Sperm oil, | 61,066           |
| Whale oil, | <hr/> 40,922     |
|            | 101,988 barrels, |

This importation, with the whalebone which was brought in the same year, about 360,000 pounds, was estimated to have been worth two million three hundred thousand dollars.

On the first day of January, 1844, the number of ships in the fishery was two hundred and nineteen, measuring 69,703 tons. The number is now two hundred and fifty-one, measuring 82,162 tons, showing an increase in about a year and a half of thirty-two ships, and in the tonnage 12,459 tons; about 15 per cent. in the number of vessels and 18 per cent. in the amount of tonnage.

The district of New Bedford includes the towns of Dartmouth, New Bedford, Fairhaven, and Rochester.

There are belonging to the district, one hundred and seventeen thousand five hundred and sixty-nine tons of shipping.

This shows it to rank as the fourth tonnage district in the United States: New York, Boston, and New Orleans exceeding it. New Bedford alone has more than double the amount of registered tonnage owned in Philadelphia.

|                                           |                     |
|-------------------------------------------|---------------------|
| In the district the registered tonnage is | 108,640 tons.       |
| Enrolled tonnage is                       | 8,929 tons.         |
|                                           | <hr/> 117,569 tons. |

In the year 1835, August 1st, the tonnage of the district was but 73,982 tons.

On the first day of January, of the present year, there were employed in the whale fishery, from the United States, 643 ships, 35 brigs, and 17 schooners and sloops. The tonnage was 218,655 tons. Since that time there has been a considerable increase. The number of vessels now engaged in the business is about 720.

The manufacture of the products of the fishery forms one important part of the business of the town. Much of the sperm oil imported is prepared for use by the different processes by which *spring*, *summer*, *fall*, and *winter* oil, (as the different kinds are called, according to the season when the oil is pressed,) are produced, before it finds its way to the various markets of the country: and from the spermaceti, an article exclusively the product of the spermaceti whale, is manufactured the spermaceti candle, so universally admired and esteemed for its pleasant light. There are about twenty oil and candle manufactories in the town, most of which are in operation. A large amount of capital is invested in this branch of business, and several hundred persons find regular and healthful employment in connexion with it. A large portion of the *right* whale, or, as it is generally called, whale or black oil, is exported to the north of Europe. The manufacture for the purification of this kind of oil is carried on to some extent in the town, and more extensively in the country, the high price of sperm

oil causing it to be much used in lamps as a substitute for the purer and dearer article.

Much of the sperm oil is consumed in the various manufactories of this country and England. It is thought, by some, that the time is not far distant when the whole importation of this article will be required for the purposes of oiling machinery. Nothing has yet been found which can be used as a substitute for pure sperm oil upon delicate machinery.

It will be readily seen that the prosecution of the business in which New Bedford is engaged, must necessarily give employment to a large amount of labour not immediately connected with the operations of procuring the oil.

Many of the ships belonging to the town have been built there, and no better ships float the ocean than those which have been launched from the ship yards of New Bedford and the neighbouring town of Fairhaven. The business of repairing the ships gives employment to a large number of shipwrights, and before anything is done towards placing on board the whaler the outfit for her voyage, calkers, riggers, sail-makers and painters find a demand for the exercise of their respective crafts.

But our space will not allow us to enter into the details of the operation of fitting out a whale ship. The amount of from two to five thousand barrels or casks are required for each vessel, and while Michigan supplies the staves, and Fall River, Wareham, and Taunton furnish the hoops, New Bedford mechanics supply the labour which puts the raw material into a shape to fit it for the use of the whaler. The thousand whale boats which are now hanging upon the cranes of the gallant ships, or which are driven forward by their hardy crews, in pursuit of the ocean monsters, are all the product of the New Bedford workshop.

The irons which fasten the whaler to his victim, and the lance which gives the death blow and ends the contest, are wrought by the skill and industry of New Bedford artisans.

Largely have the mechanics and labourers of this thriving town shared in the benefits which have crowned the whaling enterprises of the inhabitants. We may be mistaken, but from the observations and inquiries which we have been enabled to make, we have arrived at the conclusion that there is not a town in New England where so large a proportion of the property is held by what are generally termed the working men, the mechanics and labourers of the place. Take the men on board the ships, who we have seen number over seven thousand, and add to them the men, women, and children who, upon the shore, are engaged in some one of the numerous vocations directly connected with the whaleman's operations, and it will be found, that in the New Bedford whaling business and its various branches, daily

employment is given to more than ten thousand persons. Add to these the great numbers who, in various parts of the world, are furnishing the materials which are demanded, and the supplies which are consumed, in the prosecution of the fisheries, and those who find employment in the disposition which is made of the profits of the business, and the aggregate would present astonishing and gratifying evidence of its magnitude and importance.

In connexion with this branch of our subject we would notice the cordage manufactory recently put into operation. The moving force is two steam engines of twenty horse power each. About seventy-five persons are employed, half of whom are females. Not far from four hundred tons of cordage are annually manufactured.

Our remarks in relation to the business of the place, have thus far been confined to those pursuits directly appertaining to that branch of industry in which the inhabitants are so generally and so deeply engaged. To give a faithful picture of the industrial aspects of the town, we may add a word in relation to other business operations.

Steam, as a moving power, is fast increasing here. Two planing machines, a manufactory of looking-glasses and picture frames, two mills for grinding grain, several blacksmithing and carpentering establishments, and a manufactory of Prussian blue, from which a beautiful article is turned out, are to a greater or less extent in operation through the instrumentality of the steam engine. An extensive establishment for the manufacture of linseed oil, by steam, will go into operation in a few weeks. The business of making paper hangings is carried on. Carriage making, to an annual amount of fifty thousand dollars, employs quite a number of mechanics. The products of their industry are all consumed in the town. The large number of livery stables, and the somewhat unusual number of individuals who keep their own carriages, make this branch of business extensive and profitable.

The New Bedford Marine Railway and Wharf Company have a capital of fifty thousand dollars, and on a small island owned by them, separated from the busiest part of the town by a narrow channel, and connected with it by a portion of the bridge, one mile in length, which unites New Bedford with the opposite town of Fairhaven, they have, beside wharves, warehouses, dwelling-houses, and mechanics' shops, a marine railway, which affords great facilities for cleaning and repairing the smaller class of vessels. The two individuals who compose that company are extensively engaged in dredging operations in various parts of the country, as well as in their own town. They have machines in operation, several of them moved by steam power, in Canada, and in four different States of the Union.

The New Bedford Institution for Savings holds funds to the amount

of four hundred and twelve thousand dollars. The number of depositors is nineteen hundred and forty.

There are four banks, the united capitals of which amount to thirteen hundred thousand dollars. These corporations severally own the buildings in which they are kept. That occupied by the Merchants' and Mechanics' Banks, is a fine structure of brick, with a front of hewn granite from the Fall River quarry. The pillars and other ornamental work of the Town Hall are of the same material. This granite has been thought, by some, to be superior to that procured at Quincy.

There are now but two insurance offices in the town, both conducted on the mutual principle. Four stock offices are now winding up their affairs. One of these, the Merchants', presents an example of successful operation seldom exhibited. In September next, it will be twenty years since it commenced business. Funds for a dividend at that time are now on hand. The company will then have paid out to its stockholders, upon a capital of one hundred thousand dollars, *three hundred and eighty thousand dollars*, or nineteen per cent. per annum, and have its whole capital and a small surplus remaining. It now has but few risks out, all of which are re-insured.

The New Bedford and Taunton Railroad is twenty miles long. It connects the two places whose names the corporation bears, and was constructed at an expense of four hundred thousand dollars. Nearly all the stock is owned in New Bedford, the managers are residents in that town, and so successful has it been in its operations that the stock is now held at twenty-five per cent. advance.

A glance at the benevolent, religious, and educational aspects of the place will finish our sketch of this village of the whalers.

Among the benevolent undertakings of the inhabitants, the first in importance is that which is sustained by the New Bedford Port Society. They have built a church, a small, but neat, wooden edifice, where services are every Sunday performed by a minister, who, in addition to his labours on that day, is expected to devote nearly all his time to the promotion of the temporal and spiritual welfare of the sailor. An evening meeting is held once a week. A registry office is connected with the "bethel," and its pages are often the means of giving, to distant friends and relatives, information of those who wander from their homes and seek employment upon the decks of the whale-ship. This society has a lady's branch, which has established a clothing store, where the sailor is sure to find well made articles of apparel, and which have the additional recommendation of being, for the most part, the work of the wives, widows, and daughters of the seaman.

For an Orphan's Home, a convenient dwelling has been purchased, where the children reside under the care of a matron and school-mistress. This establishment, under the supervision and control of the

society of females, by whose energy and benevolence it has been established and sustained, bids fair to be a highly useful institution.

The Bible Society is a branch of the American Institution. Its operations have been, for the most part, confined to the supply of the destitute sailors, and of such as might be found without the scriptures within the limits of the town. No ship leaves the harbour of New Bedford without a supply of Bibles for all on board.

The Benevolent Society, and the Dorcas Society, in a quiet unobtrusive way, seek out and relieve the destitute and the suffering. By far the largest part of the benevolent operations of the town are sustained by the efforts of females, and a weekly gathering at the Town Hall, at which the industry and kindness of the New Bedford ladies are exercised for the relief of sickness and privation, presents a sight far more attractive than the crowded drawing-room or festive hall.

The only literary societies, are the New Bedford Social Library Association, and the New Bedford Lyceum, both incorporated institutions. The latter is confined to a provision for a course of lectures during the winter. It has a small amount of funds, the income of which, with the annual payments for tickets, are more than sufficient to compensate the lecturers and provide a room for their accommodation. It has been in operation about seventeen years.

The Library Association is a much older institution. From a small beginning, in the infancy of the town, it has "grown with its growth, and strengthened with its strength," until it has arrived at a position of stability and usefulness highly gratifying to its friends and creditable to the community. Its library contains five thousand four hundred volumes, and every year witnesses an increase. The books are allowed to be taken out by the proprietors, and an annual assessment furnishes the means of adding to the number and of paying the expenses of the institution.

We have already spoken of the public schools. An interesting fact, connected with them, is the establishment of a public library exclusively for their use. By the enlightened liberality of the state and the town governments, a fund has been provided for a school library, which already numbers two thousand volumes. By a judicious decision of the school committee, the means placed at their disposal were concentrated in the establishment of one library, instead of being divided among the different schools, as has been generally the case in the towns of the state; and the committee room in the Town Hall, fitted up for the purpose, makes a neat and convenient place of deposit, and delivery to the children, for whose benefit the books have been purchased.

There is one other library in the town. It belongs to the Friends' Academy, and contains two thousand volumes. This academy is an incorporated institution, and, in addition to the use of the books, the

*to be given to the Public.*

pupils have the advantage of a valuable philosophical apparatus. The academy building is delightfully situated on the rising ground in the west part of the town, and in the centre of a large inclosure beautifully set out with ornamental trees. The corporation has a fund which in part supports the institution. The names of the late William Rotch, of this town, and of Samuel Elam, of Newport, are associated with this academy as its early patrons and benefactors. Its pupils are now exclusively females.)

The adherents of almost every shade of religious belief are to be found in New Bedford. Twenty-one different houses of public worship exist within its limits. The Methodists, including a society of coloured persons and one of Reformed Methodists, have five, the orthodox Congregationalists have four, the Baptists, Friends, Episcopalians, Unitarians, Universalists, Roman Catholics, and Mormons, have each one, and the Christians, so called, have five. Two of the latter are owned and occupied by societies of coloured persons. Last Sunday, (we write August 6,) it is believed that there were twenty-four different religious gatherings in the town. The Come-outers and Millerites have regular meetings, and there is a small gathering of Friends who harmonize in sentiment with those who are familiarly known as the Hicksite portion of that body.

The churches of New Bedford are nearly all built of wood. The Unitarian and one of the Congregational churches are of stone, and the Friends' Meeting House is a large edifice of brick. Several of them are costly buildings, and they are generally neat and kept in good order.

We might extend our notice, as there are several subjects of interest to which we have not alluded; but we have already extended our article far beyond our original intention. Our object has been to exhibit this community in its industrial aspect; to give an example of the growth of a town, and of a large accumulation of capital, by the well-directed enterprise and industry of its inhabitants. Let it be remembered that the wealth which we have seen, as belonging to the people of New Bedford, has been accumulated by its inhabitants. It has not been the result of foreign labour, or the capital of non-residents invested in the business of the place. In this point of view, it presents us with an example of successful enterprise, which has but few parallels in this, or any other country. And those who read our hasty sketch of the town will agree with us in the opinion, that our people have no reason to be ashamed of the disposition they have made of the means which have been placed at their disposal.

## XXI.

# WHALERS DESTROYED BY THE CONFEDERATE CRUISERS.

Following is a list of whaling vessels destroyed by the Alabama and other rebel cruisers during the rebellion, with the amount of oil on board. All except the first three named were captured by vessels fitted out from the British dominions.

1861.

| 1 Westport vessel,                |              | 155       |           |
| 1 Edgartown vessel,               |              | 250       |           |
| 6 Provincetown vessels,           |              | 290       |           |
| 1 Warren vessel,                  |              |           | 100       |
| 3 New London vessels,             |              |           | 400       |
| 3 San Francisco vessels,          |              | 275       | 150       |
| 2 Honolulu vessels,               |              | 300       |           |
| 46 vessels.                       |              | 5192      | 5060      |

No port has suffered as severely during the war as New Bedford, in proportion to the amount of shipping owned.

By a rough estimate the value of the vessels destroyed is \$1,150,000,

and of the oil \$500,000; making the whole damage to the whaling interest by the acts of rebel pirates \$1,650,000.

---

## XXII.

## THE NEW BEDFORD FREE PUBLIC LIBRARY.

[This sketch of the history of the New Bedford Free Public Library was prepared to accompany the volumes of its reports sent to the Centennial Exposition.]

The Commonwealth of Massachusetts, recognizing from the earliest period of its history the educational influence of public libraries, gave the assistance of its legislation in the promotion of their establishment and management.

Early in the present century, laws were enacted giving corporate powers to the proprietors of Social Libraries, many of which had been established in various parts of the Commonwealth; and under the provisions of the law the number was increased, their condition made permanent, and their management rendered convenient and effective.

But a few years after the incorporation of the town of New Bedford, the want of books and the inability of most of the inhabitants to procure them, led to a combination of effort for that purpose.

The early settlers of the village of Bedford were intelligent as well as industrious, frugal and virtuous. They were so far enlightened as to understand the value of books, and they saw clearly that the remedy for individual inability to procure them, was such a combination of means and efforts as would render the united ability the property of each.

Several such combinations were formed in New Bedford previous to the passage of the act conferring upon them corporate powers.

The proprietors of Dobson's Encyclopædia were the earliest to form this social and profitable arrangement. For our unlearned and isolated people this work was a library in itself. Eagerly and thoroughly were its pages read and consulted; and the well-worn volumes, now in the Free Public Library, bear testimony to the fact so creditable to the people of the village.

The Library Society followed. This was a more comprehensive effort. The desire for books had outgrown the ability of Dobson to satisfy. New Bedford was fortunate in having among its people, men who could give a profitable direction to that intelligence which needed the assistance of books to supply its craving for gratification and increase. In this respect the young and prosperous community was favored beyond the average, in that day, of villages whose population was mainly composed of toilers in the workshop and upon the sea.

The Social Library followed. This was a vigorous, well directed, and well managed association. The good sense of all recognized the wisdom of combination, and in the union there was found strength. The three associations were united, and the New Bedford Social Library had a long, prosperous, and profitable career. Its collection of books was never large, never exceeding five thousand volumes; but such was the care and intelligence bestowed upon their selection that it was well and truly said of it, that take those five thousand volumes out of it, the libraries of the world could not supply their place with other books as well adapted to the wants of such a community.

When the passage of the State law allowed the proprietors to become a body corporate, advantage was taken of its provisions. For nearly half a century, this valuable collection of books was the principal source whence was supplied the desire of the people for knowledge and intellectual recreation. "Library-day" was always a welcome day. There was in attendance generally a large number of intelligent seekers; and the result of that intercourse with books for which this library provided was a marked and most promising and interesting feature in the characters of the young men and women of New Bedford.

Thus speaks the poet of that early day, which to us of the present may seem the "day of small things" in the intellectual history of our city.

I warm to think, as this bright scene I scan,  
How it has ended, how it first began.  
Far from this crowd of manhood and of grace,  
I wander back o'er half a century's space.  
The little town, in sombre garb arrayed,  
Gleams still through flaunting fashion and parade;  
I see its fathers, prudent still, yet fain  
To grow in learning as they grow in gain.  
Happy for us, this simple truth they knew,  
That cash is good, but culture something too.  
All books were scarce; most books were somewhat dear,  
Yet how they sowed the far-brought treasure here!  
True to their time, but truer to ourselves,  
Think how editions gathered on their shelves!

'T was nobly done, to make the school-house free!  
A nobler school-house, fitly founded, see!

Not that all lore from reading can be had,  
 For too much reading sometimes makes us mad;  
 But education, still a life-long friend,  
 Goes on with life, with that can only end.

To join together all that makes refined  
 The wisdom, art and fancy of mankind;  
 To lend to all who hither come to read  
 The utmost help to meet their utmost need;  
 What ampler work could ample fortune do,  
 To self, to city, to the world more true?  
 A hundred glorious gardens here we find;  
 Oh, culture still this garden of the mind!  
 Oh, plant and water, dear as wealth unbought,  
 The flower of fancy and the oak of thought!\*

It was an easy and natural step from the law granting corporate powers to social libraries, to that by which the towns and cities of the State were allowed to establish municipal libraries, and to raise by taxation the means for their purchase and support.

That act had its origin in the fundamental principle, that the State should provide for the education of the people. Under the influence of this Harvard College had been established, and the public school system had become an integral part of the public polity. The act by which the several municipalities were allowed to establish free public libraries, had its origin in the idea that this State guardianship and legislation, to be perfected, should be complemented by a provision for the extension of the educational period into adult life,

It was seen

“That education, still a life-long friend,  
 Goes on with life, with that can only end.”

The adult school and the free public library are both the offspring of the educational policy of the Commonwealth founded by the Puritans.

This intimate and complemental connection between the schools and the library was clearly apprehended and stated by the trustees of the New Bedford Free Public Library. Under this point, in their second annual report, they use the following language.

“Our library has become one of the institutions of the city.

“It has become a valuable, and will soon be considered as an indispensable auxiliary in the work of popular education.

“It has become incorporated both in idea and in fact, into the catalogue of subjects demanding the fostering care and annual support of the municipal government.

“Its claims for such attention and support are founded upon principles which lie at the foundation of our republican institutions.

\* Charles Taber Congdon's poem at the laying of the corner stone of the Library Building.

"To train and enlighten the public mind is a work to which a liberal portion of the public wealth must be devoted; and as being in harmony with this idea, and as the cap-stone of our system of public education, the Public Library has claims upon all whose aim is the promotion of the general welfare.

"Such was the *theory* when the work was begun by the state and completed by the city, — such is now the *fact*, demonstrated by our experience and placed beyond the reach of doubt or cavil."

THE ACT TO AUTHORIZE CITIES AND TOWNS TO ESTABLISH AND MAINTAIN PUBLIC LIBRARIES was passed by the General Court of Massachusetts, May 24, 1851.

THE ORDINANCE FOR THE ESTABLISHMENT AND GOVERNMENT OF A FREE PUBLIC LIBRARY, in New Bedford, was passed August 16, 1852.

The first movement in the undertaking was an unsuccessful one. It was made in the City Council July 8th, 1851, by Warren Ladd, then a member of the popular branch of that body. The order was only to consider the expediency of the measure. It passed the Common Council without a dissenting voice, but the Aldermen nonconcurrent. It will be seen that this movement was but *forty-five* days after the passage of the enabling act.

On the 27th of May, 1852, a large petition, headed by James B. Congdon, was presented to the Council.

This movement originated with a society of young men, called the Union Debating Association. This society, at a meeting held April 6th, 1852, in connection with a preamble declaratory of the conviction that a free public library would be of great advantage to the young men of the city, passed the following resolution.

"*Resolved*, That this Association cause petitions to be circulated praying our municipal authorities to establish such an institution."

The petition was referred to the Committee on Public Instruction, who reported on the 14th of June. They recommended an appropriation of fifteen hundred dollars for the establishment of the library.

In their report, the committee attach great importance to the fact that they had been assured that "provided the authorities should, by the passage of the order making the appropriation asked for, establish the principle, that the maintenance of a free city library for the continuous education of the people will be the settled polity of the city," the *five thousand* volumes of the New Bedford Social Library would be transferred to the city.

Quoting the words of James B. Congdon, through whom this offer of the proprietors of the library was made, they say, "With such a foundation to build upon, with the appropriation now prayed for to give it a position for immediate and extended usefulness, the library would open to our inhabitants the means of innocent enjoyment and

of valuable acquisition, and be a source of commendable pride to our citizens."

But the Free Public Library had, in fact, been established before the presentation of the report. The appropriation bill for the year which had already passed, contained an item of *fifteen hundred* dollars for the library. Councilman Pitman,\* who was a member of the committee to whom the petition was referred, had anticipated the favorable action of the council, and had introduced and carried an amendment to the bill making the appropriation as above stated. This amendment was made previous to the presentation of the report of the committee. The appropriation bill passed July 20, 1852. *The date of the adoption of that amendment is the date of the establishment of the New Bedford Free Public Library.*

The library was opened for the use of the people and the delivery of books on Thursday, the third day of March, 1853.

The ordinance establishing the Boston Public Library was passed October 12th, 1852, and the doors were opened for the delivery of books on the 2d day of May, 1854.

The number of volumes at the opening was between five and six thousand.

It is an interesting and creditable fact, that the New Bedford Free Public Library is the only public library established under the law of 1851 excepting that in Boston, noticed by Edwards in his elaborate "Memoirs of Libraries" published in London in 1859. The following extract is from the second volume of that able work. After reciting the provisions of the law, the author proceeds as follows:

"The first town to take action under this Statute was New Bedford, by whose Council a Free Public Library was established in August, 1852. The proprietors of a Subscription, or 'Social Library' transferred their collection to the new foundation, which was opened for public use on the 3d of March, 1853, with about 6000 volumes. This number has been, within about three years, increased to 9000; and in their fourth report, the Trustees are enabled to affirm that 'it is undoubtedly true that no Act of the municipal authorities of New Bedford has reached with its recreative and improving operation so large a part of our population, and probably none has ever met so universally and deeply the approbation of the people. A Free Public Library is the crowning glory of the system of public education, which has been from our earliest history the pride of Massachusetts.' In a Report of the preceding year there is a passage bearing on a point which is always interesting in connection with the present subject—that of the selection of books: 'While care has been taken,' say the Trustees, 'that no publication injurious to the public morals should find a place

\* Hon. ROBERT C. PITMAN, one of the judges of the Superior Court of the Commonwealth.

upon our shelves, we have endeavored to divest ourselves, in our efforts to place before our fellow-citizens the means of a more extensive and genial culture, of all narrow and sectarian partialities. In this report we are gratified to be able to state that no difference of opinion has for a single moment interrupted the harmony and unanimity of our proceedings.' ”

The State law and the City ordinance under the authority and direction of which our Free Public Library was established are models of comprehensive brevity. The one contains twenty and the other twenty-seven lines—about one printed page. The law gives the power to assess a tax for library purposes, and contains the following important provision.

“Any town or city may receive in its corporate capacity, and hold and manage, any devise, bequest or donation, for the establishment, increase, or maintenance of a public library within the same.”

The ordinance provides for the election of trustees, and confers upon them all the powers necessary for the establishment and management of the library.

The number of trustees was originally six, three *ex-officii* and three at large, chosen annually. A change has been made by which the number at large is increased to six, two being chosen every year for three years. The *ex-officii* members of the board remain the same, — the Mayor, who is president, the President of the Common Council, and the Chairman of the Joint Standing Committee of the City Council on Public Instruction.

Robert C. Ingraham was appointed librarian, and the library has had no other. At first he had no helper. It was soon found necessary to provide an assistant, and he now has two, both ladies.

The Rules and Regulations first established are contained in the first Report. They have been twice changed. Those now in force will be found in the twenty-second annual Report. In accordance with their provisions, a superintendent has been added to the officers of the library.

From this starting point, it will be interesting to consider the history and progress of the library, under the more important aspects in which they are presented in the reports and other publications.

They may be arranged as follows :

The books, their number, character, and rate of increase.

The pamphlets and newspapers.

The Library building.

Donations : books, pamphlets, pictures.

Trust funds.

Reports.

Dartmouth Centennial.

Catalogues, bulletins, and advertisements.

We have seen that the library was opened with about six thousand volumes upon its shelves. Five thousand of these were from the Social Library. It is due to the memory of the enlightened and conscientious men who were active in the establishment and management of that library again to call attention to the high character of its collection. To those upon whom it devolved to take charge of it after it had become the property of the city, this elevated character of the former managers and of the books which their scrupulous integrity and enlightened zeal had gathered were well known; and both the men and the books had an important influence in the right direction in the selection of the additions the trustees were called upon to make.

The six thousand volumes have, in the twenty-three years which have elapsed since the opening of the library, increased to thirty-four thousand, an average increase of a little more than twelve hundred volumes annually.

It is not within the scope of this brief notice of the institution, to enter into such an examination of the works which are found upon its catalogue as will enable the reader to obtain a very decided idea of its distinctive character or relative position.

Its managers have always kept in view the fact, that a public library must be a popular library; and one result of a steady regard to this idea has been, that with the exception of two or three hundred volumes the books are all in the English language. This fact should be considered in connection with that of the number of volumes it contains.

The managers have not felt at liberty to apply the means at their disposal to the purchase of costly publications, — costly because rare, or because of the expensive character of their binding, illustration, or ornamentation. The library is not without many such productions, but they have been obtained mainly by the direct or indirect agency of its benefactors.

In natural history and periodical literature it is distinctively rich; and it has been, from the beginning, the aim of the managers to devote a liberal share of their means to the collection of such works as are valuable to the artist and the artisan in the attainment and practice of their respective occupations.

One room is devoted to the public documents of the state and nation, in which the collection, although not perfect, is very full.

The voluminous issues of the Patent Office are all upon the shelves.

The publications of the Smithsonian Institution are all to be found there.

The series of the London Art Journal complete, with a large number of illustrated works devoted to a description of art, ancient, mediæval, and modern, give evidence that the managers have recognized and acted upon the fact of the educational and elevating influence of the

beautiful. The income of one of the funds for the increase of the library has been wholly devoted to the purchase of this class of publications.

The number of pamphlets is about eight thousand. Most of them are arranged according to their subjects, so as to be conveniently consulted. From the opening of the library, constant efforts have been made to collect and arrange the publications of a local character. The publications of the municipal government, both town and city, are complete.

The library does not possess an extensive collection of newspapers. Most of those it holds are of a local publication, and some of them are complete and very valuable.

The New Bedford Mercury was first published in 1807, only twenty years after the incorporation of the town, and is still issued. *Eighty-six bound volumes* of this valuable publication were presented by Benjamin Lindsey, who was its publisher from 1831 to 1862. For nineteen years it was published by his father, and five years by the father and son. The issues since Mr. Lindsey's liberal donation have been added.

To Mr. Lindsey the library is also indebted for a volume of the Christian Philanthropist, a weekly paper published in New Bedford about half a century ago, containing all the numbers.

The Daily Evening Standard, a valuable and successful newspaper, is among the highly prized possessions of the library. In 1862, *eleven bound volumes* were presented to the institution by its publisher, Edmund Anthony. It was established by him in 1850, and all the issues are now to be found in the library.

The beautiful building now occupied by the New Bedford Free Public Library was erected in 1856-7. Its cost was about forty thousand dollars. It is built of brick, with granite underpinning and steps and free-stone ornaments. A view of the building accompanies this volume.\*

The corner stone of the Free Public Library building was laid on the 28th of August, 1856. The published account of the simple but interesting ceremonial makes a part of the collection to which this brief sketch is an introduction.

The principal exercises were an introductory address by George Howland, Jr., Mayor of the City, an address by James B. Congdon, and a poem by Charles T. Congdon of New York.

In the address of Mr. Congdon, as well as in several of the annual reports, the positions are assumed that the Free Public Library of New Bedford was the first established by order or ordinance under the law of 1851; the first from which books were issued under said

\*The volume of reports.

law; that the Library Building was the second whose construction was commenced after its passage; and that prior to its establishment and the delivery of books therefrom, there had never existed a library established and wholly supported and managed by a municipality, free to all the inhabitants, its books for the use, at the library or at home, of all the people without payment or pledge.

Mr. Congdon in his address brings vividly forward the men who had been active in the earlier efforts to secure to the people the benefits of a library, and makes honorable mention of those whose intelligent activity had been crowned by the establishment by the city of the New Bedford Free Public Library.

The author of the poem had been a New Bedford boy, and was able to give a very lively description of the prominent features of the old Social Library.

In the appendix to the "Proceedings," and in the notes to Mr. Congdon's address, there will be found a large amount of valuable information, and interesting contributions to the local history of New Bedford.

Of the Library Building the upper rooms only are occupied by the library. The principal room is neat and tasteful in its architectural features and convenient in its arrangements. It has two tiers of alcoves, one on the floor, and one on the gallery which is carried around the whole room excepting on the north end where the stairs lead to it. An iron railing divides the alcoves from the visitors. Reading desks outside the railing contain the periodicals, which are accessible to all; and seated at these desks the visitors are, in addition to these, furnished with any books they may wish to consult. The delivery is at a table at the north end. A stand for newspapers occupies a central position in the room. Six other rooms are occupied for library purposes, four for books, one for the trustees, and one for the convenience of the librarian and his assistants.

The library has had a growth unexpectedly rapid, and at this time the want of more room is severely felt. The want will probably be supplied by removing the public offices and giving the library the whole building, or by enlarging it.

The reports all contain lists of the yearly donations of books, pamphlets, and newspapers, and care has always been taken to notice these accessions and express the obligations of the trustees to their numerous benefactors.

Nearly the whole collection of pamphlets and newspapers are donations.

The contributions of books amount at this time to not less than two thousand volumes.

The most valuable upon the list is a perfect copy of Audubon's Birds

of America. This was the gift of James Arnold. Mr. Arnold and family contributed many other valuable publications.

Audubon's Quadrupeds was contributed by the family of Andrew Robeson.

The care taken to give every donation, whatever its character, its proper place for useful and convenient reference, has led to the preservation and presentation of much reading matter which formerly found its way into the paper-mills.

Under the head of donations it may be well to notice the few pictures which are found in the library. A landscape by William Allen Wall, an engraving of Bierstadt's celebrated painting of the Rocky Mountains, and a chromo of Bradford's "Wrecked Sealer," are the principal pictures other than the portraits. Two of the portraits are in the main library room, one of George Howland, Junior, by Wilson, the other of James B. Congdon, by Eaton. The first named was executed by order of the City Council of New Bedford; the other was a contribution by a large number of the citizens, friends of Mr. Congdon. These portraits are full length and full size, and occupy the north and south ends of the library-room respectively.

The other portraits are hung in the trustees' room, to which they constitute appropriate and cherished ornaments.

A rude unfinished portrait of William Rotch, by an artist by the name of Hinkley, is a sufficiently correct delineation of the benevolent and expressive features of that great and good man to render it valuable in the absence of any other.

The portraits of James Arnold, Charles W. Morgan, and Thomas A. Greene, are all by William A. Wall. The memory of these men, who have long been numbered with the departed, will ever be cherished in the community which was for a long series of years made better and happier by their presence. An engraved portrait of Captain Rowland R. Crocker is highly valued. A glance at the index which accompanies this volume, will show that the names of all these men have had honorable mention in the publications of the trustees of the library.

The Trust Funds established for the benefit of the library are three.

The first upon the list is the **GEORGE HOWLAND JUNIOR FUND**.

Its amount is the sum of two years' salary of George Howland, Junior, as mayor, sixteen hundred dollars. Mr. Howland, in his note accompanying the donation, expressed the wish that the income might be expended for such works as, from their more expensive character, the trustees might not feel justified in purchasing from the limited city appropriation. The condition has been strictly complied with; and many rare and valuable books are now the property of the library by reason of this timely and liberal benefaction.

Under the will of Charles W. Morgan, there was paid to the city by

William J. Rotch, his executor, the sum of one thousand dollars, which constitutes the CHARLES W. MORGAN FUND. The income of this fund has generally been expended in the manner described in the preceding notice. This bequest, with countless other acts of intelligent and warm-hearted benevolence with which the life of this gentleman was crowned, has endeared his memory to the hearts of all the inhabitants of the city.

Under the will of Sylvia Ann Howland, the city of New Bedford was paid the sum of one hundred thousand dollars. The testament of this excellent lady contained the following interesting item.

"I give and bequeath to the city of New Bedford the sum of one hundred thousand dollars; and direct that this sum shall be invested judiciously, under the direction of the City Council, and the income therefrom shall be expended and used for the promotion and support within the city of liberal education, and the enlargement, from time to time, of the Free Public Library."

With the utmost care and deliberation, by the aid of many of the wisest and best minds of our city, an ordinance was framed and adopted by the City Council to carry into effect the provisions of this munificent bequest.

In the twentieth report of the trustees of the library all the proceedings connected with the enactment of this important ordinance are fully set forth, and in various other reports will be found notices and statements connected with its history and administration.

Of this bequest, fifty thousand dollars were set apart for the library, and constituted the SYLVIA ANN HOWLAND FREE PUBLIC LIBRARY FUND. Its income is now the chief dependence of the trustees for the "enlargement" of the library, as the appropriation by the city barely suffices for the salaries and other expenses of the institution.

During the delay which attended the litigation upon the will of the deceased, the funds of the estate largely increased, and in addition to the bequest of fifty thousand dollars which constitutes the fund, about ten thousand dollars was paid into the treasury of the city as interest or income and placed to the credit of the library.

Under the direction of the trustees of the library a plain white marble tablet commemorating this noble act was placed in the principal room of the institution, which is thus described on the twelfth page of the twenty-second report.

"It is surrounded by a frame of tasteful design and of perfect execution. The whole, both in plan and performance, including the site selected for its erection, is one which commends itself to the good sense, the feelings of propriety, and the grateful emotions of the people of New Bedford. The inscription upon the tablet is as follows: 'This tablet commemorates the enlightened liberality of Sylvia Ann Howland, who bestowed upon the city of New Bedford the sum of

two hundred thousand dollars : one hundred thousand dollars to aid in supplying the city with pure water ; and one hundred thousand as a fund for the promotion of liberal education by the enlargement of the Free Public Library, and by extending to the children and youth of the city the means of a wider and more generous culture.' ”

It will be seen by this inscription that the whole amount bequeathed to the city of New Bedford by this lady was two hundred thousand dollars. One half the sum was applied to the construction of the New Bedford Water Works ; the other was equally divided, forming the library and educational funds.

The amount of the several trust funds established for the benefit of the Free Public Library, which have been severally noticed, is fifty-two thousand six hundred dollars.

The annual income is three thousand one hundred and fifty-six dollars.

This income is a vital element in the existence of the library. We have seen that the ordinary annual appropriation is necessarily absorbed by the expenses of management. It is therefore mainly upon the income of the permanent funds that the trustees depend for the supply of books and periodicals, and for the constant renovation which the active use of the books renders necessary.

The simplicity, convenience and effectiveness of the method by which these trust funds are managed, commends it to the approval of every one by whom it has been carefully examined, and has received the sanction of the judicial authority of the Commonwealth.

The city is the trustee. No judicial act was necessary to establish this trusteeship.

The trust was created by the receipt of the money. The ordinance recognizes the trust obligations, fixes the rate of income, and regulates the management. The trustees of the Free Public Library are by the ordinance the agents of the trustee, which is the city. They are held to a rigid conformity to the conditions of the bequest and the requisitions of the ordinance. The routine by which the agents are held to a faithful performance of the trust committed to them, and by which the city authorities are constantly informed, even to the minutest details, of the proceedings of the board of trustees, is a model of order and efficiency.

Should a judicial inquiry at any time be thought desirable, the reports of the trustees of the library would furnish all the needful evidence as to the manner in which the trust has been administered.

It should be remembered that one ordinance regulates the administration both of the library and educational funds. In the case of the latter, the agency is placed with the school committee. They are held to the same careful administration, and subject to the same severe scrutiny as the library board.

The annual Reports of the board of trustees are twenty-four in number. These reports, with the "Corner Stone Proceedings," constitute the volume to which this brief introduction is attached. They make an aggregate of seven hundred pages. As eighteen of the whole number were prepared by the same hand, the general principles of management are made prominent throughout the series, and the character of the facts stated and the methods of arrangement will be found to be harmonious. The annals of but few public institutions have been for so long a period so faithfully presented. They are "short" and they are "simple," but they contain a large amount of valuable information, practical suggestion, and interesting local history. Through them the citizens of New Bedford have had spread before them the operation and condition of their favorite institution, and in this way their faith in its value has been sustained and strengthened, and their zeal on its behalf kept alive and increased.

As the New Bedford public library was the pioneer undertaking, its reports have been widely distributed over the country, and have been found very useful in guiding the efforts of those who have been engaged in the establishment of similar institutions. The encouragement of our success and the aid extended by our methods have in many cases done much towards insuring a favorable result to the public library movements in various parts of the country.

A novel but in one view a highly valuable feature of these reports, is the brief biographical notices that are to be found in the series. The necrology of the Free Public Library Reports contain many notices of the prominent citizens of New Bedford, whose intelligence, integrity, enterprise and benevolence, have endeared their memories to the people and constituted them stirring and influential examples of true Christian manliness of character.

The brief memoirs of Thomas A. Greene, James Arnold, Thomas Mandell, Henry H. Crapo, and others, are not only pleasant and tender offerings to the memory of departed worth, but are pregnant with rich lessons for inciting the young into the paths of wisdom and an honorable distinction, and for their guidance and protection.

We hope that this interesting and valuable feature of these reports will be retained; and that these "discourses of the dead" will not be restricted to those who may have been connected with the library. Let a niche be found for all who, like those whose names have already had honorable mention, shall have left behind them a record, the perusal of which shall revive pleasant memories and prompt to noble deeds.

The celebration of the Old Dartmouth Centennial in 1864 was an event, an account of which may here have a brief mention. Its in-

ception was with the trustees of the library, and its arrangements and success were largely the result of their action and efficient cooperation.

The fullness of the report that was made of the proceedings on the occasion, renders unnecessary any extended notice.

The celebration took place on the 14th of September. Two hundred years before, the old town of Dartmouth received from the General Court at Plymouth its municipal charter. The then new town covered the territory which now includes the towns of Dartmouth, Westport, Fairhaven, and Acushnet, and the city of New Bedford. The municipal authorities of all these places united in the celebration, and numbers of the people of them were present at the exercises.

A few years after the incorporation of the town, and as early as any written record of its public proceedings bears date, King Philip's war laid desolate the new-born municipality. At the close of the first century another desolating war was raging; and, fired by the torches of General Grey's red-coated regulars, who in their lust for liquor and appetite for destruction rivalled the exploits of the red men of Metacom, the thriving village of Bedford and seventy sail of vessels in its harbor became a prey to the flames. Another century passes, and when in 1864, on the arrival of the second centennial period, the people were called together that it might receive an appropriate commemoration, another war, more mournful in its incidents and results than those in which the red men and the red-coats had participated, was desolating the land.

These striking centennial coincidents were used with good effect by the orator and poet, the Honorable William W. Crapo, now member of Congress, and James B. Congdon. The address of Mr. Crapo is a model in its selections, its arrangement, and its pure and eloquent diction. In addition to the incidents of which we have spoken, the speaker presents, in a just and forcible manner, the history of the controversy between the town of Dartmouth and the Plymouth authorities in relation to the support of an Orthodox ministry. The conflict was long and bitter, culminating, on this side of the water, in the imprisonment by the Province Rulers of the selectmen who had refused to obey the mandate of the Court. But the Baptists and Quakers of Dartmouth and Tiverton triumphed. An order of the King in council set the prisoners free and nullified the tax.

The poem of Mr. Congdon presents in a simple but pleasing manner the three centennial epochs. The presence of Major Andre at the raid upon Bedford, as a member of the staff of General Grey, is an incident which the writer has used with good effect.

The account of the "Old Dartmouth Centennial, September 14, 1864," makes a volume of one hundred and thirty pages. It contains much matter of local and permanent interest beside that of which we

have made mention. We have space for the mention of two only of the many items of this valuable compilation.

The address of Governor Clifford, who was present in the double capacity of citizen and representative of the Massachusetts Historical Society, possesses at this time a peculiar interest as being the last ever made by him at a public meeting of his fellow-citizens. Often in that hall and from that platform had he spoken, with a felicity of diction, a grace of manner, and power of expression seldom equalled in our state or country. But he never came nearer to the hearts of our people than he did on this occasion, when, with that beauty of speech and that ease and grace of manner so peculiarly his own, he spoke of the noticeable incidents of our local history. We have never forgotten, and we love now more than ever to remember, the outburst of applause which followed this delightful effort of impromptu oratory.

The old Borough of Dartmouth, England, the fishing community at the mouth of the Dart, gave *our* old Dartmouth its name. Many incidents connected with its name and history made this ancient borough, whose franchise dates back to the reign of Richard Cœur de Léon, closely associated with the commemorative exercises.

An address "To the Mayor, Recorder and Aldermen of the City of Dartmouth, County of Devon, England," had been prepared, and was read to the meeting. Having been signed by the Mayor, Aldermen, Common Councilmen, and Clerk of the city of New Bedford, and by the Selectmen and Town Clerks of the towns uniting in the celebration, and beautifully engrossed, it was sent to its destination.

The time required by its engrossment, and to obtain the large number of necessary signatures of persons dwelling widely apart, brought the end of the year before it could be forwarded.

It was not until WASHINGTON'S BIRTHDAY, 1866, that the Mayor of the city received a response to this greeting from the old Dartmouth of America to the old Dartmouth of Great Britain. But when it was received the delay was not cared for or thought of. The reply was dated on the "FOURTH OF JULY," 1865, was signed by the Mayor, Recorder, Clerk, and Burgesses of the Borough of Clifton Dartmouth Hardness, in the County of Devon, England. One of the councillors bears the significant name of John Bully. It is a well written document, and its tone is kind and manly. In these respects it fully met the circumstances of the occasion and the wishes and expectations of those to whose greeting it was an answer. But the form in which it appeared was a surprise and a delight. Its elegant chirography upon vellum is a picture in itself; and this, with its beautiful illuminations of border and other chaste ornamentation, give the whole a rare, rich, and attractive appearance.

The seal of the city, which occupies a central position upon the parchment, and is one of its chief ornaments, tells most significantly

the story that Richard I of England conferred the franchise upon the borough. Richard's fleet made a rendezvous in the harbor of Dartmouth as he was about to embark upon his crusade to the Holy Land. Upon the seal, Richard's ship rests upon the waters, and the King with crown and sceptre is the occupant. Two stars, one on each side of the King, may be emblems of the two mighty men who were about to contend for the possession of the Holy Sepulchre or of their respective faiths.

Such a missive called for a fitting frame. Our neighbors of Dartmouth provided a log of well seasoned and finely grained white-oak, and the taste of a New Bedford artist and artisan wrought from it a frame in no way unworthy of this beautiful production of our transatlantic brethren. It hangs in the trustees' room of the library, and forms its most attractive ornament. All the documents connected with this pleasant and interesting interchange of courtesies will be found in the fifteenth annual Report.

The Catalogue, which embraces all the books of the library up to March, 1874, is in three volumes. The last, which is the second Supplement, has just been published. The first was printed in 1858, and contains 355 pages; the first Supplement in 1869, 315. The second Supplement just printed has 472, making in all eleven hundred and forty-two pages.

The labor of preparing these volumes and carrying them through the press has all been performed by the accomplished librarian, Robert C. Ingraham. They constitute a monument of his zeal, intelligence, and industry.

Since January, 1874, eight Quarterly Bulletins have been published, which embrace all the books added to the library from that date to December, 1875. These will be continued. In addition to this, as often as a sufficient number of books is purchased, generally once a month, they are advertised, by a brief title, in the daily newspapers.

The following summary statement, which was prepared for publication before the preceding pages were written, will furnish an appropriate close to our brief history of the New Bedford Free Public Library.

#### NEW BEDFORD FREE PUBLIC LIBRARY.

Established by City Council August 9th, 1852, under the law of the Commonwealth enacted May 24th, 1851.

Opened for the delivery of books March 3d, 1853.

Free to all inhabitants of the city.

Number of volumes when opened, . . . . . 5,200

Of Social Library, . . . . . 5,000

Purchased, . . . . . 200

Library building erected by the city 1856, at a cost of . . . \$40,000

Annual expenditure, . . . . . \$7,000

Annual appropriations by the city, and expenses paid by same, 3,844

Income from trust funds, . . . . . 3,156

The income from trust funds is all expended for books.

Catalogue, 1st vol., 1858; 2d, 1869; 3d, 1876. Quarterly Bulletins of accessions from January 1st, 1874. Accessions published in two newspapers.

|                                                   |        |
|---------------------------------------------------|--------|
| Number of volumes, January 1, 1876, . . . . .     | 33,000 |
| All in the English language but about . . . . .   | 200    |
| Number of pamphlets, . . . . .                    | 6,000  |
| Number of periodicals, . . . . .                  | 100    |
| Number of newspapers, . . . . .                   | 18     |
| Volumes taken from the library in 1875, . . . . . | 55,771 |

#### Officers:

Nine trustees, three *ex-officio*; six chosen by City Council, each for three years.

Superintendent.

Librarian, salary, . . . . . \$2,000

Two assistant librarians, (female,) salary of each . . . . . 400

Open, Sundays and legal holidays excepted, every day, from 9 o'clock A. M. to 9 o'clock P. M., with one interval of *two* hours and one of *one* hour.

*Great changes and additions  
since this was printed.*

### XXIII.

#### NEW BEDFORD IN THE WAR.

[From "History of Massachusetts in the Civil War," by William Schouler, late Adjutant-General of the Commonwealth.

This article was written by a citizen of New Bedford.]

NEW BEDFORD.—Incorporated as a town Feb. 23, 1787; as a city, March 9, 1847. Population in 1860, 22,300; in 1865, 20,863. Valuation in 1860, \$24,196,138; in 1865, \$20,525,790.\*

\*This great diminution in valuation was the effect of the war upon the whaling interest.

In 1861, Isaac C. Taber, mayor; Warren Ladd, James L. Humphrey, Nathan Lewis, John P. Barker, Matthew Howland, William H. Reynard, aldermen.

In 1862, Isaac C. Taber, mayor; Warren Ladd, Bethuel Penniman, Jr., Nathan Lewis, John P. Barker, Matthew Howland, William H. Reynard, aldermen.

In 1863, George Howland, Jr., mayor; Warren Ladd, George G. Gifford, Ambrose Vincent, John P. Barker, Matthew Howland, John H. Perry, aldermen.

In 1864, George Howland, Jr., mayor; Warren Ladd, George G. Gifford, Ambrose Vincent, John P. Barker, Matthew Howland, John H. Perry, aldermen.

In 1865, George Howland, Jr., mayor; Warren Ladd, George G. Gifford, Joseph Knowles, George F. Kingman, Matthew Howland, John H. Perry, aldermen.

The city clerk in 1861 and 1862 was Sanford S. Horton; in 1863, 1864, and 1865, Henry T. Leonard. The city treasurer during all the years of the war was James B. Congdon.

1861, April 19th. Five thousand dollars was appropriated for the benefit of the "City Guards," to be expended under the direction of the mayor and a committee of the city council. Ten thousand were appropriated for the formation of a Home and Coast Guard. [See Thomas R. Rodman.] The American flag was ordered to be displayed from the City Hall until otherwise ordered.

July 15th. A report was received, showing that Fort Phoenix in Fairhaven, and Fort Taber in New Bedford, mounting eleven guns, had been manned by the Home Guard, and recommending an additional appropriation to maintain the same; and on the 29th of July five thousand dollars was appropriated.

September 5th. The mayor was authorized to organize one or more companies "for the national army," the bounty to each member not to exceed fifteen dollars.

November 20th. Fifteen hundred dollars was appropriated for State aid to soldiers' families.

December 15th. Five thousand dollars was appropriated for the payment of soldiers' bounties.

1862, January 3d. A report was made that three companies of volunteers for three years' military service had been organized.

January 4th. This being the close of the municipal year, a report and resolution complimentary of the outgoing mayor, Hon. Isaac C. Taber, were unanimously adopted.

July 10th. Seven thousand five hundred dollars was appropriated to establish a General Hospital for sick and wounded soldiers, provided the General Government should "decide to locate one in this city."

Voted, To pay a bounty of one hundred dollars to each volunteer who enlists for three years' military service, to the credit of the city. Twenty-six thousand dollars was appropriated to pay the same. The use of the spacious City Alms House, capable of accommodating three hundred sick and wounded soldiers, was offered to the General Government, which offer was respectfully declined.

August 18th. The bounty to volunteers was increased to two hundred and fifty dollars; and twenty thousand dollars was appropriated to pay the same.

August 29th. Voted, To pay a bounty of two hundred dollars to each volunteer for nine months' service. Twenty-five thousand dollars was appropriated to pay said bounties.

October 21st. A further appropriation of five thousand dollars was made for the Home and Coast Guard, and twenty thousand for military bounties, which, on the 13th of December, was increased by a loan of twenty-six thousand dollars.

1863, February 26th. The city council adjourned "for the purpose of" paying their respects to Governor Andrew and General Wool at the city hall."

March 4th. State aid was directed to be paid to the families "of colored citizens who shall be mustered into the service of the United States."

April 9th. Two hundred dollars was authorized to be expended on the enlistment of a company of heavy artillery, which, on the 21st of May, was increased to one thousand dollars.

July 15th. "A watchman was discharged for using seditious language."

July 30th. State aid was directed to be paid to the families of drafted men. "Ordered, That the bell be rung and a salute fired on the day of the Public Thanksgiving on the 6th of August."

September 21st. The treasurer was directed to pay the treasurer of the Commonwealth \$15,450.68, "under the laws in relation to the reimbursement of bounties."

1864, November 17th. Voted, That the full taxes of the returned soldiers belonging to New Bedford be remitted.

1865, January 7th. Appropriate resolutions were passed in regard to the death of Hon. Edward Everett, and ex-Gov. John H. Clifford was invited to deliver a eulogy on the life and character of the deceased.

February 7th. The mayor recommended the ringing of the bells and the firing of one hundred guns in honor of President Lincoln signing the emancipation proclamation.

April 10th. A committee was appointed to make arrangements to celebrate the fall of Richmond and the surrender of General Lee.

April 15th. A message was received from the mayor making an

official announcement of the death of President Lincoln, and a committee was appointed to consider and report upon the proper measures to be taken in regard to it. The committee reported a series of appropriate resolutions, which were adopted.\*

June 22. Alderman Gifford presented to the council a rebel flag captured at Charleston, S. C., Feb. 18th, 1865, and sent to him by Captain James W. Grace, of Company C, Fifty-fourth Regiment Massachusetts Volunteers (colored.)

New Bedford furnished about *thirty-two hundred* men for the war, which was a surplus of *eleven* hundred and ten men over and above all demands.†

One hundred and twenty were officers in the military service. We do not know the number who served in the navy. The whole amount of money appropriated and expended on account of the war, exclusive of State aid, was one hundred and seventy-seven thousand dollars.

The amount of money appropriated and expended by the city during the four years of the war for State aid to the families of volunteers, and which was afterwards refunded by the Commonwealth, was as

\*The following are the proceedings of the City Council on the occasion of the death of President Lincoln. As far as is known, the resolutions which follow were the first adopted by any municipal body in relation to that mournful event.

IN COMMITTEE, April 15th, 1865.

The committee appointed to consider of and report what action it will be proper for the Council to take in relation to the communication of the Mayor presented at this time, have attended to the duty assigned them, and ask leave to report the accompanying Preamble and Resolutions.

For the committee.

WARREN LADD, Chairman.

WHEREAS, It has been permitted in the workings of a mysterious Providence, that Abraham Lincoln, the President of the United States, should fall by the hand of an assassin; and

WHEREAS, The murderer's dagger has struck down William H. Seward, the Secretary of State, next to the President the most exalted and important officer of the Government, and we are prepared at any moment to hear that he is no more: therefore,

*Resolved*, That an agony of sorrow that finds no relief but in the deep conviction that the Lord God Almighty liveth and reigneth, and that he is still the refuge and support of his people, has taken possession of our souls and bows us down to the dust with its awful and overwhelming reality.

*Resolved*, That in view of the exalted virtues and eminent public services of Abraham Lincoln, his wisdom, his firmness, his unassuming piety and unswerving adherence to the great principles of universal liberty; the masterly statesmanship and inspiring confidence which he has exhibited during the fearful struggle in which our country has been engaged, and which with the help of God and a devoted people he had brought so near to a triumphal termination; we deplore with intensity of emotion, which finds no language for its adequate expression, the loss of this great and good man, of this faithful and devoted public servant.

*Resolved*, That while we bow submissively before the Sovereign Disposer of events and seek with this great calamity upon us for the consolation which flows from the conviction that "he doeth all things well"; while we weep manly tears at the loss of our greatest public benefactor, of our dearly beloved and venerated chief magistrate, and are deeply apprehensive that soon the tidings will reach us that the gifted and faithful Seward has shared his fate; we will nerve our hearts and our hands to meet the crisis this awful event has brought upon our country, and the performance of the high and solemn duties which as men and as citizens of the United States now devolve upon us.

† This large surplus was mainly owing to the act of Congress passed July, 1864, allowing credits for men serving in the United States Navy.

follows: In 1861, \$5,091.52; in 1862, \$25,257.29; in 1863, \$40,146.04; in 1864, \$36,500; in 1865, \$18,500. Total amount in four years, \$125,495.85.

The Ladies' Soldiers' Relief Society donated for the relief of the soldiers upwards of twenty thousand dollars in money; in cotton cloth and flannel, four thousand dollars; and in hospital stores to the value of six thousand dollars. The following are some of the articles contributed: Condensed milk, preserved fruits, jellies and pickles, farina, maizena, tamarinds, lemons, dried apples, tea, coffee, cocoa; 1116 bottles of wine, consisting of sherry, currant, blackberry, and native wines; 423 bottles of brandy; 1130 bottles of blackberry brandy and syrups; 345 bottles of Port wine; large contributions for the Thanksgiving dinner and Christmas trees at Portsmouth Grove Hospital, besides bushels of lint and bandages. "The Society for the Comfort and Relief of our Soldiers in Hospitals" furnished, among other things, 5904 flannel shirts, 3887 pairs of drawers, 4573 woollen socks, 1790 towels, 94 coats, 76 vests, 120 collars, 1000 handkerchiefs, 368 cravats, 314 dressing-gowns, 1836 pocket-handkerchiefs, 300 pants, 148 napkins, 678 pairs slippers, 265 woollen mittens, 542 blankets, 515 sheets, 673 pillows, 750 quilts, 988 canes, 1280 woollen undershirts, &c.

The contributions named above are certainly remarkable, but we have to add that the ladies of New Bedford began early in the war. They held a meeting on the 18th of April, 1861, and organized for the work. Mrs. Joseph C. Delano was chosen president, Mrs. Lawrence Grinnell vice-president, and Mrs. William Eddy secretary and treasurer. In addition to the above contributions, five hundred dollars were given by a lady to pay soldiers' wives for sewing. They also sent contributions to the St. Louis and Baltimore Soldiers' Fairs, and furnished tables at the New York and Boston Fairs.

## XXIV.

## SOLDIERS' AND SAILORS' MONUMENT.

The monument erected by the city of New Bedford in memory of her citizens who perished in the rebellion occupies a prominent situation upon the common.

It is a beautiful and appropriate structure. Of the many erections of this character that the gratitude of the living has raised to commemorate the patriotism of the dead, few can be found more tasteful and appropriate in design, or more perfect in execution.

The monument was designed and contracted for by George F. Meacham, of Boston.

The inscriptions upon the base are as follows :

## NORTH SIDE.

Navy.

## EAST SIDE.

Erected by the City of New Bedford, as a tribute of gratitude to her sons who fell defending their Country in its struggle with Slavery and Treason.

## SOUTH SIDE.

Army.

## WEST SIDE.

Dedicated July 4th, 1866.

The citizens will be interested in the following report of the committee of the City Council charged with the erection of the monument.

*"City of New Bedford.*

*"IN COMMITTEE, Jan. 5th, 1867.*

*"The Joint Special Committee to whom was intrusted the duty of superintending the completion of the monument contracted for by the last city government, beg leave to submit the following*

## REPORT.

*"The corner stone was laid on the 4th of July last, but the work was delayed longer than was anticipated, owing to the difficulties experienced in quarrying suitable stone, and the slow and tedious process of cutting the inscriptions. Subsequently, upon notice from the contractor, in conformity with the provisions of the contract, your committee inspected the work at the yard of Mr. Sheldon, the sub-contractor, at Concord, N. H., and approved the character and quality of the work so far as it was then completed. The stone is of the finest Concord granite, free from the presence of particles of iron, while the character of the work is much superior to that contracted for and surpassing our expectations. Aside from the delay in the work, your committee are fully satisfied with the performance of the contract.*

"The laying of the corner stone presented a favorable opportunity for transmitting to posterity in the least perishable form the facts of interest connected with the history of the monument, and the names and portraits of some of those who have become distinguished during the war, together with the names of those of our citizens who have fallen in defence of our free institutions, and sealed their devotion to their country with their lives.

"Your committee accordingly caused a sketch to be prepared from the records of the city government, showing its action with reference to the subject, which was deposited in the corner stone with the newspapers of that date, city documents, photographs of our most distinguished generals, and a complete roll, so far as the same could be obtained, of our patriot dead.

"In this duty of collecting the names of those whose virtues are commemorated in the sculptured stone, we have been materially assisted by the careful research and industry of James B. Congdon, Esq., whose interest has been continuous in every effort to honor valor and patriotic heroism.

"These names are the heirlooms of our citizens, and the humblest among them should not be forgotten. A duplicate copy of his 'Roll of Honor' we herewith transmit, that it may be preserved for future reference.

"The appropriations made by the city for the purpose of the monument have been thirteen thousand three hundred dollars. Of this sum there has been paid to George F. Meacham, Esq., according to contract for the monument, \$8,919.50, which includes the sum of \$354.50 for cutting the inscriptions. The incidental expenses, including removal of flagstaff, excavation and removal of soil, extra foundation, preparation of roll, surveying, and expenses of committee, amount to \$357.70.

"Your committee have also entered into contracts with George F. Meacham, as follows: For fence of bronze for \$1496, and for stone curbing under the same for \$1960; and with Charles Taber & Co. for incidentals, \$25; thus leaving a balance of the appropriation yet unexpended or subject to contract, the sum of \$541.80.

"This sum remains to defray the expense of filling around the monument and of grading the walks, and can as well be expended under the direction of the next city government.

"The duty assigned to your committee has been as arduous as it has been honorable, but it is with feelings of personal gratification that they deliver into your hands this beautiful monument of the heroism of our departed soldiers and sailors, and of the taste and munificence of our fellow-citizens, who but feebly express their gratitude in its erection. It speaks through its enduring emblems and its inscriptions, its utterances of patriotic devotion to our common country, while it recalls the sad tales of the battle, the hospital and the prison.

It reminds us of our duty to the living representatives of those who have gone from the field of strife to their long rest, and imposes upon us the duty of benevolent care for the widow and the orphan of the heroic dead.

"Our duty does not terminate with its erection. Those who survive should feel the gratitude of a generous community, not alone in granite memorials to their comrades, but in such constant recognition of the value of those services as shall encourage patriotism and inculcate in coming generations the principle instilled into us by our fathers.\*

"*'Dulce et decorum est pro patria mori.'*

"For the committee.

JOSEPH KNOWLES, Chairman."

## XXV.

### ROLL OF HONOR.

#### THE NEW BEDFORD ROLL OF HONOR,

Containing the names of the Volunteers in the Army and Navy who died in the service of the Country during the Great Rebellion.

PREPARED BY ORDER OF THE CITY COUNCIL, MAY, 1869.

[This record was prepared under the direction of a Joint Special Committee of the City Council, appointed to consider the subject of a MEMORIAL TABLET for the names of the NEW BEDFORD VOLUNTEERS who died in the service of the country during the GREAT REBELLION.]

\* At the laying of the corner stone an address was delivered by the Rev. Alonzo H. Quint, and a poem by James B. Congdon, both of which were printed.

The Roll of Honor which follows is a copy of the corrected roll prepared in 1869 by order of the City Council, the manuscript of which, carefully and beautifully bound, is deposited in the archives of the city.

## SOLDIERS.

- Akin, Charles R., Musician, 4th regiment cavalry, Co. B. Died of disease February 10, 1865, at Fortress Monroe.

- Stowell, Columbus, 4th regiment cavalry, Co. B. Died in prison at Charleston, S. C., October 15, 1864.
- Swain, Charles B., 1st regiment cavalry, Co. K. Died at Beaufort, S. C., November 4, 1862.
- Sweeney, William A., Corporal, 33d regiment, Co. I. Killed at battle of Resaca, Ga., May 15, 1864.
- Taber, Samuel H., 58th regiment, Co. E. Died in Danville prison hospital, August 31, 1864.
- Thatcher, William H., 6th company heavy artillery. Died at Fort Davis, D. C., June 27, 1864.
- Thompson, James, 13th battery. Drowned at Hampton Road, Va., February 1, 1863.
- Tillinghast, Charles F., 3d regiment cavalry, Co. A. Prisoner at battle of Cedar Creek. Died in prison at Salisbury, N. C., June 9, 1864. Monument in Rural Cemetery; it is not known where his body is laid.
- Tillinghast, Thomas G., Sergeant, 3d regiment cavalry, Co. A. Died at Winchester, Va., October 20, 1864, of wounds received at Cedar Creek. Monument in Rural Cemetery; it is not known where his remains were laid.
- Tirrell, Charles F., 7th regiment, Co. I. Killed at Fredericksburg, December 13, 1862.
- Torrence, Abraham P., Corporal, 54th regiment, Co. C. Killed at Fort Wagner, July 18, 1863.
- Tripp, Ebenezer, 20th regiment, Co. G. Killed at Ball's Bluff, October 21, 1861.
- Tripp, James H., 47th regiment, Co. D. Died June 4, 1863, at Carrollton, La.
- Tripp, Jireh B., 23d regiment, Co. D. Died in Libby prison, Richmond, Va., October 14, 1864.
- Tripp, Leander A., Sergeant, 38th regiment, Co. H. Died June 30, 1864, at Morganza, La.

- Tripp, William H., 23d regiment, Co. D. Killed before Petersburg, August 16, 1864. Grave in Rural Cemetery.
- Tuckwell, Charles F., 23d regiment, Co. D. Died at Newbern, May 9, 1862. Grave in West Cemetery.
- Turner, Treadwell, 54th regiment, Co. C. Killed at Fort Wagner, July 18, 1863.
- Urban, Henry, 20th regiment, Co. C. Died January 7, 1865.
- Viall, George M. (of Providence?) 41st regiment, Co. A. Died at Baton Rouge, May 15, 1863.
- Watson, Samuel J., Second Lieutenant, 58th regiment, Co. E. Died at home, December 11, 1864, from want and exposure in Danville prison, Va. Grave in Rural Cemetery.
- Weaver, Norbert V., 33d regiment, Co. D. Mortally wounded at Cold Harbor, June 3, 1864. Monument in Rural Cemetery.
- Welsh, Edward G., 3d regiment cavalry, Co. A. Killed at battle of Cedar Creek, Va., October 19, 1864.
- Welsh, William H., 3d regiment heavy artillery, Co. D. Died at Gallop's Island, Boston Harbor, September 15, 1865. Grave in Catholic Cemetery.
- Whalon, Joseph, 18th regiment, Co. B. Died May 6, 1862, at Yorktown, Va.
- Whitehall, John D., 2d regiment cavalry, Co. I. Died at Gloucester Point, Va., March 31, 1863.
- Whitman, Onley A., 7th Rhode Island regiment, Co. I. Died at Baltimore, March 30, 1863. Grave in West Cemetery.
- Wilcox, Seth A., Sergeant, 3d regiment cavalry, Co. A. Died at home, May 30, 1864. Grave in Oak Grove Cemetery.
- Wilcox, William S., 5th battery. Died November 28, 1862, at Falmouth, Va.
- Williams, Henry J., 18th regiment, Co. A. Died at Sharpsburg, Md., October 17, 1862.
- Williams, William (quota of Belmont,) 55th regiment, Co. K. Died at regimental hospital, Folly Island, S. C., August 19, 1864.
- Williston, William H., 21st regiment, Co. C. Killed at Newbern, N. C., March 14, 1862.
- Wing, John A., 33d regiment, Co. D. Missing in action, May 16, 1864.
- Winn, Hugh (of Fall River?) 4th regiment cavalry, Co. B. Died at Florence, S. C.
- Wood, Horatio, Quartermaster-Sergeant, 1st regiment cavalry. Died on board steamer Ericsson, June 25, 1862.
- Wordell, Charles P., 58th regiment, Co. E. Died in Douglas Hospital, Washington, August 27, 1864, of wounds received at the assault upon Petersburg, July 30, 1864.
- Young, Angus W., 18th regiment, Co. D. Killed at Fredericksburg, December 13, 1862.

Young, Nathan L., 54th regiment, Co. C. Wounded at Fort Wagner, July 18, 1863; died at Beaufort, S. C., next day.

## SEAMEN.

Almy, Thomas, Acting Master's Mate, steamer Wachusett. Killed at City Point, Va., May 20, 1862.

Andrews, Manuel. Died in Marine Hospital, Chelsea, Sept. 11, 1861.

Avila, Elisha N. (quota of Boston,) steamer Benton. Killed at Fort Donaldson, February 14, 1862.

Bly, Horatio T., steamer St. Louis. Died of wounds, Oct. 17, 1862.

Boakim, Emanuel, Steward. Killed August 5, 1864.

Cornell, John M., steamer Mound City. Died March 16, 1864.

Coxen, Edward M. Died of wounds, July 24, 1863.

Dandridge, Andrew, Cook. Died of disease, March 19, 1862.

Francis, Isaac, Jr., Acting Ensign, schooner Matthew Vassar. Died May 18, 1863.

Frates, Antone. Killed June 2, 1862.

Fuller, James, frigate Congress. Drowned in Hampton Road.

Gifford, Charles R. Killed at Brooklyn Navy Yard, June 20, 1862.

Gifford, David S. Died of disease, February 14, 1862.

Gould, John, steamer Herald. Killed October 25, 1863.

Handy, Joshua J., steamer Augusta. Died 1862.

Harrington, Jeremiah, steamer Rattler. Died of gunshot wounds, March 19, 1863.

Howes, Alphonso S., gunboat Sagamore. Died of disease, September 22, 1865, at Marine Hospital, Baltimore.

Hullahan, Thomas (quota of Chelsea.) Died of disease at New Orleans, July 24, 1862.

Jenney, James T., steamer Twilight. Died of disease, March 20, 1863, at Beaufort, N. C. Grave in West Cemetery.

Kempton, Silas W., Acting Master's Mate, steamer Santiago de Cuba. Lost overboard in Chesapeake Bay, March 23, 1865.

Louis, John. Died June 12, 1863.

Lucius, Juan. Died at Brooklyn, May 19, 1865.

McCarty, John. Died of disease, December 8, 1862.

Milan, Michael, frigate Congress. Killed in Hampton Road, March 17, 1862.

Milliken, Charles E., First Class Boy. Killed in Mobile Bay, August 25, 1864.

Mullany, Philip. Died from casualty, January 26, 1864.

Nugent, Robert N. Died at Charleston, S. C., December 6, 1863.

O'Neil, Cornelius. Lost in steamer Cincinnati, March 27, 1863.

Ottiwell, Nathaniel D., Acting Master's Mate, steamer Cambridge. Died off Cape Lookout, September 27, 1861. Buried at sea. Monument in Rural Cemetery.

- Parnell, James E., steamer Romeo. Died August 13, 1863, on board hospital-ship Red Rover.
- Peirce, John A. Perished on board the Cumberland in Hampton Road, March 8, 1862. Grave in Rural Cemetery.
- Phillips, Edward. Died in Marine Hospital, Chelsea, Dec. 19, 1861.
- Rogers, Reuben G. Died of disease, September 20, 1862.
- Scott, John. Died of disease, November 20, 1861.
- Standish, William D., steamer Meteor. Died October 1, 1864.
- Taber, Daniel G. Blown up in the Tecumseh, in Mobile Bay, August 5, 1864.
- Taber, John C., First Class Boy, ship Ohio. Died of disease, May 8, 1864. Grave in Rural Cemetery.
- Thompson, William. Died May 27, 1863.
- Warren, Alvern S., steamer Santiago de Cuba. Died of wounds at Norfolk, Va., June 18, 1865.
- West, William A. Died April 15, 1863.
- Wordell, Gardner R., steamer Southfield. Drowned April 19, 1864.

---

 XXVI.

## PUBLIC SCHOOLS OF NEW BEDFORD.

From the incorporation of the town of New Bedford in 1787 to the year 1821, the free school was called the town-school, and was for most of the period a school for the children of the indigent,—a branch of the department for the support of the poor.

A more just and more elevated idea was, no doubt, attached to the public school, and one more in harmony with its present position, when, on May 28th, 1787, it was voted in town meeting "that there be one person employed as a town schoolmaster in this town." From 1787 to 1798 there was annually passed, under an article of the warrant "to see what number of schoolmasters shall be provided for the ensuing year at the charge of the town," a vote that "the selectmen appoint the schoolmasters of the town, *according to law.*"

At the March meeting, 1798, under an article in the warrant "to vote a sum of money for schooling poor children," a vote was adopted

which wholly changed the principle upon which the public schools were founded.

A committee was appointed "to inquire into the number of *poor children* in said town necessary to send to school at the expense of said town." The committee were William Rotch, Jr., Edward Pope, Lemuel Williams, Joseph Bennett, Alden Spooner, Pardon Cook, Ebenezer Keen, and John Chaffee.

The character of the report, which is not given, may be gathered from the votes at the meeting held May 14th following.

"*Voted*, To accept the report of the committee who were chosen to report on the expediency of raising a sum of money to school the poor children in this town, and to raise *two hundred dollars* for that purpose.

"*Voted*, To choose a committee of eight persons to lay out the same sum *on those most needy*."

The same committee, with one exception, was appointed. From 1798 to 1820 this miserable apology for a free school was continued; the annual appropriations varying in amount from \$200 to \$1000, the average, after the setting off of Fairhaven in 1812, being \$470.

An attempt was made in 1811 to raise the public school from the slough of pauperism, mismanagement and misgovernment into which it had fallen. A committee, upon which were the names of William Rotch, Jr., John Mason Williams, Samuel Rodman, Thomas Hazard, Jr., and nine others, was appointed under a vote "that a plan be reported for regulating schools for the instruction of children, in conformity to the existing laws of the Commonwealth."

For many years the laws had been disregarded, and they were to be ten years more, for nothing came of the effort made at this time to depauperize the school.

It was not until 1821 that the people of the town recognized their rights and their obligations in relation to free schools under the laws of the State. The struggle to effect the change was earnest and protracted. Twice after the schools were established, once in relation to the grammar schools and once with reference to the high school, were votes passed by which they were abolished.

The first appropriation was \$1200. This was in 1821. Ten years after it was \$5000. In 1841 it had been increased to \$15,400. The last appropriation under the town government was \$21,225.

The name of JOHN AVERY PARKER is honorably associated with the successful effort of 1821. He was of the school committee of that year, and its chairman. It would be an act of simple justice to have the "street struck off from the name of the 'Parker Street school,'" that in the name an honorable testimony may be borne to the labors of this friend and pioneer of the free public schools.

Above we have given an abstract of the opening pages of our school history. We follow it with the closing. Following this we give ex-

tracts from the last report of the New Bedford School Committee, — a document interesting for its valuable information and for the contrast it presents to the statements of the early records.

EXTRACTS FROM THE ANNUAL REPORT OF THE SCHOOL COMMITTEE  
FOR THE YEAR 1875.

STATISTICS OF THE SCHOOLS.

*I. Population.*

|                                         |        |
|-----------------------------------------|--------|
| The population of the city is . . . . . | 25,876 |
| School census, May 1, 1875, . . . . .   | 4,002  |

| Mill school, . . . . .                                                                    | .90 |
| Grammar schools, . . . . .                                                                | .95 |
| Primary schools, . . . . .                                                                | .92 |
| Country schools, . . . . .                                                                | .89 |
| Average per cent. of attendance for all the schools except the Training school, . . . . . | .93 |

## CENSUS OF SCHOOL CHILDREN.

The last legislature relegated to the school committee the duty of taking the census of the school children, requiring an additional range of details to render the service more useful.

The whole number of children returned as being between 5 and 15 years of age on the first of May last, is 4002. Of these, 3060 were reported to be in the public schools; 216 in private schools; 296 at work in the two large mills; 21 at work in places other than the mills.

These determinate figures foot up 3593; leaving 409 only, or 10 1-5 per cent. as allowance for invalids, for those who are detained at home to aid in the family labors, and for all those occupied through the many other contingencies, that in a city like this inevitably interfere to keep children from school. The number absolutely unaccounted for, among which alone the friendless or neglected, whose lives are running hopelessly to waste, are to be found, is so small as to excite the liveliest satisfaction.

## THE EXPENDITURES.

The appropriation for teachers' salaries asked for by the committee of expenditures, in behalf of the Board, and granted by the City Council, was \$56,000. This estimate was based on the expenditures of the previous year, and was supposed to be sufficient for the current year.

But there has already been paid out to the teachers the sum of \$50,361.58, leaving a balance of \$5,638.42. The remaining pay roll of the year will include six weeks, and will require the sum of \$8569. There will therefore be a deficit of \$2,930.58, for which an additional grant must be made by the City Council.

The appropriation for incidental expenses, including \$900 lately granted for the evening schools, was \$18,400. The estimates were made on a basis of positive need, and were divided as follows: for salaries, \$3050; evening schools, \$1900; drawing school, \$1500; sweepers' pay rolls, \$2500; books and printing, \$2000; fuel, \$3000;

heating apparatus, \$1500; cleaning, \$800; furniture and fixtures, \$800; miscellaneous expenses, \$1400.

In studying economy for the future, it will not be possible to trench to any great extent on the amount heretofore granted for our incidental expenses. Ten years ago there were only 57 separate seated rooms in use by our public schools; there are now 88; there were only 67 regular teachers; there are now 96; and it is very evident that there must have been a large increase in the amount of supplies necessary to keep these many teachers and rooms in good working condition. Yet by the constant exercise of judicious care on the part of the committee on expenditures in their disbursements, and the close scrutiny of all bills for goods and service rendered, every channel of expense has been kept under so thorough control that the per cent. of outlay has by no means been extended to equal the increased demand.

#### CONDITION OF THE SCHOOLS.

##### *High School.*

None of the teachers of this school have been interrupted in their work throughout the year by any contingencies, and they have labored with their usual faithfulness and success.

The routine of study, as prescribed by the manual, has been followed with as much fidelity as circumstances would allow. It sometimes occurs in a school of such a character, that a temporary departure from the dictated order of study will better serve its interests.

Three of the masters of the last graduating class have entered Amherst College, sustaining the examination for admission very creditably.

##### *The Grammar Schools.*

The Fifth Street school was exiled from its school-house during the first term of the last school year, while it was undergoing enlargement and renovation, and through that long interval, scattered about in temporary quarters, was deprived of its usual facilities for its appointed work. It especially suffered in regard to writing and drawing, and such practice in the study of language as depends on written exercises; all of which were necessarily intermitted.

The Parker Street school is now undergoing the experiences to which the Fifth Street school was subjected last year, and for the same grateful cause — the enlargement and renovation of its school-house. The alarm sounded by the Chairman of the Board for 1874 in his annual report, and again by his Honor the Mayor in his first inaugural address, as to the danger to which the scholars of that school would be subjected in case of fire, was too serious to be disregarded. The incoming City Council took early action in reference to the reconstruction of the house. The influence we had anticipated from the burdensome cost of the new high school house, to preclude for an indefinite

period any further expenditure for school accommodations, was not suffered to have weight in this instance. And a satisfactory plan of enlargement having been obtained, a sufficient appropriation was unanimously voted, and in due time the work was begun. When the house shall at length be transferred to the Board for the uses of the school, it will be so in contrast with its former condition, so ample and convenient in its school-rooms and corridors, so safe in its three commodious stairways, so well appointed in its clothes-rooms for both scholars and teachers, and so admirably capacitated to serve the general exercises of the school by its large and sightly hall, that the luxury of possession will far more than compensate for the inconvenience consequent on the process of reconstruction.

#### *The Primary Schools.*

There have been more than the average number of changes of teachers in the primary schools during the past year. A full quarter of the former corps has given place to beginners in the work; and almost the entire graduating class of the Training school, numbering 16, has already been absorbed by these schools, and their complements in the country schools.

The advantages derived from the Training school have therefore been conspicuously manifest. Had so large a number of new teachers begun their labors without any previous experience, making their scholars for successive months the unfortunate victims of their crude experiments in learning how to govern and how to teach, the average condition of several of the schools of this department would have fallen very low, and it would not have been easy to tone them up to their previous condition. But the most of the graduates of the Training school, familiar with the requirements of discipline as well as with the routine of approved study, promptly and systematically enter upon their duties with effective capacity from the start, and there is neither loss of time nor deprivation of character.

#### *Country Schools.*

A slice has been taken from the territory of our Acushnet neighbors and added to the city limits since the beginning of the year, that has materially increased the size of the North school, so that it has been thought expedient to appoint an assistant to the school.

The schools of this department, in general, are working to good advantage, and in a satisfactory condition.

#### *Mill School.*

The census of school children, lately taken, has settled not a few vexed questions in reference to the children employed in the mills, and taught us what expectations we are justified in forming in relation to

the Mill school. The School Committee have all along been supposing that a much larger number of children of school age were in the mills than proves to be the case; and therefore, that the Mill school ought to show a far greater average attendance than it has done. But it seems that in the Wamsutta mills there are 225 children; in the Potomska only 71. Of the number in the Wamsutta, 103, or nearly fifty per cent., are between 14 and 15 years of age; almost at the limit of our legal hold on them; and it is scarcely to be expected that this class of the child operatives will be discharged to attend school as universally as those who are younger. Deduct only half of them, for the number allowed to slide beyond the legal limit without discharge for another term of schooling, and we have 174 remaining in all, from which the Mill school is periodically to be replenished. Now the average number attending the Mill school is 40, who are nearly all from the Wamsutta mills, and who therefore constitute, as is readily seen, nearly a quarter of the whole number in the mills from which recruits may be expected to be derived. And a quarter part is the very utmost we have a right to count upon. Of the 25 per cent. of the children employed in the Potomska mill, numbering 18, who should periodically be discharged to attend school, a few are to be found in the Mill school and more than half are distributed among the regular schools in the south part of the city.

It would seem, therefore, that the agents of the mills should be thanked for the much they do towards the education of their child operatives, rather than stigmatized for what they neglect. A few instances are brought to light by the census, of children who are in the mills at so tender an age that it is a breach of humanity as well as of law that they should be employed at all. Let us hope that there are circumstances attending these several cases that relieve them of their apparently odious character.

#### *The Evening Schools.*

These schools have had regular sessions for 11 weeks, three evenings of each week.

The whole number of different scholars in the Central school has been 160; of whom 53 were females, 107 males.

The whole number of different scholars in the South school has been 100; of whom 33 were females, 67 males.

The average attendance on the Central school has been about 60; on the South school, 48.

The corps of each school consists of a male principal and three female assistants, who have labored steadily with interest and success.

*Music and Drawing.*

These two branches, once regarded in the community as only the mere ornaments of a substantial education, now held to be among its indispensable requisites, have been pursued with constant method, and results that give ever increasing satisfaction.

In the present attitude of the general public towards these seductive pursuits, an attitude of cordial interest and large expectation, there is a tendency among school authorities and teachers to devote to them much more than their due proportion of time. It is quite certain that in some localities, eager for distinction in these studies, the schools are allowed to follow them to an extent that robs the most important branches of study of the attention they require. This tendency the school authorities of New Bedford have firmly resisted. The results in music, even in the limited time devoted to it, are admirable; and though our schools may not be able to present such striking evidences of culture in drawing as is the boast of those with whom this branch is suffered to be unduly prominent, enough will be accomplished to prove the advantage to be derived from its prosecution, while our minds will not be forced to labor under the painful consciousness that much of what is gained in this direction, is at the expense of loss in another.

The Evening Drawing school has had an average attendance this season of between thirty and forty scholars, and one assistant teacher only has been employed, instead of two as heretofore. The character of the school is much the same as for the last two years. There are comparatively few adults seeking to obtain a more scientific and artistic knowledge of the trades they may be employed in, the majority being made up of the sons of our citizens not yet old enough to be engaged in business. But they are diligently prosecuting the study in orderly progress, and in the end far better results will accrue from such effort with such material, than could be secured from the superficial and irregular undertakings of journeymen mechanics, the most of whom have been found to be indisposed to devote the painstaking labor and study which a good degree of artistic culture demands.

## XXVII.

THE PUBLIC SCHOOLS OF NEW BEDFORD IN THE  
CENTENNIAL.

\* At a meeting of the City Council, January 20th, 1876, a communication of which a copy follows was laid before that body by the Mayor.

“International Exhibition, 1876.

“AGENCY OF THE MASSACHUSETTS BOARD OF EDUCATION  
FOR THE DEPARTMENT OF EDUCATION AND SCIENCE,  
No. 25 PEMBERTON SQUARE,  
BOSTON, Dec. 9, 1875.

“*To his Honor the Mayor of New Bedford :*

“DEAR SIR, — At a recent meeting of the Executive Committee of the Massachusetts Superintendents of Schools on the Centennial, it was unanimously voted to designate New Bedford as one of the two cities of the Commonwealth to make a collective educational exhibit in the International Exhibition at Philadelphia. To this action I give my cordial approval, as I know very well New Bedford's capability to make a creditable showing, and I trust that the municipal authorities of your city, duly appreciating the honor implied in the selection, will promptly adopt the measures necessary for preparing the proposed exhibit.

“Very respectfully yours,  
JOHN D. PHILBRICK, Agent.”

This communication was referred; and on the second day of March, upon the recommendation of the Committee on Public Instruction, an appropriation was made “to defray the necessary expenses of the proposed exhibition at Philadelphia by the School Committee.”

The School Committee, in anticipation of the proceedings of the City Council, had already taken measures looking to an acceptance of the proffer of the State Centennial Commission.

At a meeting of the Committee, December 13th, 1875, the subject was introduced; and the communication to the Mayor dated December 9th, above given, was read.

By a unanimous vote, the subject was referred to a special committee, consisting of the Chairman (Mayor Howland) and Messrs. Dunbar, Dews, Borden, and Batchelor.

At the meeting held December 30th, the committee reported the following resolutions, which were unanimously adopted.

“*Resolved*, That the Secretary be requested to express to Hon. J. D. Philbrick, the agent of the Massachusetts Centennial Commission for the department of education, the cordial sympathy of this Board in regard to the objects sought to be accomplished by the Commission

in connection with the Centennial Exposition, and our purpose to respond to the appeal made to us by interested and active cooperation.

*"Resolved,* That the honorable position assigned to our city is an additional inducement to make exertion in the premises proportioned to our power.

*"Resolved,* That a committee of five be appointed by the Board to have charge of this subject, with power."

The same gentlemen who as a committee had drawn up these resolutions constituted the new committee, and immediately proceeded to perfect their plans and put them in train for execution. The representative exhibit specifically called for by the Commission was that of "the text-books, reference and other class books, philosophical apparatus, maps, globes, and all other illustrative aids, in use in the elementary departments of a city of the second class in population." The committee determined to prepare their exhibit in the most thorough manner, and at the same time to avoid any superficial and unnecessary display. The books were borrowed directly from the shelves of the school-houses, presenting, in their worn and tarnished exteriors, the evidence of actual use; the cases procured to contain them were made in the most simple and substantial manner; the volumes of scholars' work, 70 in number, were honestly composed and inexpensively but conveniently bound; and all the other articles exhibited were in like manner drawn from among the actual collections in the school-houses, constituting a portion of their ordinary furnishing.

In addition to books, apparatus, and volumes of scholars' work, the exhibit contained, —

1. A chart, 3 feet by 4 feet, presenting in a tabulated form, carefully epitomized, the leading facts, historical and practical, respecting the educational position of the city. It includes not only the organization and practical condition of the public schools, but also of Friends' Academy and the private schools, of the Free Public Library and the New Bedford Lyceum. This piece of superior penmanship is the work of Mr. George B. Hathaway, of this city.

2. A perspective view and elevations of front, side and rear of the new high school house, each 2 feet by 3 feet in size, executed in water color by Mr. Arthur Cumming, teacher of drawing in the schools, and by him presented to the School Committee for this purpose. Also photographs of the Parker Street, Fifth Street, and Merrimac Street school-houses, and of the Free Public Library, executed by Mr. T. E. M. White.

3. A brief history of the Free Public Library, together with the catalogues of its books; a brief history of Friends' Academy; and a complete set of the annual reports of the School Committee from 1840 to the present time. These reports and histories, appropriately bound,

are placed together in the exhibition, in a case made for the purpose.

This New Bedford Exhibit has been pronounced by competent judges to be highly creditable; and as there is nothing false or meretricious in its composition, its success is a subject of reasonable pride.

---

## XXVIII.

### HIGH SCHOOL HOUSE DEDICATION.

The new High School House was dedicated with appropriate exercises September 12th, 1876, in the presence of a crowded audience, numbering over a thousand. The exercises were held in the hall in the third story, and about three hundred seats were reserved for the members of the city council, school committee, and other invited guests, among whom were many who have in past years been identified with the educational interests of the city.

J. AUGUSTUS BROWNELL, Chairman of the Joint Standing Committee of the City Council on Public Property, which committee has had the charge of the construction of the building, presented its report.

After a few remarks on the blessings and the necessity of education, Mr. Brownell gave the history of the movement which had finally culminated in the erection of this beautiful house. The matter was first brought up in the city government about eleven years ago, though it had been agitated before by some of the citizens. The former high school, now to be occupied by the Middle Street grammar school, was built, he believed, in 1846.

In May, 1865, a subcommittee of the School Committee addressed a petition to the City Council for more room. It was referred to the committee on public property, which in November reported reference to the next City Council. In March, 1866, the committee on public instruction reported estimates for a high school house to cost \$50,000, and the report was placed on file and nothing further done.

In March, 1868, the committee on public property was directed to procure estimates for the expense of enlarging the old high school house, and in June \$10,000 was appropriated to pay the cost of enlarging. The enlargement was completed that year.

In 1873 the School Committee passed a resolution to petition the City Council for a new high school. May 20, the petition was referred to the committee on public instruction, which unanimously recommended granting the petition. In October, the committee on public property was authorized to expend \$12,000 for land for a new high school, and purchased the lot on which the new building stands; which transaction was reported in November, and the necessary action was taken to meet the expense. In March, 1874, another petition from the School Committee was before the committee on public property, and in May that committee, with the addition of an Alderman and two members of the Common Council, was authorized to procure plans. Plans prepared by Lord & Fuller and H. G. Wadlin, of Boston, were reported in October, and the committee was authorized to procure working plans, and in November to contract for the erection of the building, which was done, and contracts were reported to and approved by the City Council for the masonry, carpentry, heating apparatus, and superintendence of construction. The corner stone was laid May 27, 1875, and newspapers of that time contain full reports of the proceedings and a list of the articles placed under it, which it was not necessary now to enumerate. The cost has been as follows:

|                                      |          |           |
|--------------------------------------|----------|-----------|
| Land, . . . . .                      | \$12,000 |           |
| Masonry contract, . . . . .          | \$40,800 |           |
| Extra work, . . . . .                | 1,843    | 42,643    |
| Carpentry contract, . . . . .        | \$34,782 |           |
| Extra work, . . . . .                | 4,712    | 39,494    |
| Heating apparatus, . . . . .         |          | 6,675     |
| Ventilation, . . . . .               |          | 2,825     |
| Fence and curbing, . . . . .         |          | 6,214     |
| Excavation and drainage, . . . . .   |          | 2,482     |
| Furniture, . . . . .                 |          | 4,446     |
| Plans and superintendence, . . . . . |          | 2,400     |
| Brick pavement, . . . . .            |          | 1,350     |
| Incidentals, . . . . .               |          | 5,536     |
|                                      |          | <hr/>     |
|                                      |          | \$126,065 |

Mr. Brownell then read from the Standard of August 30th a full description of the building and list of contractors. He went on to state that the committee took great pleasure in commending the care and faithfulness with which the work had been done, and mentioned specially the furniture and ventilation. The latter, by P. Mihan, of Cambridge, was on a plan approved everywhere it has been introduced, and favorably tested by the committee in this building.

The house has accommodations for 336 scholars, is comfortable and beautiful, well heated and lighted, and the committee, Mr. Brownell thought, had reason to be proud, and to congratulate the citizens on

this important acquisition. But the cause for congratulation would be greater, if, as he trusted, by its use the character of education is advanced.

Mr. Brownell, at the close of his remarks, placed the keys of the building into the hands of the Mayor, who responded as follows :

“MR. CHAIRMAN, — In accepting these keys, the agreeable duty devolves upon me of extending to you and the committee you represent the thanks and congratulations of the City Council and the citizens of New Bedford, for the great care and attention, untiring zeal and energy, you have given to the construction and completion of this spacious and costly structure erected by the bounty of the city, and which we now dedicate to public use, for the promotion of the welfare of the people.

“You herewith present to our citizens and School Committee a magnificent structure, situated upon one of the finest building sites in our city, bounded by public avenues upon each side, well drained, and surrounded by spacious grounds. The edifice itself is one of which every citizen may well feel proud, artistic in its architecture, ample in its accommodations, possessing all the modern and most approved requisites so indispensable to the health and comfort of teachers and pupils.

“The citizens of New Bedford have here erected a monument of their liberality and interest in the educational and intellectual culture of their children. It is also a fitting recognition of the one hundredth anniversary of the independence of our nation, a memorial of the past, and a monitor of the future.

“I would also congratulate the teachers and pupils of this school upon being so highly favored with such school accommodations as these; and in behalf of the fathers and mothers acknowledge a debt of gratitude for the large and generous views of public policy which have furnished us this excellent building.

“As mayor of the city, I accept from you these keys in the same spirit of magnanimity which has prompted your committee and our fellow-citizens in discharging their duty to their children and children's children in the construction and furnishing of this edifice, dedicated to intellectual culture and educational pursuits.

“I shall in due time transfer these symbols to the appropriate representative of the school committee.”

At the conclusion of his remarks the Mayor introduced the Hon. ROBERT C. PITMAN, Judge of the Superior Court, as a citizen of New Bedford who was an honor to the city and whom the city delighted to honor.

Judge Pitman said as a general thing he deprecated apologies, but as he believed any person who is to speak before an audience of the character here assembled should suitably prepare himself, an apology

was due to his hearers. He alluded first to Messrs. James B. Congdon and John F. Emerson, who were seated beside him; the one who, when he was a scholar forty years ago at Bush street, often in his official capacity as a member of the School Committee, enlivened the school by his cheering presence and his quick elastic step, and was also revered as the chairman of the Selectmen; the other, before the high school was instituted, had given him valued assistance in his educational progress. The two years he spent in Bush Street school under the tutorship of David Armstrong, he regarded as among the most profitable of his life. Two thoughts he desired to present. First, education involves more than the preparation of accurate and finished scholars; it produces noble men and women. On this point, special credit was due to Mr. Emerson. Second, he hoped New Bedford would not longer delay to elect some of its intelligent and capable women members of the School Committee. It was incredible that the educational interests of all the schoolgirls of the city should be intrusted to a board composed entirely of men, when none so well as mothers know how their education should be conducted.

JOHN F. EMERSON, the veteran teacher, whose portrait occupies a conspicuous place in the hall, was then introduced by the Mayor, and made the following interesting address.

"MR. MAYOR,—It was, I believe, at a religious convocation in Canada, a few years ago, that a new beatitude was promulgated: 'Blessed is the man that maketh a short speech; he shall be invited to come again.' I have been invited by the High School and its friends on more than one occasion of interest, and hope to be again; therefore I shall make a short speech. With your permission, my friends, I shall indulge in a few reminiscences of my school life in New Bedford.

"It will be fifty years the 26th day of the coming December since my first arrival in your city. What a contrast between then and now! But this is not the time or the occasion to enlarge upon that contrast, however interesting it might be. My first engagement here was that of an assistant teacher in the Friends' Academy, under J. H. W. Page, Esq., the principal. That was the commencement of a lifelong friendship between us, and his worth and success as a teacher will be attested by all those who had the good fortune to be his pupils. I held that position for two terms only, when the first High school was established, and I was appointed its master. It was kept in what was then called the green schoolhouse, on Charles street. The number of scholars, I think, was limited to forty, and altogether it was a very different establishment from the present school, with its costly and varied surroundings. There may be some in this assembly who were my pupils at that time, and if there are, I call upon them to bear witness that we were a happy company, and that fair progress, at least, was made in school studies. I hope I shall be pardoned if I appear a

little egotistical in speaking of this period. I had had but little experience as a teacher, and was naturally ambitious to make a good school. I had the time-honored Friends' Academy to compete with, presided over by the excellent teacher whom I have already named. I recollect that at the close of one term there was one vacancy, and that the committee spent an entire day in examining candidates who were anxious to secure the place. A large proportion of those first admitted retained their seats, and consequently the number of disappointed applicants soon became large. Another cause of complaint, and one that produced a strong feeling of opposition to the school, was that two or three families that were considered abundantly able to pay for the tuition of their children, secured and continued to retain an undue proportion of the seats. At the expiration of two years from the establishment of the school, the opposition became so powerful that an article was inserted in the warrant for the annual town meeting to see if the town would abolish the High school and appropriate the same amount expended for its support to one or more infant schools. It was a sad prospect to me, to look forward to the discontinuance of the school, as I had no other means of support. I went to the town meeting in a very despondent frame of mind. The cause of the school was advocated most eloquently by the late T. G. Coffin, Esq., and the opposition was led by Dudley Davenport, Esq., whom those who were in active life at the time will remember as a man of strong feelings and indomitable energy, as well as of great personal worth. He had tried repeatedly for the admission of his children to the school, and failed. He then formed the resolution to abolish the school, if possible, and his impassioned appeal produced such an effect that it seemed to me when the vote was taken that every hand in the hall went up in support of his side of the case, and the doom of the school was sealed. Mr. Davenport had no personal feeling against me, as was subsequently shown by his action in retiring from the hall, when he accosted me and said that he had heard I proposed to open a private school; if so, he wished to put his children under my instruction. This he did, and they remained my pupils till they left school.

"I began at once what I continued to call the High school, and never had cause to complain of a want of patronage. Many of my pupils then are among the most honored and useful of the citizens of New Bedford, and also of other cities.

"I was a member of the School Committee for most of the time that I was a private teacher, and remember with great pleasure my association on that board with several gentlemen who are doubtless here today, and have always been identified with the cause of education. I should do injustice to my own feelings, as well as disappoint your just anticipations, if I failed to mention in this connection my warm friend and co-laborer in education, THOMAS A. GREENE, Esq. You

all remember his devotion to the schools of the city, and no one had a better opportunity than myself to estimate the obligations of the city to him in this respect. He took so deep an interest in the High school that at last he knew almost every pupil by name. If his life had been continued to the present time, and he could have been with us on this occasion, his heart would have rejoiced in the ceremonies of this dedication.

"Another name will always be remembered when we speak of the schools, Public Library, and other kindred institutions of the city, — JAMES B. CONGDON, Esq. But if I should attempt to enumerate all the friends of good learning that I have labored with in your city, the list would be too long for your patience.

"The graduates of the High school for the quarter of a century that it was under my charge, are scattered through the length and breadth of the land. I meet them wherever I go. I never fail to receive a cordial recognition, and I always find them prepared to put a higher value upon my services than I think I deserve. They are found in the learned professions, in the marts of commerce and trade, and some few, at least, have achieved no mean distinction. ALBERT BIERSTADT, the artist, took his first lessons in drawing in your High school. I doubt not there are some present who have specimens of monochromatic drawing which they executed under his teaching previous to his visit to Europe.

"I cannot fail to remember my young friend and former pupil, Professor CHARLES F. CHANDLER, of the School of Mines, New York. My ten years residence in Brooklyn has afforded me ample means of knowing his high reputation as a chemist. As President of the Board of Health, he holds a position of great responsibility, and one for the duties of which he seems specially qualified.

"Rev. ALEXANDER MACKENZIE, the son of your late townsman Capt. Daniel Mackenzie, is a clergyman of great worth and high repute for a young man. He is settled over a church in Cambridge, near Harvard College, a position demanding culture and varied learning. I remember him as a most exemplary and painstaking scholar.

"I congratulate the city of New Bedford on the possession of this splendid edifice for the accommodation of the High school. It affords ample testimony to the taste and sound judgment of all concerned in its erection. I congratulate the youth of the city, for whose benefit this lavish expenditure has been made, on the increased facilities and ample provisions furnished them for the prosecution of study and the acquisition of sound learning.

"I congratulate the worthy principal who has presided over this school for so many years, on the success that has crowned his labors in the past, and the cheering prospect for the future, in the unsurpassed accommodations with which he will now be provided.

"I congratulate the faithful assistant teachers of this school on their good fortune in being called to labor where there are so many omens of success to encourage them in their arduous toils."

ABNER J. PHIPPS, of Medford, General Agent of the State Board of Education, was the next speaker. Mr. Phipps was for many years a teacher in New Bedford, and at one time Superintendent of the Public Schools.

Mr. Phipps said it was 29 years this day (Sept. 12th) since he became Principal of the Friend's Academy, and 12 years since he left the position of Superintendent of Schools. He said two of the most prominent facts brought to mind in this year of centennial reflections were the progress in the character of school buildings and the increased provision for high schools. In 1838 the valuation of all the public schoolhouses in the State was \$550,000, and now it was \$20,000,000, one schoolhouse being valued at \$300,000 and another \$200,000, and there is quite a number worth over \$100,000. In 1838 there were 14 high schools, now over 200. High schools were however established in a very early period of our history. They were then called grammar schools, and were required to be of a grade suitable to fit scholars for "ye university." Some of the twenty-five dollar schoolhouses remain, but they are in towns where property is so much reduced in value that with the utmost economy taxes are very high. Mr. Phipps also extended his congratulations on the character of the building, specially noting the blackboards of real slate. He did not know of a more perfect schoolhouse.

Prof. TWEED, of the Board of Supervisors of the schools of Boston, was introduced, and amusingly contrasted the house with the one from which he graduated 50 years ago. There may be those who grumble at the increased expenses of schools, but they only keep pace with the prosperity of the country. It is somewhat doubted whether the methods of teaching keep pace with the houses and appliances, and unfortunately it cannot be very accurately determined. He believed, however, that the modes of teaching had greatly advanced.

Mr. JOHN TETLOW, Principal of the Friends' Academy, spoke of the great expenditure for the High school. He did not mean to be understood as opposed to free education, but the public has an immense demand upon the school. The school is in charge of the committee, the teachers, and the public. The committee should select teachers in whom they have confidence, and after general directions should leave them alone. Parents and pupils should consider it is their duty to consider the teacher. Unless this school sends out first class citizens it cannot vindicate its own existence.

The Mayor then presented to the Hon. ALANSON BORDEN, Chairman of the subcommittee on the High School, the keys of the new building, and spoke as follows :

"MR. CHAIRMAN, — To you, representing the School Committee of our city, I consign this building, a munificent gift from the citizens of New Bedford to their children. The public authorities have furnished you with a building suited to your wants, and I have no misgivings as to the wisdom which shall govern or the success which will ever attend the administration of this school. And now, Mr. Chairman, in the belief that this magnificent structure will be found worthy of the purposes for which it has been constructed, worthy of the enlightened teachers who will impart knowledge to those seeking information here, worthy of the public spirit and progress of the city of New Bedford, I deliver it, by this symbolical passing of keys into your charge, a completed and perfect edifice."

In response to the address of the Mayor, Judge Borden remarked that he accepted the keys not with unmixed feelings of pleasure; he felt the full weight of responsibility which they symbolized. Happily for himself, he expected in a few months to lay down that responsibility. In view of what is afforded for education in New Bedford, by liberal appropriations and from the Sylvia Ann Howland bequest, the responsibility was almost too much to bear. The school should be able to fit scholars for college as well or better than any other in the State. He believed it had facilities superior to any other in the State, and hoped to hear of many of its graduates honoring themselves at Yale, Harvard, Tufts, Boston University, Vassar, and Smith's College. The school should be so good that no other of the same grade can exist in the city. A very important thing, something beyond intellectual attainments, is intellectual enthusiasm. Judge Borden looked back with grateful remembrance to one teacher who inspired his pupils with such enthusiasm that nearly every one would get up at 4 A. M. in the winter to engage in study. But this school is not all for college; most of its pupils come here to end their studies, and if they were enthusiastic here their attainments would not wear out in the future but would scarcely be defaced. If the future School Committees shall so manage the school, the people will be willing to pour out their thousands for its support.

Charles P. Rugg, Esq., Principal of the High School, received the keys from Judge Borden. He promised that the earnest efforts of himself and his assistants would be put forth to merit the trust and confidence of the community.

Among the invited guests present were Dr. James M. Aldrich, chairman of the school committee, and William Connell, Jr., superintendent of schools, of Fall River; A. P. Marble, superintendent of schools in Worcester, and the superintendent of public buildings in the same city, whose name we did not learn.

The arrangements were admirably made by the committee on public

property, Messrs. J. Augustus Brownell, William G. Taber, William J. Bowen, Henry C. Denison, and George Nelson.

The whole building was charmingly decorated with flowers. A very handsome bouquet on the pianoforte was contributed by William Peirce, and the others were furnished and arranged by the assistant teachers. In the principal's room was a splendid amaryllis with about ninety blossoms, furnished by Mrs. Harry J. Leach.

After the dedication, the people inspected all parts of the building, and much gratification was expressed with its appearance.

---

## XXIX.

### DESCRIPTION OF THE NEW HIGH SCHOOL HOUSE.

[From the Evening Standard of August 30th.]

This fine building is now nearly completed, and the finishing touches are being put on the painting and furnishings. The building is large enough to meet all the requirements of the High school for a great many years to come, elegant in design, and carefully fitted in every way for its destined use. The Committee of the City Council on Public Property has the credit from the School Committee of doing everything possible to meet the views of the latter body in adapting every detail carefully to its purpose.

The building occupies an entire block of land, about three fourths of an acre, bounded by Summer, Mill, Chestnut and North streets, a high and commanding situation, and from a distance it is the most prominent object in the city. Collaterally, the view from the tower is extensive and fine.

The building is of brick, with Amherst (Ohio) freestone trimmings, and underpinning and basement window sills of Rockport granite. It is three stories high, with a flat-topped hip roof, the slopes slated and the flat tinned. The front on Summer street is 95 feet, and the width 92 feet. The Summer street entrance is under a projecting portico 21 by 15 feet. Over the centre front are a tower and spire. The brick are laid in black mortar.

In the first story, the east vestibule is 15 by 29 feet, and opens into

a larger vestibule, which, with stairways leading up from entrances at the north and south, cloak-rooms, &c., occupies a space extending the whole length of the building and 25 feet wide. Forty-seven feet length of this, in the centre, is clear and unobstructed. Opening from this main hall-way are two school-rooms at the east 30 by 36 feet, and two at the west 30 by 35 feet, occupying the corners of the building. The westerly part of the building is 109 feet long, projecting both north and south far enough to give the westerly school-rooms each an easterly window. Between the westerly rooms on the first floor are a library 16 by 26½ feet, and a private room for teachers 14 by 26½ feet.

The second story is like the first, except that over the east vestibule is a room for the principal, and over the library an apparatus room. The southwest room is to be devoted to philosophical experiments, and the windows are provided with patent rolling dark shutters.

In the third story are two school-rooms in the easterly corners, and between them an ante-room and a stairway leading to the tower. West of these rooms are a range of cloak-rooms, &c., and the westerly part of the third story is appropriated to an assembly hall for the whole school, 43 by 104½ feet. The northeast room in this story will be the apartment for lessons in drawing, and it has been provided with stools and tables, some of which were formerly used in the public evening drawing schools in Sears Hall. They have been neatly stained and varnished. The adjoining ante-rooms are fitted for the reception of drawing-boards and frames.

The basement will have a laboratory under the southeast school-room and a chemical store-room north of it, water-closets under the west rooms, and a boiler-room, janitor's room, and coal-room, under the library and teachers' private room. The laboratory has been fitted up with every possible convenience and the best style of apparatus for the work to be done in the room, on the same plan that was pursued in the State Normal School at Bridgewater.

The tower is 18½ feet wide, projecting two feet, and above the roof is enlarged to 20½ feet square.

The basement is 11 feet high in the clear (5 feet above ground); school-rooms in each story 15 feet; and the assembly hall 17 feet high at the ends and 20 feet high for 50 feet of its length in the centre. The tower room in the fourth story is 27 feet high, and in the fifth 14 feet. The height from the ground to the eaves is 56 feet; to the top of the roof, 78 feet; to top of tower, 98 feet; to summit of spire, 139 feet.

The cloak-rooms in the first and second stories are in double tiers 7 feet high, part of them opening from landings half way up each flight of stairs.

The attic, 19 feet high, has only six small dormer windows, and will

be unused except in the tower-room and by the raised ceiling of the assembly hall and such space as is occupied by ventilating pipes.

The plans for the building were made by Lord & Fuller and H. G. Wadlin, of Boston, and it has been erected under their supervision, and is well and thoroughly constructed in every respect. Mr. Augustus A. Greene has been their agent to supervise the work. The principal contractors were Dearborn Bros. & Co., of Boston, masons; Solomon Chadwick, carpenter; Ingalls & Kendrick, of Boston, steam heating apparatus; P. Mihan, of Cambridge, ventilation.

The heating apparatus is built under Clogston's patents, and has proved to be economical. The piping is arranged so as to obviate the disagreeable snapping sound often heard in steam heating pipes, and the heat is obtained by indirect radiation, all the radiators being placed in air flues in the basement.

The ventilation is so planned as to insure a draft in the ventilating flues both from the top and bottom of each room. This has been long a difficult problem, the tendency being to ventilate only from the top by the levity of the heated air when both registers open into the same flue; and if different flues are used the result has been no better, or perhaps resulting in a downward draught to the lower register. Mr. Mihan's plan is to conduct a tin pipe from the lower register through the centre of the flue ventilating from the upper register. The warm air in the outer flue heats the air inside the pipe, and thus creates a draught from below.

The inside finish is ash, white-filled and shellacked, and the walls of the rooms are painted in delicate grays, drabs, pearls, lavenders, &c., each room a different tint.

The school desks, the chairs for four rooms to be occupied by the lower grades of the school, and all the teachers' desks and tables are from the Sterling School Furniture Co., of Sterling, Ill. Ninety settees in the hall are from the same company, and are made with cast-iron frames, while the seats turn up against the backs like opera seats. There are 100 settees of the common pattern from the Fitchburg Chair Co., and the same concern has furnished cane-seated oak chairs with rubber feet for the scholars of the four upper-grade rooms. The Sterling chairs are on bronzed iron frames fastened to the floor. The backs and seats are of cherry slats, and the seats lift up.

The teachers' rooms and library are carpeted with drab and red, and the building contains twelve clocks.

The lot is surrounded with heavy granite curbing and posts, and is to have a wrought-iron fence.

In the belfry at the top of the tower is a heavy fire alarm bell struck by the telegraphic apparatus.

## XXX.

## FINANCES AND TAXATION.

STATEMENT OF THE VALUATION AND TAXATION OF THE CITY FROM 1863 TO 1876 INCLUSIVE.

| Incidental expenses, . . . . .                          | 14,284.86        |
|                                                         | <hr/>            |
|                                                         | \$424,000.00     |

INDEBTEDNESS OF THE CITY OF NEW BEDFORD, JANUARY 1ST, 1876.

|                                                                                          |                |
|------------------------------------------------------------------------------------------|----------------|
| The bonds issued by the city of New Bedford, and now<br>outstanding, amount to . . . . . | \$1,198,000.00 |
| Of this sum the water bonds are . . . . .                                                | 700,000.00     |
|                                                                                          | <hr/>          |
| Indebtedness other than water bonds, . . . . .                                           | \$498,000.00   |

This amount, \$498,000, represents the whole indebtedness of the city for the sums borrowed from time to time for war purposes and for public improvements.

The city has no other indebtedness, excepting a temporary loan made in anticipation of the receipts from the taxes in October next.

The public property, as appraised by a committee of the

|                                                         |                |
|---------------------------------------------------------|----------------|
| City Council, has a valuation of . . . . .              | \$1,778,413.34 |
| The city's indebtedness, as stated above, is, . . . . . | 1,198,000.00   |
|                                                         | <hr/>          |

|                                                  |              |
|--------------------------------------------------|--------------|
| Balance of property over indebtedness, . . . . . | \$580,413.34 |
|--------------------------------------------------|--------------|

The water works alone have had expended upon them, and are valued at, a sum which is but about two hundred thousand dollars short of the whole indebtedness of the city.

|                                               |                |
|-----------------------------------------------|----------------|
| The valuation of the water works is . . . . . | \$1,000,000.00 |
| The water bonds amount to . . . . .           | 700,000.00     |

The balance, . . . . . \$300,000.00  
 has been met from sources which have not increased the indebtedness of the city.

To meet the obligations connected with a bequest to the city, a perpetual annuity of six thousand dollars in aid of the Free Public Library and the Free Public Schools is to be provided for.

|                                                       |              |
|-------------------------------------------------------|--------------|
| The debt, independent of the water debt, is . . . . . | \$498,000.00 |
| In 1863 the whole debt was . . . . .                  | 425,000.00   |

Increase since 1863, 13 years, . . . . . \$73,000.00

The amount of the debt of the city of New Bedford, and the payments to be annually made thereupon are shown by the following statement.

|                 |          |
|-----------------|----------|
| 1876, . . . . . | \$20,000 |
| 1877, . . . . . | 30,000   |
| 1878, . . . . . | 25,000   |
| 1879, . . . . . | 37,000   |
| 1880, . . . . . | 27,000   |
| 1881, . . . . . | 25,000   |
| 1882, . . . . . | 25,000   |
| 1883, . . . . . | 35,000   |
| 1884, . . . . . | 41,000   |
| 1885, . . . . . | 35,000   |
| 1886, . . . . . | 35,000   |
| 1887, . . . . . | 35,000   |
| 1888, . . . . . | 35,000   |
| 1889, . . . . . | 35,000   |
| 1890, . . . . . | 35,000   |
| 1891, . . . . . | 40,000   |
| 1892, . . . . . | 40,000   |
| 1893, . . . . . | 33,000   |
| 1894, . . . . . | 30,000   |
| 1895, . . . . . | 30,000   |
| 1896, . . . . . | 30,000   |
| 1897, . . . . . | 30,000   |
| 1898, . . . . . | 30,000   |
| 1899, . . . . . | 30,000   |
| 1900, . . . . . | 40,000   |
| 1901, . . . . . | 40,000   |
| 1902, . . . . . | 40,000   |
| 1903, . . . . . | 40,000   |
| 1904, . . . . . | 40,000   |
| 1905, . . . . . | 40,000   |

|                 |             |
|-----------------|-------------|
| 1906, . . . . . | 40,000      |
| 1907, . . . . . | 40,000      |
| 1908, . . . . . | 40,000      |
| 1909, . . . . . | 40,000      |
| 1910, . . . . . | 30,000      |
|                 | <hr/>       |
|                 | \$1,198,000 |

The valuation of the city for the year 1876, as made by the assessors for the purposes of taxation, is as follows :

|                            |                 |
|----------------------------|-----------------|
| Real estate, . . . . .     | \$12,411,200.00 |
| Personal estate, . . . . . | 11,866,900.00   |
| Bank stock, . . . . .      | 2,472,102.00    |
|                            | <hr/>           |
|                            | \$26,750,202.00 |

To this should be added the sum of TWO MILLIONS of dollars of corporation property taxed by the State, and the bank stock held by our residents in banks out of the city. The deposits in our savings banks are about TEN MILLIONS of dollars, no part of which is included in the city valuation.

---

### XXXI.

#### MAYORS OF NEW BEDFORD.

Abraham H. Howland, 1847, 1848, 1849, 1850, 1851.

William J. Rotch, 1852.

Rodney French, 1853, 1854.

George Howland, Jr., 1855, 1856, 1863, 1864, 1865, and about three months of 1862.

George H. Dunbar, 1857, 1858, 1873. The municipal year was changed in 1857, so that his first term was nine months.

Willard Nye, 1859.

Isaac C. Taber, 1860, 1861, and to September 29, 1862.

John H. Perry, 1866, 1867.

Andrew G. Pierce, 1868, 1869.

George B. Richmond, 1870, 1871, 1872, 1874.

Abraham H. Howland, Jr., 1875, 1876.

All these gentlemen but three were born in New Bedford. William J. Rotch was born in Philadelphia, Rodney French in Berkley, and Willard Nye in Sandwich.

Three are deceased: Abraham H. Howland, Willard Nye, and Isaac C. Taber.

Isaac C. Taber is the only one who has died while holding the office.

It is believed that eight of these can trace their ancestry back to the soil of old Dartmouth previous to the American revolution.

Our present mayor is the son of the first.

George Howland, Jr., has held the office the longest, — three months over five years.

---

XXXII.

GOVERNMENT OF THE CITY OF NEW BEDFORD,  
1876.

MAYOR.

ABRAHAM H. HOWLAND, JR.

---

ALDERMEN.
